

PALMER SQUARE SSI ALTERNATIVE INCOME FUND

Class A Shares

(Ticker Symbol: PSCAX)

Class I Shares

(Ticker Symbol: PSCIX)

A series of Investment Managers Series Trust

**Supplement dated December 18, 2017, to the
Prospectus and the Statement of Additional Information (“SAI”) dated August 1, 2017.**

Effective December 18, 2017 (the “Effective Date”), SSI Investment Management, Inc. (the “Sub-Advisor”), the sub-advisor to the Palmer Square SSI Alternative Income Fund (the “Fund”), has agreed to implement a breakpoint with respect to the sub-advisory fee it receives from the Fund. Under the new arrangement, for Fund assets up to \$300 million, the Sub-Advisor will continue to receive 0.95% of the Fund’s average daily net assets, and for Fund assets greater than \$300 million, will receive 0.85%. Palmer Square Capital Management LLC, the Fund’s advisor, will continue to receive a management fee of 0.35% of the Fund’s average daily net assets.

Accordingly, the first footnote to the “Fees and Expenses” table on page 1 of the Prospectus is replaced with the following:

- 1 The management fee includes fees of 0.35% payable to the Fund’s advisor and 0.95% payable to the Fund’s sub-advisor for the first \$300 million in Fund assets and 0.85% for Fund assets over \$300 million.

In addition, the third paragraph under “The Sub-Advisor” beginning on page 15 of the Prospectus is replaced with the following:

For its services, the Sub-Advisor is entitled to receive an annual sub-advisory fee of 0.95% for the first \$300 million in assets and 0.85% for assets over \$300 million, calculated daily and payable monthly, as a percentage of the Fund’s average daily net assets. Prior to December 18, 2017, the Sub-Advisor received a sub-advisory fee of 0.95% of the Fund’s average daily net assets. The Sub-Advisor received the full sub-advisory fee for the fiscal year ended March 31, 2017. A discussion regarding the basis for the Board’s approval of the Sub-Advisory Agreement is available in the Fund’s Semi-Annual Report to shareholders dated as of September 30, 2016.

As of the Effective Date, all other references in the Fund’s Prospectus and SAI to the sub-advisory fee arrangement are revised as indicated above.

Please file this Supplement with your records.

Statement of Additional Information

THE TRUST AND THE FUND

The Trust is an open-end management investment company organized as a Delaware statutory trust under the laws of the State of Delaware on February 15, 2005. The Trust currently consists of several other series of shares of beneficial interest. This SAI relates only to the Fund and not to the other series of the Trust.

The Trust is registered with the Securities and Exchange Commission (“SEC”) as an open-end management investment company. Such a registration does not involve supervision of the management or policies of the Fund. The Prospectus of the Fund and this SAI omit certain of the information contained in the Registration Statement filed with the SEC. Copies of such information may be obtained from the SEC upon payment of the prescribed fee.

The Fund is a diversified fund, which means it is subject to the diversification requirements under the Investment Company Act of 1940, as amended (the “1940 Act”). Under the 1940 Act, a diversified fund may not, with respect to 75% of its total assets, invest more than 5% of its total assets in the securities of one issuer (and in not more than 10% of the outstanding voting securities of an issuer), excluding cash, Government securities, and securities of other investment companies.

The Fund currently offers two classes of shares: the A Class and the I Class. Other classes may be established from time to time in accordance with the provisions of the Trust’s Agreement and Declaration of Trust (the “Declaration of Trust”). Each class of shares of the Fund generally is identical in all respects except that each class of shares is subject to its own distribution expenses and minimum investments. Each class of shares also has exclusive voting rights with respect to its distribution fees.

INVESTMENT STRATEGIES, POLICIES AND RISKS

The discussion below supplements information contained in the Fund’s Prospectus pertaining to the investment policies of the Fund.

PRINCIPAL INVESTMENT STRATEGIES, POLICIES AND RISKS

EQUITY SECURITIES

Common Stock

The Fund may invest in common stock. Common stock represents a proportionate share of the ownership of a company and its value is based on the success of the company’s business, any income paid to stockholders, the value of its assets, and general market conditions. In addition to the general risks set forth above, investments in common stocks are subject to the risk that in the event a company in which the Fund invests is liquidated, the holders of preferred stock and creditors of that company will be paid in full before any payments are made to the Fund as holders of common stock. It is possible that all assets of that company will be exhausted before any payments are made to the Fund.

The fundamental risk of investing in common stock is that the value of the stock might decrease. Stock values fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions. While common stocks have historically provided greater long-term returns than preferred stocks, fixed-income and money market investments, common stocks have also experienced significantly more volatility than the returns from those other investments.

Preferred Stock

The Fund may invest in preferred stock. Preferred stock is a class of stock having a preference over common stock as to the payment of dividends and a share of the proceeds resulting from the issuer’s liquidation although preferred stock is usually subordinate to the debt securities of the issuer. Some preferred stocks also entitle their holders to receive additional liquidation proceeds on the same basis as the holders of the issuer’s common stock. Preferred stock typically does not possess voting rights and its market value may change based on changes in interest

rates. If interest rates rise, the fixed dividend on preferred stocks may be less attractive, causing the price of preferred stocks to decline. Preferred stock may have mandatory sinking fund provisions, as well as call/redemption provisions prior to maturity, a negative feature when interest rates decline. In addition, the Fund may receive stocks or warrants as a result of an exchange or tender of fixed income securities. Preference stock, which is more common in emerging markets than in developed markets, is a special type of common stock that shares in the earnings of an issuer, has limited voting rights, may have a dividend preference, and may also have a liquidation preference. Depending on the features of the particular security, holders of preferred and preference stock may bear the risks regarding common stock or fixed income securities.

Small- and Mid-Cap Stocks

The Fund may invest in stock of companies with market capitalizations that are small compared to other publicly traded companies. Investments in larger companies present certain advantages in that such companies generally have greater financial resources, more extensive research and development, manufacturing, marketing and service capabilities, and more stability and greater depth of management and personnel. Investments in smaller, less seasoned companies may present greater opportunities for growth but also may involve greater risks than customarily are associated with more established companies. The securities of smaller companies may be subject to more abrupt or erratic market movements than larger, more established companies. These companies may have limited product lines, markets or financial resources, or they may be dependent upon a limited management group. Their securities may be traded in the over-the-counter (“OTC”) market or on a regional exchange, or may otherwise have limited liquidity. As a result of owning large positions in this type of security, the Fund is subject to the additional risk of possibly having to sell portfolio securities at disadvantageous times and prices if redemptions require the Fund to liquidate its securities positions. In addition, it may be prudent for the Fund, as its asset size grows, to limit the number of relatively small positions it holds in securities having limited liquidity in order to minimize its exposure to such risks, to minimize transaction costs, and to maximize the benefits of research. As a consequence, as the Fund’s asset size increases, the Fund may reduce its exposure to illiquid small capitalization securities, which could adversely affect performance.

The Fund may also invest in stocks of companies with medium market capitalizations (i.e., mid-cap companies). Such investments share some of the risk characteristics of investments in stocks of companies with small market capitalizations described above, although mid cap companies tend to have longer operating histories, broader product lines and greater financial resources and their stocks tend to be more liquid and less volatile than those of smaller capitalization issuers.

Foreign Investments

The Fund may make foreign investments. Investments in the securities of foreign issuers and other non-U.S. investments may involve risks in addition to those normally associated with investments in the securities of U.S. issuers or other U.S. investments. All foreign investments are subject to risks of foreign political and economic instability, adverse movements in foreign exchange rates, and the imposition or tightening of exchange controls and limitations on the repatriation of foreign capital. Other risks stem from potential changes in governmental attitude or policy toward private investment, which in turn raises the risk of nationalization, increased taxation or confiscation of foreign investors’ assets.

The financial problems in global economies over the past several years, including the European sovereign debt crisis, may continue to cause high volatility in global financial markets. In addition, global economies are increasingly interconnected, which increases the possibilities that conditions in one country or region might adversely impact a different country or region. The severity or duration of these conditions may also be affected if one or more countries leave the Euro currency or by other policy changes made by governments or quasi-governmental organizations.

Additional non-U.S. taxes and expenses may also adversely affect the Fund’s performance, including foreign withholding taxes on foreign securities’ dividends. Brokerage commissions and other transaction costs on foreign securities exchanges are generally higher than in the United States. Foreign companies may be subject to different accounting, auditing and financial reporting standards. To the extent foreign securities held by the Fund are not

registered with the SEC or with any other U.S. regulator, the issuers thereof will not be subject to the reporting requirements of the SEC or any other U.S. regulator. Accordingly, less information may be available about foreign companies and other investments than is generally available on issuers of comparable securities and other investments in the United States. Foreign securities and other investments may also trade less frequently and with lower volume and may exhibit greater price volatility than U.S. securities and other investments.

Changes in foreign exchange rates will affect the value in U.S. Dollars of any foreign currency-denominated securities and other investments held by the Fund. Exchange rates are influenced generally by the forces of supply and demand in the foreign currency markets and by numerous other political and economic events occurring outside the United States, many of which may be difficult, if not impossible, to predict.

Income from any foreign securities and other investments will be received and realized in foreign currencies, and the Fund is required to compute and distribute income in U.S. Dollars. Accordingly, a decline in the value of a particular foreign currency against the U.S. Dollar occurring after the Fund's income has been earned and computed in U.S. Dollars may require the Fund to liquidate portfolio securities or other investments to acquire sufficient U.S. Dollars to make a distribution. Similarly, if the exchange rate declines between the time the Fund incurs expenses in U.S. Dollars and the time such expenses are paid, the Fund may be required to liquidate additional portfolio securities or other investments to purchase the U.S. Dollars required to meet such expenses.

The Fund may purchase foreign bank obligations. In addition to the risks described above that are generally applicable to foreign investments, the investments that the Fund makes in obligations of foreign banks, branches or subsidiaries may involve further risks, including differences between foreign banks and U.S. banks in applicable accounting, auditing and financial reporting standards, and the possible establishment of exchange controls or other foreign government laws or restrictions applicable to the payment of certificates of deposit or time deposits that may affect adversely the payment of principal and interest on the securities and other investments held by the Fund.

Emerging Markets. The Fund may invest in companies organized or doing substantial business in emerging market countries or developing countries as defined by the World Bank, International Financial Corporation or the Morgan Stanley Capital International (MSCI) emerging market indices or other comparable indices. There are special risks involved in investing in emerging market countries. Many investments in emerging markets can be considered speculative, and their prices can be more volatile than in the developed nations of the world. This difference reflects the greater uncertainties of investing in less established markets and economies. The financial markets of emerging markets countries are generally less well capitalized and thus securities of issuers and other investments based in such countries may be less liquid. Some companies in emerging markets are heavily dependent on international trade, and some are especially vulnerable to recessions in other countries. Most emerging market countries are the main suppliers of agricultural, energy, base and precious metals to the world, but there are some emerging market economies that are not rich in natural resources and are adversely affected by an increase in world commodity prices. Some countries may still have archaic economic or legal systems. The currencies of certain emerging market countries, and therefore the value of securities and other investments denominated in such currencies, may be more volatile than currencies of developed countries.

In certain emerging market countries, severe and persistent levels of inflation, including, in some cases, hyperinflation, has, in turn, led to high interest rates, extreme measures by governments to keep inflation in check, and a generally debilitating effect on economic growth. The political history of certain of these countries has also been characterized by political uncertainty, intervention by the military in civilian and economic spheres, and political corruption. Such developments, if they were to reoccur, could reverse favorable trends toward market and economic reform, privatization, and removal of trade barriers, and result in significant disruption in securities and other markets. A number of these countries are highly dependent on foreign loans for their operation. There have been moratoria on, and rescheduling of, repayment with respect to many countries' debts. Such events can restrict the flexibility of these debtor nations in the international markets and result in the imposition of onerous conditions on their economies.

Under foreign tax laws, taxes may be withheld at the source in certain foreign countries and there is a possibility of expropriation or potentially confiscatory levels of taxation, political, social and monetary instability or diplomatic developments that could adversely affect investments in, the liquidity of, and the ability to enforce

contractual obligations with respect to, securities of issuers located in those countries. Amounts realized on foreign securities and other investments in which the Fund may invest may be subject to foreign withholding or other taxes that could reduce the return on these securities. Applicable tax treaties between the United States and foreign countries may reduce or eliminate the amount of foreign taxes to which the Fund would otherwise be subject, but there can be no guarantee that the Fund will qualify for treaty benefits.

DEBT SECURITIES

Fixed Income Securities

The Fund may invest in a wide range of fixed-income securities, which may include obligations of any rating or maturity. The Fund may invest in investment grade corporate debt securities and below investment grade corporate debt securities (commonly known as “junk bonds” or “high yield bonds”). Investment grade corporate bonds are those rated BBB or better by Standard & Poor’s Rating Service, Inc. (“S&P”) or Baa or better by Moody’s Investors Service, Inc. (“Moody’s”) each of which are considered a nationally recognized statistical rating organization (“NRSRO”). Securities rated BBB by S&P are considered investment grade, but Moody’s considers securities rated Baa to have speculative characteristics. The Fund will not invest in securities that are rated below D by S&P or Moody’s. The Fund may hold a debt security rated below D if a downgrade occurs after the security has been purchased. See Appendix A for a description of corporate bond ratings. The Fund may also invest in unrated debt securities that the Advisor or Sub-Advisor believes are of comparable quality to the rated securities in which the Fund may purchase.

Corporate Debt Securities. The Fund may invest in corporate debt securities. Corporate debt securities are fixed-income securities issued by businesses to finance their operations, although corporate debt instruments may also include bank loans to companies. Notes, bonds, debentures and commercial paper are the most common types of corporate debt securities, with the primary difference being their maturities and secured or unsecured status. Commercial paper has the shortest term and is usually unsecured. The broad category of corporate debt securities includes debt issued by domestic or foreign companies of all kinds, including those with small-, mid- and large-capitalizations. Corporate debt may be rated investment grade or below investment grade and may carry variable or floating rates of interest.

Because of the wide range of types and maturities of corporate debt securities, as well as the range of creditworthiness of its issuers, corporate debt securities have widely varying potentials for return and risk profiles. For example, commercial paper issued by a large established domestic corporation that is rated investment grade may have a modest return on principal, but carries relatively limited risk. On the other hand, a long-term corporate note issued by a small foreign corporation from an emerging market country that has not been rated may have the potential for relatively large returns on principal, but carries a relatively high degree of risk.

Corporate debt securities carry credit risk, interest rate risk and prepayment risk. Credit risk is the risk that the Fund could lose money if the issuer of a corporate debt security is unable to pay interest or repay principal when it is due. Some corporate debt securities that are rated below investment grade are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities. The credit risk of a particular issuer’s debt security may vary based on its priority for repayment. For example, higher ranking (senior) debt securities have a higher priority than lower ranking (subordinated) securities. This means that the issuer might not make payments on subordinated securities while continuing to make payments on senior securities. In addition, in the event of bankruptcy, holders of higher-ranking senior securities may receive amounts otherwise payable to the holders of more junior securities.

Interest rate risk is the risk that the value of certain corporate debt securities will tend to fall when interest rates rise. In general, corporate debt securities with longer terms tend to fall more in value when interest rates rise than corporate debt securities with shorter terms. Prepayment risk occurs when issuers prepay fixed rate debt securities when interest rates fall, forcing the Fund to invest in securities with lower interest rates. Issuers of debt securities are also subject to the provisions of bankruptcy, insolvency and other laws affecting the rights and remedies of creditors that may restrict the ability of the issuer to pay, when due, the principal of and interest on its debt

securities. The possibility exists therefore, that, as a result of bankruptcy, litigation or other conditions, the ability of an issuer to pay, when due, the principal of and interest on its debt securities may become impaired.

Convertible Securities. The Fund may invest in convertible securities. Convertible securities include fixed income securities that may be exchanged or converted into a predetermined number of shares of the issuer's underlying common stock or other equity security at the option of the holder during a specified period. Convertible securities may take the form of convertible preferred stock, convertible bonds or debentures, units consisting of "usable" bonds and warrants or a combination of the features of several of these securities. The investment characteristics of each convertible security vary widely, which allows convertible securities to be employed for a variety of investment strategies. The Fund will exchange or convert convertible securities into shares of underlying common stock when, in the opinion of the Advisor or the Sub-Advisor, the investment characteristics of the underlying common stock or other equity security will assist the Fund in achieving its investment objectives. The Fund may also elect to hold or trade convertible securities. In selecting convertible securities, the Advisor or Sub-Advisor evaluates the investment characteristics of the convertible security as a fixed income instrument, and the investment potential of the underlying equity security for capital appreciation. In evaluating these matters with respect to a particular convertible security, the Advisor or Sub-Advisor considers numerous factors, including the economic and political outlook, the value of the security relative to other investment alternatives, trends in the determinants of the issuer's profits, and the issuer's management capability and practices. Convertible securities are subject to the risks associated generally with fixed income securities.

Junk Bonds. The Fund may invest in junk bonds. Junk bonds generally offer a higher current yield than that available for investment grade issues. However, below investment grade debt securities involve higher risks, in that they are especially subject to adverse changes in general economic conditions and in the industries in which the issuers are engaged, to changes in the financial condition of the issuers and to price fluctuations in response to changes in interest rates. During periods of economic downturn or rising interest rates, highly leveraged issuers may experience financial stress that could adversely affect their ability to make payments of interest and principal and increase the possibility of default. At times in recent years, the prices of many below investment grade debt securities declined substantially, reflecting an expectation that many issuers of such securities might experience financial difficulties. As a result, the yields on below investment grade debt securities rose dramatically, reflecting the risk that holders of such securities could lose a substantial portion of their value as a result of the issuers' financial restructuring or default. There can be no assurance that such price declines will not recur. The market for below investment grade debt issues generally is thinner and less active than that for higher quality securities, which may limit the Fund's ability to sell such securities at fair value in response to changes in the economy or financial markets. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may also decrease the values and liquidity of below investment grade debt securities, especially in a thinly traded market. Changes by recognized rating services in their rating of a debt security may affect the value of these investments. The Fund will not necessarily dispose of a security when its rating is reduced below its rating at the time of purchase. However, the Advisor or Sub-Advisor will monitor the investment to determine whether continued investment in the security will assist in meeting the Fund's investment objectives.

SHORT SALES

The Fund may seek to hedge investments or realize additional gains through the use of short sales. Short sales are transactions in which the Fund sells a security it does not own, in anticipation of a decline in the market value of that security. To complete such a transaction, the Fund must borrow the security to make delivery to the buyer. The Fund then is obligated to replace the security borrowed by purchasing it at the market price at or prior to the time of replacement. The price at such time may be more or less than the price at which the security was sold by the Fund. Until the security is replaced, the Fund is required to repay the lender any dividends or interest that accrues during the period of the loan. To borrow the security, the Fund also may be required to pay a premium, which would increase the cost of the security sold. The net proceeds of the short sale will be retained by the broker (or by the Fund's custodian in a special custody account), to the extent necessary to meet margin requirements, until the short position is closed out. The Fund also will incur transaction costs in effecting short sales.

Until the Fund replaces a borrowed security, it is required to maintain a segregated account of cash or liquid assets with a broker or custodian to cover the Fund's short position. Securities held in a segregated account cannot be

sold while the position they are covering is outstanding, unless they are replaced with other liquid assets. The Fund's ability to access the pledged collateral may also be impaired in the event the broker fails to comply with the terms of the contract, due to, for instance, its insolvency or bankruptcy. In such instances the Fund may not be able to substitute or sell the pledged collateral. Additionally, the Fund must maintain sufficient liquid assets (less any additional collateral pledged to the broker), marked-to-market daily, to cover the short sale obligation. This may limit the Fund's investment flexibility, as well as its ability to meet redemption requests or other current obligations.

The Fund will incur a loss as a result of the short sale if the price of the security increases between the date of the short sale and the date on which the Fund replaces the borrowed security. The Fund will realize a gain if the security declines in price between those dates. The amount of any gain will be decreased, and the amount of any loss increased, by the amount of the premium, dividends, interest or expenses the Fund may be required to pay in connection with a short sale.

In a short sale against the box, the Fund agrees to sell at a future date a security that it either currently owns or has the right to acquire at no extra cost.

OTHER INVESTMENT STRATEGIES, POLICIES AND RISKS

WARRANTS AND RIGHTS

The Fund may invest in warrants or rights (including those acquired in units or attached to other securities) that entitle (but do not obligate) the holder to buy equity securities at a specific price for a specific period of time but will do so only if such equity securities are deemed appropriate by the Advisor or Sub-Advisor. Rights are similar to warrants but typically have a shorter duration and are issued by a company to existing stockholders to provide those holders the right to purchase additional shares of stock at a later date. Warrants and rights do not have voting rights, do not earn dividends, and do not entitle the holder to any rights with respect to the assets of the company that has issued them. They do not represent ownership of the underlying companies but only the right to purchase shares of those companies at a specified price on or before a specified exercise date. Warrants and rights tend to be more volatile than the underlying stock, and if at a warrant's expiration date the stock is trading at a price below the price set in the warrant, the warrant will expire worthless. Conversely, if at the expiration date the stock is trading at a price higher than the price set in the warrant or right, the Fund can acquire the stock at a price below its market value. The prices of warrants and rights do not necessarily parallel the prices of the underlying securities. An investment in warrants or rights may be considered speculative.

DEPOSITORY RECEIPTS

The Fund may invest in American Depositary Receipts ("ADRs"), which are negotiable receipts issued by a U.S. bank or trust company that evidence ownership of securities in a foreign company which have been deposited with such bank or trust company's office or agent in a foreign country. Investing in ADRs presents risks that may not be equal to the risk inherent in holding the equivalent shares of the same companies that are traded in the local markets even though the Fund will purchase, sell and be paid dividends on ADRs in U.S. Dollars. These risks include fluctuations in currency exchange rates, which are affected by international balances of payments and other economic and financial conditions; government intervention; speculation; and other factors. With respect to certain foreign countries, there is the possibility of expropriation or nationalization of assets, confiscatory taxation, political and social upheaval, and economic instability. The Fund may be required to pay foreign withholding or other taxes on certain ADRs that it owns, but investors may or may not be able to deduct their pro rata share of such taxes in computing their taxable income, or take such shares as a credit against their U.S. federal income tax. See "Federal Income Tax Matters." ADRs may be sponsored by foreign issuers or may be unsponsored. Unsponsored ADRs are organized independently and without the cooperation of the foreign issuer of the underlying securities. While readily exchangeable with stock in local markets, unsponsored ADRs may be less liquid than sponsored ADRs. Additionally, there generally is less publicly available information with respect to unsponsored ADRs.

FOREIGN CURRENCY TRANSACTIONS

The Fund may conduct foreign currency exchange transactions either on a spot, i.e., cash basis at the prevailing rate in the foreign exchange market or by entering into a forward foreign currency contract. A forward foreign currency contract (“forward contract”) involves an obligation to purchase or sell a specific amount of a specific currency at a future date, which may be any fixed number of days (usually less than one year) from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Forward contracts are considered to be derivatives. The Fund enters into forward contracts in order to “lock in” the exchange rate between the currency it will deliver and the currency it will receive for the duration of the contract. In addition, the Fund may enter into forward contracts to hedge against risks arising from securities the Fund owns or anticipates purchasing or the U.S. Dollar value of interest and dividends paid on those securities.

If the Fund delivers the foreign currency at or before the settlement of a forward contract, it may be required to obtain the currency by selling some of the Fund’s assets that are denominated in that specific currency. The Fund may close out a forward contract obligating it to purchase a foreign currency by selling an offsetting contract, in which case it will realize a gain or a loss.

Foreign currency transactions involve certain costs and risks. The Fund incurs foreign exchange expenses in converting assets from one currency to another. Forward contracts involve a risk of loss if the Advisor or Sub-Advisor is inaccurate in predicting currency movements. The projection of short-term currency market movements is extremely difficult, and the successful execution of a short-term hedging strategy is highly uncertain. The precise matching of forward contract amounts and the value of the securities involved is generally not possible. Accordingly, it may be necessary for the Fund to purchase additional foreign currency if the market value of the security is less than the amount of the foreign currency the Fund is obligated to deliver under the forward contract and the decision is made to sell the security and deliver the foreign currency. The use of forward contracts as a hedging technique does not eliminate the fluctuation in the prices of the underlying securities the Fund owns or intends to acquire, but it fixes a rate of exchange in advance. Although forward contracts can reduce the risk of loss if the values of the hedged currencies decline, these instruments also limit the potential gain that might result from an increase in the value of the hedged currencies.

There is no systematic reporting of last sale information for foreign currencies, and there is no regulatory requirement that quotations available through dealers or other market sources be firm or revised on a timely basis. Quotation information available is generally representative of very large transactions in the interbank market. The interbank market in foreign currencies is a global around-the-clock market. Since foreign currency transactions occurring in the interbank market involve substantially larger amounts than those that may be involved in the use of foreign currency options, the Fund may be disadvantaged by having to deal in an odd lot market (generally consisting of transactions of less than \$1 million) for the underlying foreign currencies at prices that are less favorable than for round lots. The Fund may take positions in options on foreign currencies in order to hedge against the risk of foreign exchange fluctuation on foreign securities the Fund holds in its portfolio or which it intends to purchase.

INITIAL PUBLIC OFFERINGS

The Fund may invest in securities offered by companies in initial public offerings (“IPOs”). Because IPO shares frequently are volatile in price, the Fund may hold IPO shares for a very short period of time. This may increase the turnover of the Fund’s portfolio and may lead to increased expenses to the Fund, such as commissions and transaction costs. By selling IPO shares, the Fund may realize taxable capital gains that it will subsequently distribute to shareholders. Companies that offer securities in IPOs tend to typically have small market capitalizations and therefore their securities may be more volatile and less liquid than those issued by larger companies. Certain companies offering securities in an IPO may have limited operating experience and, as a result face a greater risk of business failure.

DEBT SECURITIES

Zero-Coupon Securities

The Fund may invest in zero-coupon securities. Zero-coupon securities make no periodic interest payments, but are sold at a deep discount from their face value. The buyer recognizes a rate of return determined by the gradual appreciation of the security, which is redeemed at face value on a specified maturity date. The discount varies depending on the time remaining until maturity, as well as market interest rates, liquidity of the security, and the issuer's perceived credit quality. If the issuer defaults, the holder may not receive any return on its investment. Because zero-coupon securities bear no interest, their price fluctuates more than other types of bonds. Since zero-coupon bondholders do not receive interest payments, when interest rates rise, zero-coupon securities fall more dramatically in value than bonds paying interest on a current basis. When interest rates fall, zero-coupon securities rise more rapidly in value because the bonds reflect a fixed rate of return. An investment in zero-coupon may cause the Fund to recognize income and make distributions to shareholders before it receives any cash payments on its investment.

Government Obligations

The Fund may invest in U.S. government obligations. Such obligations include Treasury bills, certificates of indebtedness, notes and bonds. U.S. government obligations include securities issued or guaranteed as to principal and interest by the U.S. government, its agencies or instrumentalities. Treasury bills, the most frequently issued marketable government securities, have a maturity of up to one year and are issued on a discount basis. U.S. government obligations include securities issued or guaranteed by government-sponsored enterprises.

Payment of principal and interest on U.S. government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. In the latter case, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, which agency or instrumentality may be privately owned. There can be no assurance that the U.S. government would provide financial support to its agencies or instrumentalities, including government-sponsored enterprises, where it is not obligated to do so (see "Agency Obligations," below). In addition, U.S. government obligations are subject to fluctuations in market value due to fluctuations in market interest rates. As a general matter, the value of debt instruments, including U.S. government obligations, declines when market interest rates increase and rises when market interest rates decrease. Certain types of U.S. government obligations are subject to fluctuations in yield or value due to their structure or contract terms.

Agency Obligations

The Fund may invest in agency obligations, such as the Export-Import Bank of the United States, Tennessee Valley Authority, Resolution Funding Corporation, Farmers Home Administration, Federal Home Loan Banks, Federal Intermediate Credit Banks, Federal Farm Credit Banks, Federal Land Banks, Federal Housing Administration, Government National Mortgage Association ("GNMA"), commonly known as "Ginnie Mae," Federal National Mortgage Association ("FNMA"), commonly known as "Fannie Mae," Federal Home Loan Mortgage Corporation ("FHLMC"), commonly known as "Freddie Mac," and the Student Loan Marketing Association ("SLMA"). Some, such as those of the Export-Import Bank of the United States, are supported only by the right of the issuer to borrow from the Treasury; others, such as those of the FNMA and FHLMC, are supported by only the discretionary authority of the U.S. government to purchase the agency's obligations; still others, such as those of the SLMA, are supported only by the credit of the instrumentality. No assurance can be given that the U.S. government would provide financial support to U.S. government-sponsored instrumentalities because they are not obligated by law to do so. As a result, there is a risk that these entities will default on a financial obligation. For instance, in September 2008, at the direction of the U.S. Treasury, FNMA and FHLMC were placed into conservatorship under the Federal Housing Finance Agency ("FHFA"), a newly created independent regulator.

Unrated Debt Securities

The Fund may also invest in unrated debt securities. Unrated debt, while not necessarily lower in quality than rated securities, may not have as broad a market. Because of the size and perceived demand for the issue, among other factors, certain issuers may decide not to pay the cost of getting a rating for their bonds. The creditworthiness of the issuer, as well as any financial institution or other party responsible for payments on the security, will be analyzed to determine whether to purchase unrated bonds.

Asset-Backed Securities

The Fund may invest in asset-backed securities. Asset-backed securities include pools of mortgages, loans, receivables or other assets. Payment of principal and interest may be largely dependent upon the cash flows generated by the assets backing the securities, and, in certain cases, supported by letters of credit, surety bonds, or other credit enhancements. The value of asset-backed securities may also be affected by the creditworthiness of the servicing agent for the pool, the originator of the loans or receivables, or the financial institution(s) providing the credit support. In addition, asset-backed securities are not backed by any governmental agency.

Mortgage-Backed Securities

The Fund may invest in securities that directly or indirectly represent participations in, or are collateralized by, payable from, mortgage loans secured by real property (“Mortgage-Backed Securities”). Mortgage-Backed Securities represent pools of mortgage loans assembled for sale to investors by various governmental agencies such as the Government National Mortgage Association (“Ginnie Mae”) and government-related organizations such as Fannie Mae and Freddie Mac, as well as by nongovernmental issuers such as commercial banks, savings and loan institutions, mortgage bankers, and private mortgage insurance companies. Although certain Mortgage-Backed Securities are guaranteed by a third party or otherwise similarly secured, the market value of the security, which may fluctuate, is not so secured. If the Advisor or the Sub-Advisor purchases a Mortgage-Backed Security at a premium, that portion may be lost if there is a decline in the market value of the security whether resulting from changes in interest rates or prepayments in the underlying mortgage collateral. As with other interest-bearing securities, the prices of such securities are inversely affected by changes in interest rates. However, though the value of a Mortgage-Backed Security may decline when interest rates rise, the converse is not necessarily true since in periods of declining interest rates the mortgages underlying the securities are prone to prepayment. For this and other reasons, a Mortgage-Backed Security’s stated maturity may be shortened by unscheduled prepayments on the underlying mortgages and, therefore, it is not possible to predict accurately the securities’ return to the Fund. In addition, regular payments received in respect of Mortgage-Backed Securities include both interest and principal. No assurance can be given as to the return the Fund will receive when these amounts are reinvested.

There are a number of important differences among the agencies and instrumentalities of the U.S. government that issue Mortgage-Backed Securities and among the securities that they issue. Mortgage-Backed Securities issued by Ginnie Mae include Ginnie Mae Mortgage Pass-Through Certificates which are guaranteed as to the timely payment of principal and interest by Ginnie Mae. This guarantee is backed by the full faith and credit of the United States. Ginnie Mae is a wholly-owned U.S. government corporation within the Department of Housing and Urban Development. Ginnie Mae certificates also are supported by the authority of Ginnie Mae to borrow funds from the U.S. Treasury to make payments under its guarantee. Mortgage-Backed Securities issued by Fannie Mae include Fannie Mae Guaranteed Mortgage Pass-Through Certificates (also known as “Fannie Maes”) which are guaranteed as to timely payment of the principal and interest by Fannie Mae. Fannie Maes are solely the obligations of Fannie Mae and are not backed by or entitled to the full faith and credit of the United States. Fannie Mae is a government sponsored organization owned entirely by private stockholders. Mortgage-Backed Securities issued by Freddie Mac include Freddie Mac Mortgage Participation Certificates (also known as “Freddie Mac PC’s”). Freddie Mac is a corporate instrumentality of the United States, created pursuant to an Act of Congress, which is owned entirely by Federal Home Loan Banks. Freddie Macs are not guaranteed by the United States or by any Federal Home Loan Banks and do not constitute a debt or obligation of the United States or any Federal Home Loan Bank. Freddie Macs entitle the holder to timely payment of interest, which is guaranteed by Freddie Mac. Freddie Mac guarantees either ultimate collection or timely payment of all principal payments on the underlying mortgage loans. When Freddie Mac does not guarantee timely payment of principal, Freddie Mac may remit the amount due on account of

its guarantee of ultimate payment of principal at any time after default on an underlying mortgage, but in no event later than one year after it becomes payable.

The Fund may also invest in Mortgage-Backed Securities which are collateralized mortgage obligations structured on pools of mortgage pass-through certificates or mortgage loans (“CMOs” and “REMICs”) and derivative multiple-class mortgage-backed securities (“Stripped Mortgage-Backed Securities” or “SMBSs”).

Recently, rating agencies have placed on credit watch or downgraded the ratings previously assigned to a large number of mortgage-related securities (which may include certain of the mortgage-related securities in which the Fund may in the future invest), and may continue to do so in the future. If a mortgage-related security in which the Fund is invested is placed on credit watch or downgraded, the value of the security may decline and the Fund may experience losses.

Further, the recent and unprecedented disruption in the residential mortgage-related securities market (and in particular, the “subprime” residential mortgage market), the broader mortgage-related securities market and the asset-backed securities market have resulted in downward price pressures and increasing foreclosures and defaults in residential and commercial real estate. Concerns over inflation, energy costs, geopolitical issues, the availability and cost of credit, the mortgage market and a declining real estate market have contributed to increased volatility and diminished expectations for the economy and markets going forward, and have contributed to dramatic declines in the housing market, with falling home prices and increasing foreclosures and unemployment, and significant asset write-downs by financial institutions. The continuation or worsening of this general economic downturn may lead to further declines in income from, or the value of, real estate, including the real estate which secures the mortgage-related securities held by the Fund. Additionally, a lack of credit liquidity and decreases in the value of real property have occurred and may continue to occur or worsen, and potentially prevent borrowers from refinancing their mortgages, which may increase the likelihood of default on their mortgage loans.

These economic conditions may also adversely affect the amount of proceeds the holder of a mortgage loan or mortgage-related securities would realize in the event of a foreclosure or other exercise of remedies. Moreover, even if such mortgage-related securities are performing as anticipated, their value in the secondary market may fall or continue to fall as a result of deterioration in general market conditions for such securities or other asset-backed or structured products. Trading activity associated with market indices may also drive spreads on those indices wider than spreads on mortgage related securities, thereby resulting in a decrease in the value of such mortgage-related securities. Mortgage loans backing non-agency mortgage-related securities are more sensitive to economic factors that could affect the ability of borrowers to pay their obligations under the mortgage loans backing these securities. These economic conditions may reduce the cash flow that the Fund investing in such mortgage-related securities receives from such securities and increase the incidence and severity of credit events and losses in respect of such securities. In addition, interest rate spreads for mortgage backed securities have widened and are more volatile when compared to the recent past due to these adverse changes in market conditions. In the event that interest rate spreads for mortgage-related securities continue to widen following the purchase of such assets by the Fund, the market value of such securities is likely to decline and, in the case of a substantial spread widening, could decline by a substantial amount. Furthermore, these adverse changes in market conditions have resulted in a severe liquidity crisis in the market for mortgage-backed securities (including the mortgage-related securities in which certain of the Fund may invest) and increasing unwillingness by banks, financial institutions and investors to extend credit to servicers, originators and other participants in the mortgage-related securities market for these securities and other asset-backed securities. As a result, the liquidity and/or the market value of any mortgage-related securities that are owned by the Fund may experience further declines after they are purchased by the Fund. The recent rise in the rate of foreclosures of properties has resulted in legislative, regulatory and enforcement actions seeking to prevent or restrict foreclosures. Actions have also been brought against issuers and underwriters of residential mortgage-backed securities collateralized by such residential mortgage loans and investors in such residential mortgage-backed securities. Future legislative or regulatory initiatives by federal, state or local legislative bodies or administrative agencies, if enacted or adopted, could delay foreclosure or the exercise of other remedies, provide new defenses to foreclosure, or otherwise impair the ability of the loan servicer to foreclose or realize on a defaulted residential mortgage loan included in a pool of residential mortgage loans backing such residential mortgage-backed securities. The nature or extent of any future limitations on foreclosure or exercise of other remedies that may be enacted is uncertain. Governmental actions that interfere with the foreclosure process, for example, could increase the costs of such foreclosures or exercise of other

remedies, delay the timing or reduce the amount of recoveries on defaulted residential mortgage loans and securities backed by such residential mortgage loans owned by the Fund, and could adversely affect the yields on the mortgage related securities owned by the Fund and could have the effect of reducing returns to the Fund that has invested in mortgage-related securities collateralized by these residential mortgage loans.

Structured Investments

The Fund may invest in structured investments. A structured investment is a security having a return tied to an underlying index or other security or asset class. Structured investments generally are individually negotiated agreements and may be traded OTC. Structured investments are organized and operated to restructure the investment characteristics of the underlying security. This restructuring involves the deposit with or purchase by an entity, such as a corporation or trust, on specified instruments (such as commercial bank loans) and the issuance by that entity or one or more classes of securities (“structured securities”) backed by, or representing interests in, the underlying instruments. The cash flow on the underlying instruments may be apportioned among the newly issued structured securities to create securities with different investment characteristics, such as varying maturities, payment priorities and interest rate provisions, and the extent of such payments made with respect to structured securities is dependent on the extent of the cash flow on the underlying instruments. Because structured securities typically involve no credit enhancement, their credit risk generally will be equivalent to that of the underlying instruments. Investments in structured securities are generally of a class of structured securities that is either subordinated or unsubordinated to the right of payment of another class. Subordinated structured securities typically have higher yields and present greater risks than unsubordinated structured securities. Structured securities are typically sold in private placement transactions, and there currently is no active trading market for structured securities. Investments in government and government-related and restructured debt instruments are subject to special risks, including the inability or unwillingness to repay principal and interest, requests to reschedule or restructure outstanding debt and requests to extend additional loan amounts. Certain issuers of structured investments may be deemed to be “investment companies” as defined in the 1940 Act. As a result, the Fund’s investment in these structured investments may be limited by the restrictions contained in the 1940 Act. Structured investments are typically sold in private placement transactions, and there currently is no active trading market for structured investments.

Strip Securities

The Fund may purchase separately traded interest and principal component parts of such obligations that are transferable through the Federal book entry system, known as Separately Traded Registered Interest and Principal Securities (“STRIPS”) and Coupon Under Book Entry Safekeeping (“CUBES”). These instruments are issued by banks and brokerage firms and are created by depositing U.S. Treasury notes and U.S. Treasury bonds into a special account at a custodian bank; the custodian holds the interest and principal payments for the benefit of the registered owner of the certificates or receipts. The custodian arranges for the issuance of the certificates or receipts evidencing ownership and maintains the register. Receipts include Treasury Receipts (“TRs”), Treasury Investment Growth Receipts (“TIGRs”) and Certificates of Accrual on Treasury Securities (“CATS”).

STRIPS, CUBES, TRs, TIGRs and CATS are sold as zero coupon securities, which mean that they are sold at a substantial discount and redeemed at face value at their maturity date without interim cash payments of interest or principal. This discount is amortized over the life of the security, and such amortization will constitute the income earned on the security for both accounting and tax purposes. Because of these features, these securities may be subject to greater interest rate volatility than interest-paying U.S. Treasury obligations. Bonds issued by the Resolution Funding Corporation (“REFCORP”) can also be stripped in this fashion. REFCORP Strips are eligible investments for the Fund.

Floating Rate and Inverse Floating Rate Securities

The Fund may invest in debt securities with interest payments or maturity values that are not fixed, but float in conjunction with (or inversely to) an underlying index or price. These securities may be backed by sovereign or corporate issuers, or by collateral such as mortgages. The indices and prices upon which such securities can be based include interest rates, currency rates and commodities prices. Floating rate securities pay interest according to a coupon which is reset periodically. The reset mechanism may be formula based, or reflect the passing through of

floating interest payments on an underlying collateral pool. Inverse floating rate securities are similar to floating rate securities except that their coupon payments vary inversely with an underlying index by use of a formula. Inverse floating rate securities tend to exhibit greater price volatility than other floating rate securities. Interest rate risk and price volatility on inverse floating rate obligations can be high, especially if leverage is used in the formula.

When-Issued or Delayed-Delivery Securities

The Fund may purchase securities on a when-issued or delayed delivery basis. For example, delivery of and payment for these securities can take place a month or more after the date of the purchase commitment. The purchase price and the interest rate payable, if any, on the securities are fixed on the purchase commitment date or at the time the settlement date is fixed. The value of such securities is subject to market fluctuations and, in the case of fixed income securities, no interest accrues to the Fund until settlement takes place. When purchasing a security on a when-issued or delayed-delivery basis, the Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. Accordingly, at the time the Fund makes the commitment to purchase securities on a when-issued or delayed delivery basis, it will record the transaction, reflect the value each day of such securities in determining its net asset value and, if applicable, calculate the maturity for the purposes of average maturity from that date. At the time of its acquisition, a when-issued security may be valued at less than the purchase price. The Fund will make commitments for such when-issued transactions only when it has the intention of actually acquiring the securities. To facilitate such acquisitions, the Fund will maintain with the Custodian a segregated account with liquid assets, consisting of cash, United States government securities or other appropriate securities, in an amount at least equal to such commitments. On delivery dates for such transactions, the Fund will meet its obligations from maturities or sales of the securities held in the segregated account and/or from cash flow. If, however, the Fund chooses to dispose of the right to acquire a when-issued security prior to its acquisition, it could, as with the disposition of any other portfolio obligation, incur a taxable capital gain or loss due to market fluctuation. Also, the Fund may be disadvantaged if the other party to the transaction defaults.

Loan Participations

The Fund may purchase participations in commercial loans. Such investments may be secured or unsecured. Loan participations typically represent direct participation, together with other parties, in a loan to a corporate borrower, and generally are offered by banks or other financial institutions or lending syndicates. The Fund may participate in such syndications, or can buy part of a loan, becoming a part lender. When purchasing indebtedness and loan participations, the Fund assumes the credit risk associated with the corporate borrower and may assume the credit risk associated with an interposed bank or other financial intermediary. The indebtedness and loan participations in which the Fund intends to invest may not be rated by any nationally recognized rating service.

A loan is often administered by an agent bank acting as agent for all holders. The agent bank administers the terms of the loan, as specified in the loan agreement. In addition, the agent bank is normally responsible for the collection of principal and interest payments from the corporate borrower and the apportionment of these payments to the credit of all institutions which are parties to the loan agreement. Unless, under the terms of the loan or other indebtedness, the Fund has direct recourse against the corporate borrower, the Fund may have to rely on the agent bank or other financial intermediary to apply appropriate credit remedies against a corporate borrower. Purchasers of loans and other forms of direct indebtedness depend primarily upon the creditworthiness of the corporate borrower for payment of principal and interest. If the Fund does not receive scheduled interest or principal payments on such indebtedness, the Fund's share price and yield could be adversely affected. Loans that are fully secured offer the Fund more protection than an unsecured loan in the event of non-payment of scheduled interest or principal. However, there is no assurance that the liquidation of collateral from a secured loan would satisfy the corporate borrower's obligation, or that the collateral can be liquidated.

The Fund may invest in loan participations with credit quality comparable to that of issuers of its securities investments. Indebtedness of companies whose creditworthiness is poor involves substantially greater risks, and may be highly speculative. Some companies may never pay off their indebtedness, or may pay only a small fraction of the amount owed. Consequently, when investing in indebtedness of companies with poor credit, the Fund bears a substantial risk of losing the entire amount invested. The Fund may make investments in indebtedness and loan participations to achieve capital appreciation, rather than to seek income. The Fund generally will treat the corporate

borrower as the “issuer” of indebtedness held by the Fund. In the case of loan participations where a bank or other lending institution serves as a financial intermediary between the Fund and the corporate borrower, if the participation does not shift to the Fund the direct debtor-creditor relationship with the corporate borrower, SEC interpretations require the Fund to treat both the lending bank or other lending institution and the corporate borrower as “issuers”. Loans and other types of direct indebtedness may not be readily marketable and may be subject to restrictions on resale. Consequently, some indebtedness may be difficult or impossible to dispose of readily at what the Advisor or Sub-Advisor believes to be a fair price. In addition, valuation of illiquid indebtedness involves a greater degree of judgment in determining the Fund’s net asset value than if that value were based on available market quotations, and could result in significant variations in the Fund’s daily share price. At the same time, some loan interests are traded among certain financial institutions and accordingly may be deemed liquid. As the market for different types of indebtedness develops, the liquidity of these instruments is expected to improve. In addition, the Fund currently intends to treat indebtedness for which there is no readily available market as illiquid for purposes of the Fund’s limitation on illiquid investments. Investments in loan participations are considered to be debt obligations.

Delayed Funding Loans and Revolving Credit Facilities

The Fund may enter into, or acquire participations in, delayed funding loans and revolving credit facilities. Delayed funding loans and revolving credit facilities are borrowing arrangements in which the lender agrees to make loans up to a maximum amount upon demand by the borrower during a specified term. A revolving credit facility differs from a delayed funding loan in that as the borrower repays the loan, an amount equal to the repayment may be borrowed again during the term of the revolving credit facility. Delayed funding loans and revolving credit facilities usually provide for floating or variable rates of interest. These commitments may have the effect of requiring the Fund to increase its investment in a company at a time when it might not otherwise decide to do so (including at a time when the company’s financial condition makes it unlikely that such amounts will be repaid). To the extent that the Fund is committed to advance additional funds, it will at all-times segregate or “ earmark” liquid assets, in an amount sufficient to meet such commitments.

The Fund may invest in delayed funding loans and revolving credit facilities with credit quality comparable to that of issuers of its securities investments. Delayed funding loans and revolving credit facilities may be subject to restrictions on transfer, and only limited opportunities may exist to resell such instruments. As a result, the Fund may be unable to sell such investments at an opportune time or may have to resell them at less than fair market value. The Fund currently intends to treat delayed funding loans and revolving credit facilities for which there is no readily available market as illiquid for purposes of the Fund’s limitation on illiquid investments. For a further discussion of the risks involved in investing in loan participations and other forms of direct indebtedness see “Loan Participations.” Delayed funding loans and revolving credit facilities are considered to be debt obligations for purposes of the Trust’s investment restriction relating to the lending of funds or assets by the Fund.

INVESTMENT COMPANY SECURITIES

The Fund may invest in shares of other investment companies (each, an “Underlying Fund”), including open-end funds, closed-end funds, unit investment trusts (“UITs”) and exchange-traded funds (“ETFs”), to the extent permitted by applicable law and subject to certain restrictions set forth in this SAI.

Under Sections 12(d)(1)(A) and 12(d)(1)(B) of the 1940 Act, the Fund and any companies controlled by the Fund may hold securities of an Underlying Fund in amounts which (i) do not exceed 3% of the total outstanding voting stock of such Underlying Fund, (ii) do not exceed 5% of the value of the Fund’s total assets and (iii) when added to all other Underlying Fund securities held by the Fund, do not exceed 10% of the value of the Fund’s total assets. The Fund may exceed these limits when permitted by SEC order or other applicable law or regulatory guidance, such as is the case with many ETFs.

Generally, under Sections 12(d)(1)(F) and 12(d)(1)(G) of the 1940 Act and SEC rules adopted pursuant to the 1940 Act, the Fund may acquire the securities of affiliated and unaffiliated Underlying Funds subject to the following guidelines and restrictions:

- The Fund may own an unlimited amount of the securities of any registered open-end fund or registered unit investment trust that is affiliated with the Fund, so long as any such Underlying Fund has a policy that prohibits it from acquiring any securities of registered open-end funds or registered UITs in reliance on certain sections of the 1940 Act.
- The Fund and its “affiliated persons” may own up to 3% of the outstanding stock of any fund, subject to the following restrictions:
 - the Fund and each Underlying Fund, in the aggregate, may not charge a sales load greater than the limits set forth in Rule 2830(d)(3) of the Conduct Rules of the Financial Industry Regulatory Authority (“FINRA”) applicable to funds of funds;
 - each Underlying Fund is not obligated to redeem more than 1% of its total outstanding securities during any period less than 30 days; and
 - the Fund is obligated either to (i) seek instructions from its shareholders with regard to the voting of all proxies with respect to the Underlying Fund and to vote in accordance with such instructions, or (ii) to vote the shares of the Underlying Fund held by the Fund in the same proportion as the vote of all other shareholders of the Underlying Fund.

Acquired funds typically incur fees that are separate from those fees incurred directly by the Fund. The Fund’s purchase of such investment company securities results in the layering of expenses as Fund shareholders would indirectly bear a proportionate share of the operating expenses of such investment companies, including advisory fees, in addition to paying Fund expenses. In addition, the securities of other investment companies may also be leveraged and will therefore be subject to certain leverage risks. The net asset value and market value of leveraged securities will be more volatile and the yield to shareholders will tend to fluctuate more than the yield generated by unleveraged securities. Investment companies may have investment policies that differ from those of the Fund.

Under certain circumstances an open-end investment company in which the Fund invests may determine to make payment of a redemption by the Fund wholly or in part by a distribution in kind of securities from its portfolio, instead of in cash. As a result, the Fund may hold such securities until the Advisor or Sub-Advisor determines it is appropriate to dispose of them. Such disposition will impose additional costs on the Fund.

Investment decisions by the investment advisors to the registered investment companies in which the Fund invests are made independently of the Fund. At any particular time, one Underlying Fund may be purchasing shares of an issuer whose shares are being sold by another Underlying Fund. As a result, under these circumstances the Fund indirectly would incur certain transactional costs without accomplishing any investment purpose.

Exchange-Traded Funds

The Fund may invest in ETFs. ETFs are investment companies whose primary objective is often to achieve the same rate of return as a particular market index while trading throughout the day on an exchange. The Fund will purchase and sell individual shares of ETFs in the secondary market. These secondary market transactions require the payment of commissions. ETF shares are subject to the same risks as other investment companies, as described above. Certain risks of investing in an index-based ETF are similar to those of investing in an indexed mutual fund, including tracking error risk (the risk of errors in matching the ETF’s underlying assets to the index); and the risk that because such an ETF is not actively managed, it cannot sell poorly performing stocks as long as they are represented in the index. Other ETF risks include the risk that ETFs may trade in the secondary market at a discount from their NAV and the risk that the ETFs may not be liquid. Furthermore, there may be times when the exchange halts trading, in which case the Fund owning ETF shares would be unable to sell them until trading is resumed. In addition, because ETFs often invest in a portfolio of common stocks and “track” a designated index, an overall decline in stocks composing an ETF’s benchmark index could have a greater impact on the ETF and investors than might be the case in an investment company with a more widely diversified portfolio. Losses could also occur if the ETF is unable to replicate the performance of the chosen benchmark index. Other risks associated with ETFs include the possibility that: (i) an ETF’s distributions may decline if the issuers of the ETF’s portfolio securities fail to continue to

pay dividends; and (ii) under certain circumstances, an ETF could be terminated. Should termination occur, the ETF could have to liquidate its portfolio when the prices for those assets are falling. In addition, inadequate or irregularly provided information about an ETF or its investments could expose investors in ETFs to unknown risks. In the event substantial market or other disruptions affecting ETFs should occur in the future, the liquidity and value of the Fund's shares could also be substantially and adversely affected.

Leveraged and Inverse ETFs

The Fund may invest in leveraged ETFs, inverse ETFs and inverse leveraged ETFs. Leveraged ETFs seek to deliver multiples of the performance of the index or other benchmark they track and use derivatives in an effort to amplify the returns of the underlying index or benchmark. While leveraged ETFs may offer the potential for greater return, the potential for loss and the speed at which losses can be realized also are greater. Inverse ETFs seek to negatively correlate with the performance of a particular index by using various forms of derivative transactions, including by short-selling the underlying index. An investment in an inverse ETF will decrease in value when the value of the underlying index rises. A number of factors may affect an inverse ETF's ability to achieve a high degree of inverse correlation with the benchmark index, and there can be no guarantee that an inverse ETF will achieve a high degree of inverse correlation. By investing in leveraged ETFs and inverse ETFs, the Fund can commit fewer assets to the investment in the securities represented on the index than would otherwise be required.

Leveraged ETFs and inverse ETFs present all of the risks that regular ETFs present. In addition, such ETFs determine their return over a specific, pre-set time period, typically daily, and, as a result, there is no guarantee that the ETF's actual long term returns will be equal to the daily return that the Fund seeks to achieve. As a result of compounding, inverse ETFs and leveraged ETFs typically have a single day investment objective. An inverse ETF's performance for periods greater than a single day is likely to be either better or worse than the inverse of the benchmark index performance, before accounting for fees and fund expenses. Similarly, a leveraged ETF's performance for periods greater than one day is likely to be either better or worse than the index performance, times the relevant multiple. This effect becomes more pronounced for these types of ETFs as market volatility increases.

Furthermore, because leveraged ETFs and inverse ETFs achieve their results by using derivative instruments, they are subject to the risks associated with derivative transactions, including the risk that the value of the derivatives may rise or fall more rapidly than other investments, thereby causing the ETF to lose money and, consequently, the value of the Fund's investment to decrease. Investing in derivative instruments also involves the risk that other parties to the derivative contract may fail to meet their obligations, which could cause losses to the ETF. Short sales in particular are subject to the risk that, if the price of the security sold short increases, the inverse ETF or inverse leveraged ETF may have to cover its short position at a higher price than the short sale price, resulting in a loss to the ETF and, indirectly, to the Fund. An ETF's use of these techniques will make the Fund's investment in the ETF more volatile than if the Fund were to invest directly in the securities underlying the tracked index, or in an ETF that does not use derivative instruments. However, by investing in leveraged ETFs and inverse ETFs rather than directly purchasing and/or selling derivative instruments, the Fund will limit its potential loss solely to the amount actually invested in the ETF (that is, the Fund will not lose more than the principal amount invested in the ETF).

Other Pooled Investment Vehicles

The Fund may invest in pooled investment vehicles, including limited partnerships. Examples of such vehicles include private equity funds and private equity funds of funds. A private equity fund generally invests in non-public companies that the fund's manager believes will experience significant growth over a certain time period. A private equity fund of funds invests in other private equity funds of the type described. Investments in private equity funds, once made, typically may not be redeemed for several years, though they may be sold to other investors under certain circumstances.

To the extent that the Fund invests in pooled investment vehicles, such investments may be deemed illiquid. In addition, the Fund will bear its ratable share of such vehicles' expenses, including its management expenses and performance fees. Performance fees are fees paid to the vehicle's manager based on the vehicle's investment performance (or returns) as compared to some benchmark. The fees the Fund pays to invest in a pooled investment vehicle may be higher than the fees it would pay if the manager of the pooled investment vehicle managed the Fund's

assets directly. Further, the performance fees payable to the manager of a pooled investment vehicle may create an incentive for the manager to make investments that are riskier or more speculative than those it might make in the absence of an incentive fee.

EXCHANGE-TRADED NOTES (“ETNs”)

The Fund may invest in ETNs. An investment in an ETN involves risks, including possible loss of principal. ETNs are unsecured debt securities issued by a bank that are linked to the total return of a market index. Risks of investing in ETNs also include limited portfolio diversification, uncertain principal payment, and illiquidity. Additionally, the investor fee will reduce the amount of return on maturity or at redemption, and as a result the investor may receive less than the principal amount at maturity or upon redemption, even if the value of the relevant index has increased. An investment in an ETN may not be suitable for all investors.

DERIVATIVES

The Fund may utilize a variety of derivatives contracts, such as futures, options, swaps and forward contracts, both for investment purposes and for hedging purposes. The Fund may also obtain exposure to a variety of derivatives contracts through the Fund’s investment in alternative ETFs. Hedging involves special risks including the possible default by the other party to the transaction, illiquidity and, to the extent the Advisor’s assessment of certain market movements is incorrect, the risk that the use of hedging could result in losses greater than if hedging had not been used. Nonetheless, with respect to certain investment positions, the Fund may not be sufficiently hedged against market fluctuations, in which case an investment position could result in a loss greater than if the Advisor had been sufficiently hedged with respect to such position.

The Advisor will not, in general, attempt to hedge all market or other risks inherent in the Fund’s positions, and may hedge certain risks, if at all, only partially. Specifically, the Advisor may choose not, or may determine that it is economically unattractive, to hedge certain risks, either in respect of particular positions or in respect of the Fund’s overall portfolio. Moreover, it should be noted that the Fund’s portfolio always will be exposed to unidentified systematic risk factors and to certain risks that cannot be completely hedged, such as credit risk (relating both to particular securities and to counterparties). The Fund’s portfolio composition may result in various directional market risks remaining unhedged, although the Advisor may rely on diversification to control such risks to the extent that the Advisor believes it is desirable to do so.

Recent legislation calls for new regulation of the derivatives markets. The extent and impact of the regulation is not yet fully known and may not be for some time. New regulations could adversely affect the value, availability and performance of certain derivative instruments, may make them more costly, and may limit or restrict their use by the Fund.

Certain additional risk factors related to derivatives are discussed below:

Derivatives Risk. Under recently adopted rules by the CFTC, transactions in some types of interest rate swaps and index credit default swaps on North American and European indices will be required to be cleared. In a cleared derivatives transaction, the Fund’s counterparty is a clearing house (such as CME Clearing, ICE Clearing or LCH.Clearnet), rather than a bank or broker. Since the Fund is not a member of clearing houses and only members of a clearing house can participate directly in the clearing house, the Fund will hold cleared derivatives through accounts at clearing members, who are futures commission merchants that are members of the clearing houses and who have the appropriate regulatory approvals to engage in swap transactions. The Fund will make and receive payments owed under cleared derivatives transactions (including margin payments) through its accounts at clearing members. Clearing members guarantee performance of their clients’ obligations to the clearing house. In contrast to bilateral derivatives transactions, following a period of advance notice to the Fund, clearing members generally can require termination of existing cleared derivatives transactions at any time and increases in margin above the margin that it required at the beginning of a transaction. Clearing houses also have broad rights to increase margin requirements for existing transactions and to terminate transactions. Any such increase or termination could interfere with the ability of the Fund to pursue its investment strategy. Also, the Fund is subject to execution risk if it enters into a derivatives transaction that is required to be cleared (or that the Advisor expects to be cleared), and no clearing member is willing

or able to clear the transaction on the Fund's behalf. While the documentation in place between the Fund and its clearing members generally provides that the clearing members will accept for clearing all transactions submitted for clearing that are within credit limits specified by the clearing members in advance, the Fund could be subject to this execution risk if the Fund submits for clearing transactions that exceed such credit limits, if the clearing house does not accept the transactions for clearing, or if the clearing members do not comply with their agreement to clear such transactions. In that case, the transaction might have to be terminated, and the Fund could lose some or all of the benefit of any increase in the value of the transaction after the time of the transaction. In addition, new regulations could, among other things, restrict the Fund's ability to engage in, or increase the cost to the Fund of, derivatives transactions, for example, by making some types of derivatives no longer available to the Fund or increasing margin or capital requirements. If the Fund is not able to enter into a particular derivatives transaction, the Fund's investment performance and risk profile could be adversely affected as a result.

Counterparty Risk. Counterparty risk with respect to OTC derivatives may be affected by new regulations promulgated by the CFTC and SEC affecting the derivatives market. As described under "Derivatives Risk" above, some derivatives transactions will be required to be cleared, and a party to a cleared derivatives transaction is subject to the credit risk of the clearing house and the clearing member through which it holds its cleared position, rather than the credit risk of its original counterparty to the derivative transaction. Clearing members are required to segregate all funds received from customers with respect to cleared derivatives transactions from the clearing member's proprietary assets. However, all funds and other property received by a clearing broker from its customers are generally held by the clearing broker on a commingled basis in an omnibus account, which may also invest those funds in certain instruments permitted under the applicable regulations. The assets of the Fund might not be fully protected in the event of the bankruptcy of the Fund's clearing member because the Fund would be limited to recovering only a pro rata share of all available funds segregated on behalf of the clearing broker's customers for a relevant account class. Also, the clearing member transfers to the clearing house the amount of margin required by the clearing house for cleared derivatives transactions, which amounts are generally held in an omnibus account at the clearing house for all customers of the clearing member. For commodities futures positions, the clearing house may use all of the collateral held in the clearing member's omnibus account to meet a loss in that account, without regard to which customer in fact supplied that collateral. Accordingly, in addition to bearing the credit risk of its clearing member, each customer to a futures transaction also bears "fellow customer" risk from other customers of the clearing member. However, with respect to cleared swaps positions, recent regulations promulgated by the CFTC require that the clearing member notify the clearing house of the amount of initial margin provided by the clearing member to the clearing house that is attributable to each customer. Because margin in respect of cleared swaps must be earmarked for specific clearing member customers, the clearing house may not use the collateral of one customer to cover the obligations of another customer. However, if the clearing member does not provide accurate reporting, the Fund is subject to the risk that a clearing house will use the Fund's assets held in an omnibus account at the clearing house to satisfy payment obligations of a defaulting customer of the clearing member to the clearing house. In addition, a clearing member may generally choose to provide to the clearing house the net amount of variation margin required for cleared swaps for all of the clearing member's customers in the aggregate, rather than the gross amount of each customer. The Fund is therefore subject to the risk that a clearing house will not make variation margin payments owed to the Fund if another customer of the clearing member has suffered a loss and is in default.

Options Transactions

The Fund may invest in put and call options transactions involving options on securities and on stock indices that are traded on U.S. and foreign exchanges or in the OTC markets. Securities and options exchanges have established limitations on the maximum number of options that an investor or group of investors acting in concert may write. It is possible that the Fund, other investment vehicles advised by the Advisor or Sub-Advisor and other clients of the Advisor or Sub-Advisor may be considered such a group. Position limits may restrict the Fund's ability to purchase or sell options on particular securities and on stock indices. Index prices may be distorted if trading in certain stocks included in the index is interrupted. Trading in the index options may also be interrupted in certain circumstances, such as if trading were halted in a substantial number of stocks included in the index. If this occurred, the Fund would not be able to close out options which it had purchased or written and, if restrictions on exercise were imposed, might be unable to exercise an option it held, which could result in substantial losses to the Fund.

Covered Option Writing. The Fund may write “covered” calls and “covered” puts on equity or debt securities and on stock indices in seeking to enhance investment return or to hedge against declines in the prices of portfolio securities. In addition, the Fund may write put options to hedge against increases in the prices of securities which it intends to purchase. A call option is covered if the Fund holds, on a share-for-share basis, either the underlying shares or a call on the same security as the call written where the exercise price of the call held is equal to or less than the exercise price of the call written (or greater than the exercise price of the call written if the difference is maintained by the Fund in cash, treasury bills or other high grade short-term obligations in a segregated account with its custodian). A put option is “covered” if the Fund maintains cash, treasury bills or other high grade short-term obligations with a value equal to the exercise price in a segregated account with its custodian, or holds on a share-for-share basis a put on the same equity or debt security as the put written where the exercise price of the put held is equal to or greater than the exercise price of the put written, or lower than the exercise price of the put written if the difference is maintained in a segregated account with its custodian.

Options on Stock Indices. The Fund may write call options on broadly based stock market indices only if at the time of writing it holds a portfolio of stocks. When the Fund writes a call option on a broadly based stock market index, it will segregate or put into escrow with its custodian any combination of cash, cash equivalents or “qualified securities” with a market value at the time the option is written of not less than 100% of the current index value times the multiplier times the number of contracts. A “qualified security” is an equity security which is listed on a securities exchange or on the NASDAQ against which the Fund has not written a call option and which has not been hedged by the sale of stock index futures.

Futures and Options on Futures

The Fund may use interest rate, foreign currency, index and other futures contracts. The Fund may also use options on futures contracts. A futures contract provides for the future sale by one party and purchase by another party of a specified quantity of the security or other financial instrument at a specified price and time. A futures contract on an index is an agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to the difference between the value of the index at the close of the last trading day of the contract and the price at which the index contract originally was written. Although the value of an index might be a function of the value of certain specified securities, physical delivery of these securities is not always made. A public market exists in futures contracts covering a number of indexes, as well as financial instruments, including, without limitation: U.S. Treasury bonds; U.S. Treasury notes; GNMA Certificates; three-month U.S. Treasury bills; 90-day commercial paper; bank certificates of deposit; Eurodollar certificates of deposit; the Australian dollar; the Canadian dollar; the British pound; the Japanese yen; the Swiss franc; the Mexican peso; and certain multinational currencies, such as the euro. It is expected that other futures contracts will be developed and traded in the future.

The Fund may purchase and write (sell) call and put futures options. Futures options possess many of the same characteristics as options on securities and indexes (discussed above). A futures option gives the holder the right, in return for the premium paid, to assume a long position (call) or short position (put) in a futures contract at a specified exercise price upon expiration of, or at any time during the period of, the option. Upon exercise of a call option, the holder acquires a long position in the futures contract and the writer is assigned the opposite short position. In the case of a put option, the opposite is true.

When a purchase or sale of a futures contract is made by the Fund, the Fund is required to deposit with its futures commission merchant a specified amount of liquid assets (“initial margin”). The margin required for a futures contract is set by the exchange on which the contract is traded and may be modified during the term of the contract. The initial margin is in the nature of a performance bond or good faith deposit on the futures contract that is returned to the Fund upon termination of the contract, assuming all contractual obligations have been satisfied. The Fund expects to earn taxable interest income on its initial margin deposits. The Fund, as a writer of an option, may have no control over whether the underlying futures contracts may be sold (call) or purchased (put) and as a result, bears the market risk of an unfavorable change in the valuation of the futures contracts underlying the written option. The Fund, as a purchaser of an option, bears the risk that the counterparties to the option may not have the ability to meet the terms of the option contract.

Futures and options on futures are regulated by the Commodity Futures Trading Commission (“CFTC”). The Fund invests in futures, options on futures and other instruments subject to regulation by the CFTC in reliance upon and in accordance with CFTC Regulation 4.5. Under Regulation 4.5, if the Fund uses futures, options on futures, or swaps other than for bona fide hedging purposes (as defined by the CFTC), the aggregate initial margin and premiums on these positions (after taking into account unrealized profits and unrealized losses on any such positions and excluding the amount by which options that are “in-the-money” at the time of purchase of a new position are “in-the-money”) may not exceed 5% of the Fund’s net asset value, or alternatively, the aggregate net notional value of those positions at the time may not exceed 100% of the Fund’s net asset value (after taking into account unrealized profits and unrealized losses on any such positions). The Trust, on behalf of the Fund, has filed a notice of eligibility for exclusion from the definition of the term “commodity pool operator” in accordance with CFTC Regulation 4.5. Therefore, as of the date of this SAI neither the Trust nor the Fund is deemed to be a “commodity pool” or “commodity pool operator” under the Commodity Exchange Act (“CEA”), and they are not subject to registration or regulation as such under the CEA. As of the date of this SAI, the Advisor is not deemed to be a “commodity pool operator” or “commodity trading adviser” with respect to the advisory services it provides to the Fund. In the future, if the Fund’s use of futures, options on futures, or swaps requires the Advisor to register as a commodity pool operator with the CFTC with respect to the Fund, the Advisor will do so at that time.

A futures contract held by the Fund is valued daily at the official settlement price of the exchange on which it is traded. Each day the Fund pays or receives cash, called “variation margin”, equal to the daily change in value of the futures contract. This process is known as “marking to market”. Variation margin does not represent a borrowing or loan by the Fund but is instead a settlement between the Fund and the broker of the amount one would owe the other if the futures contract expired. In computing daily net asset value, the Fund will mark to market its open futures positions. The Fund also is required to deposit and to maintain margin with respect to put and call options on futures contracts written by it. Such margin deposits will vary depending on the nature of the underlying futures contract (and the related initial margin requirements), the current market value of the option and other futures positions held by the Fund. Although some futures contracts call for making or taking delivery of the underlying securities, generally these obligations are closed out prior to delivery by offsetting purchases or sales of matching futures contracts (involving the same exchange, underlying security or index and delivery month). If an offsetting purchase price is less than the original sale price, the Fund realizes a capital gain, or if it is more, the Fund realizes a capital loss. Conversely, if an offsetting sale price is more than the original purchase price, the Fund realizes a capital gain, or if it is less, the Fund realizes a capital loss. The transaction costs also must be included in these calculations.

The Fund may write covered straddles consisting of a call and a put written on the same underlying futures contract. A straddle will be covered when sufficient assets are deposited to meet the Fund’s immediate obligations. The Fund may use the same liquid assets to cover both the call and put options if the exercise price of the call and put are the same, or if the exercise price of the call is higher than that of the put. In such cases, the Fund also will segregate liquid assets equivalent to the amount, if any, by which the put is “in the money.”

With respect to options and futures contracts that are cash settled, the Fund is permitted to set aside liquid assets in an amount equal to the Fund’s daily marked-to-market net obligations under the contracts (less any amounts the Fund has posted as margin), if any, rather than the full notional value. In the case of options and futures contracts that are not cash settled, the Fund will set aside liquid assets equal to the full notional value of the contracts (less any amounts the Fund has posted as margin), while the positions are open.

Stock Index Futures

The Fund may invest in stock index futures only as a substitute for a comparable market position in the underlying securities. A stock index future obligates the seller to deliver (and the purchaser to accept), effectively, an amount of cash equal to a specific dollar amount times the difference between the value of a specific stock index at the close of the last trading day of the contract and the price at which the agreement is made. No physical delivery of the underlying stocks in the index is made.

Swap Transactions

The Fund may enter into interest rate, currency and index swaps and the purchase or sale of related caps, floors and collars. The Fund may enter into these transactions to preserve a return or spread on a particular investment or portion of its portfolio, to protect against currency fluctuations or to protect against any increase in the price of securities it anticipates purchasing at a later date. Swaps may be used in conjunction with other instruments to offset interest rate, currency or other underlying risks. For example, interest rate swaps may be offset with “caps,” “floors” or “collars”. A “cap” is essentially a call option which places a limit on the amount of floating rate interest that must be paid on a certain principal amount. A “floor” is essentially a put option which places a limit on the minimum amount that would be paid on a certain principal amount. A “collar” is essentially a combination of a long cap and a short floor where the limits are set at different levels.

The Fund will usually enter into swaps on a net basis; that is, the two payment streams will be netted out in a cash settlement on the payment date or dates specified in the instrument, with the Fund receiving or paying, as the case may be, only the net amount of the two payments. To the extent obligations created thereby may be deemed to constitute senior securities, the Fund will maintain required collateral in a segregated account consisting of U.S. government securities or cash or cash equivalents.

Total Return Swaps. The Fund may enter into total return swap contracts for investment purposes. Total return swaps are contracts in which one party agrees to make periodic payments based on the change in market value of the underlying assets, which may include a specified security, basket of securities or security indexes during the specified period, in return for periodic payments based on a fixed or variable interest rate of the total return from other underlying assets. Total return swaps may be used to obtain exposure to a security or market without owning or taking physical custody of such security or market, including in cases in which there may be disadvantages associated with direct ownership of a particular security. In a typical total return equity swap, payments made by the Fund or the counterparty are based on the total return of a particular reference asset or assets (such as an equity security, a combination of such securities, or an index). That is, one party agrees to pay another party the return on a stock, basket of stocks, or stock index in return for a specified interest rate. By entering into an equity index swap, for example, the index receiver can gain exposure to stocks making up the index of securities without actually purchasing those stocks. Total return swaps involve not only the risk associated with the investment in the underlying securities, but also the risk of the counterparty not fulfilling its obligations under the agreement.

Credit Default Swaps. The Fund may enter into credit default swap transactions for investment purposes. A credit default swap may have as reference obligations one or more securities that are not currently held by the Fund. The Fund may be either the buyer or seller in the transaction. Credit default swaps may also be structured based on the debt of a basket of issuers, rather than a single issuer, and may be customized with respect to the default event that triggers purchase or other factors. As a seller, the Fund would generally receive an upfront payment or a fixed rate of income throughout the term of the swap, which typically is between six months and three years, provided that there is no credit event. If a credit event occurs, generally the seller must pay the buyer the full face amount of deliverable obligations of the reference obligations that may have little or no value. The notional value of the credit default swap will be used to segregate liquid assets for selling protection on credit default swaps. If the Fund were a buyer and no credit event occurs, the Fund would recover nothing if the swap is held through its termination date. However, if a credit event occurs, the buyer may elect to receive the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference obligation that may have little or no value. When the Fund buys credit default swaps it will segregate an amount at least equal to the amount of any accrued premium payment obligations including amounts for early terminations. The use of swap transactions by the Fund entails certain risks, which may be different from, or possibly greater than, the risks associated with investing directly in the securities and other investments that are the referenced asset for the swap transaction. Swaps are highly specialized instruments that require investment techniques, risk analyses, and tax planning different from those associated with stocks, bonds, and other traditional investments. The use of a swap requires an understanding not only of the referenced asset, reference rate, or index, but also of the swap itself, without the benefit of observing the performance of the swap under all the possible market conditions. Because some swap transactions have a leverage component, adverse changes in the value or level of the underlying asset, reference rate, or index can result in a loss substantially greater than the amount invested in the swap itself. Certain swaps have the potential for unlimited loss, regardless of the size of the initial investment.

The Fund may also purchase credit default swap contracts in order to hedge against the risk of default of the debt of a particular issuer or basket of issuers, in which case the Fund would function as the counterparty referenced in the preceding paragraph. This would involve the risk that the investment may expire worthless and would only generate income in the event of an actual default by the issuer(s) of the underlying obligation(s) (or, as applicable, a credit downgrade or other indication of financial instability). It would also involve the risk that the seller may fail to satisfy its payment obligations to the Fund in the event of a default. The purchase of credit default swaps involves costs, which will reduce the Fund's return.

Currency Swaps. The Fund may enter into currency swap transactions for investment purposes. Currency swaps are similar to interest rate swaps, except that they involve multiple currencies. The Fund may enter into a currency swap when it has exposure to one currency and desires exposure to a different currency. Typically the interest rates that determine the currency swap payments are fixed, although occasionally one or both parties may pay a floating rate of interest. Unlike an interest rate swap, however, the principal amounts are exchanged at the beginning of the contract and returned at the end of the contract. In addition to paying and receiving amounts at the beginning and termination of the agreements, both sides will also have to pay in full periodically based upon the currency they have borrowed. Change in foreign exchange rates and changes in interest rates, as described above, may negatively affect currency swaps.

OTC Derivatives Transactions

The Fund may enter into OTC derivatives transactions. The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), which was signed into law on July 21, 2010, established a new statutory framework that comprehensively regulated the OTC derivatives markets for the first time. Key Dodd-Frank Act provisions relating to OTC derivatives require rulemaking by the SEC and the CFTC, not all of which has been proposed or finalized as at the date of this SAI. Prior to the Dodd-Frank Act, the OTC derivatives markets were traditionally traded on a bilateral basis (so-called "bilateral OTC transactions"). Now certain OTC derivatives contracts are required to be centrally cleared and traded on exchanges or electronic trading platforms called swap execution facilities ("SEFs").

Bilateral OTC transactions differ from exchange-traded or cleared derivatives transactions in several respects. Bilateral OTC transactions are transacted directly with dealers and not with a clearing corporation. Without the availability of a clearing corporation, bilateral OTC transaction pricing is normally done by reference to information from market makers, which information is carefully monitored by the Advisor and verified in appropriate cases. As bilateral OTC transactions are entered into directly with dealers, there is a risk of nonperformance by the dealer as a result of its insolvency or otherwise. Under recently-adopted CFTC regulations, counterparties of registered swap dealers and major swap participants have the right to elect segregation of initial margin in respect of uncleared swaps. If a counterparty makes such an election, any initial margin that is posted to the swap dealer or major swap participant must be segregated in individual customer accounts held at an independent third party custodian. In addition, the collateral may only be invested in certain categories of instruments identified in the CFTC's regulations. Agreements covering these segregation arrangements must generally provide for consent by both the counterparty and the swap dealer or major swap participant to withdraw margin from the segregated account. Given these limitations on the use of uncleared swaps collateral, there is some likelihood that the electing counterparty will experience an increase in the costs associated with trading swaps with the relevant swap dealer or major swap participant. Certain other protections apply to a counterparty to uncleared swaps under the CFTC's regulations even if the counterparty does not elect segregation of its initial margin. These regulations are newly adopted, and it remains unclear whether they will be effective in protecting initial margin in the manner intended in the event of significant market stress or the insolvency of a swap dealer or major swap participant.

Furthermore, a bilateral OTC transaction may only be terminated voluntarily by entering into a closing transaction with the dealer with which the Fund originally dealt. Any such cancellation may require the Fund to pay a premium to that dealer. In those cases in which the Fund has entered into a covered transaction and cannot voluntarily terminate the transaction, the Fund will not be able to sell the underlying security until the transaction expires or is exercised or different cover is substituted. The Fund will seek to enter into OTC transactions only with

dealers which agree to, and which are expected to be capable of, entering into closing transactions with the Fund. There is also no assurance that the Fund will be able to liquidate an OTC transaction at any time prior to expiration.

The requirement to execute certain OTC derivatives contracts on SEFs may offer certain advantages over traditional bilateral OTC trading, such as ease of execution, price transparency, increased liquidity and/or favorable pricing. However, SEF trading may make it more difficult and costly for the Fund to enter into highly tailored or customized transactions and may result in additional costs and risks. Market participants such as the Fund that execute derivatives contracts through a SEF, whether directly or through a broker intermediary, are required to submit to the jurisdiction of the SEF and comply with SEF and CFTC rules and regulations which impose, among other things disclosure and recordkeeping obligations. In addition, the Fund will generally incur SEF or broker intermediary fees when it trades on a SEF. The Fund may also be required to indemnify the SEF or broker intermediary for any losses or costs that may result from the Fund's transactions on the SEF.

Commodities and Commodity Contracts

The Fund may purchase and sell commodity futures contracts and options; may enter into foreign exchange contracts; may enter into swaps and other financial transactions not requiring the delivery of physical commodities; commodity contracts or options on such contracts in compliance with applicable commodities laws. Investing in commodities in this manner carries risks. The Fund may also invest in instruments related to commodities, including structured notes, securities of commodities finance and operating companies. The Fund's exposure to the commodities markets may subject the Fund to greater volatility than investments in traditional securities. The value of commodity-linked instruments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, and other risks affecting a particular industry or commodity. The Fund will only invest in commodities transactions that the Advisor or Sub-Advisor believes can be readily liquidated.

There are additional factors associated with commodity futures contracts which may subject the Fund's investments in them to greater volatility than investments in traditional securities. In the commodity futures markets there are often costs of physical storage associated with purchasing the underlying commodity. The price of the commodity futures contract will reflect the storage costs of purchasing the physical commodity, including the time value of money invested in the physical commodity. To the extent that the storage costs for an underlying commodity change while the Fund is invested in futures contracts on that commodity, the value of the futures contract may change proportionately. In the commodity futures markets, producers of the underlying commodity may decide to hedge the price risk of selling the commodity by selling futures contracts today to lock in the price of the commodity at delivery tomorrow. In order to induce speculators to purchase the other side of the same futures contract, the commodity producer generally must sell the futures contract at a lower price than the expected future spot price of the commodity. Conversely, if most hedgers in the futures market are purchasing futures contracts to hedge against a rise in prices, then speculators will only sell the other side of the futures contract at a higher futures price than the expected future spot price of the commodity. The changing nature of the hedgers and speculators in the commodities markets will influence whether futures prices are above or below the expected future spot price, which can have significant implications for the Fund. If the nature of hedgers and speculators in futures markets has shifted when it is time for the Fund to reinvest the proceeds of a maturing futures contract in a new futures contract, the Fund might reinvest at higher or lower futures prices, or choose to pursue other investments. The commodities which underlie commodity futures contracts may be subject to additional economic and non-economic variables, such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political and regulatory developments. These factors may have a larger impact on commodity prices and commodity-linked instruments, including futures contracts, than on traditional securities. Certain commodities are also subject to limited pricing flexibility because of supply and demand factors. Others are subject to broad price fluctuations as a result of the volatility of the prices for certain raw materials and the instability of the supplies of other materials.

Changes in the regulation of derivatives, including commodity-based derivatives, arising from the Dodd-Frank Act may make it more expensive for the Fund and otherwise limit the Fund's ability to engage in such trading, which could adversely affect the Fund.

INDEXED SECURITIES

The Fund may purchase securities whose prices are indexed to the prices of other securities, securities indices, currencies, precious metals or other commodities, or other financial indicators. Indexed securities typically, but not always, are debt securities or deposits whose value at maturity or coupon rate is determined by reference to a specific instrument or statistic. Gold-indexed securities, for example, typically provide for a maturity value that depends on the price of gold, resulting in a security whose price tends to rise and fall together with gold prices. Currency-indexed securities typically are short-term to intermediate-term debt securities whose maturity values or interest rates are determined by reference to the values of one or more specified foreign currencies, and may offer higher yields than U.S. Dollar-denominated securities of equivalent issuers. Currency-indexed securities may be positively or negatively indexed; that is, their maturity value may increase when the specified currency value increases, resulting in a security that performs similarly to a foreign-denominated instrument, or their maturity value may decline when foreign currencies increase, resulting in a security whose price characteristics are similar to a put on the underlying currency. Currency-indexed securities may also have prices that depend on the value of a number of different foreign currencies relative to each other.

The performance of indexed securities depends to a great extent on the performance of the security, currency, or other instrument to which they are indexed, and may also be influenced by interest rate changes in the United States and abroad. At the same time, indexed securities are subject to the credit risks associated with the issuer of the security, and their values may decline substantially if the issuer's creditworthiness deteriorates. Recent issuers of indexed securities have included banks, corporations, and certain U.S. government agencies. Indexed securities may be more volatile than the underlying instruments.

PRIVATE PLACEMENTS AND RESTRICTED SECURITIES

The Fund may invest in restricted securities (securities with limited transferability under the securities laws) acquired from the issuer in "private placement" transactions. Private placement securities are not registered under the Securities Act of 1933, as amended (the "Securities Act"), and are subject to restrictions on resale. They are eligible for sale only to certain qualified institutional buyers, like the Fund, and are not sold on a trading market or exchange. While private placement securities offer attractive investment opportunities otherwise not available on an open market, because such securities are available to few buyers, they are often both difficult to sell and to value. Certain of the Fund's investments may be placed in smaller, less seasoned, issuers that present a greater risk due to limited product lines and/or financial resources. The issuer of privately placed securities may not be subject to the disclosure and other investor protection requirements of a public trade. Additionally, the Fund could obtain material non-public information from the issuer of such securities that would restrict the Fund's ability to conduct transactions in underlying securities.

Privately placed securities can usually only be resold to other qualified institutional buyers, or in a private transaction, or to a limited number of purchasers, or in a limited quantities after they have been held for a specified period of time and other conditions are met pursuant to an exemption from registration. The Fund may incur more cost in the disposition of such securities because of the time and legal expense required to negotiate a private placement. Because of the limited market, the Fund may find it difficult to sell the securities when it finds it advisable to do so and, to the extent such securities are sold in private negotiations, they may be sold for less than the price for which they were purchased or less than their fair market value.

Privately placed securities cannot be resold to the public unless they have been registered under the Securities Act or pursuant to an exemption, such as Rule 144A. Although securities which may be resold only to "qualified institutional buyers" in accordance with the provisions of Rule 144A under the Securities Act are technically considered "restricted securities," the Fund may purchase Rule 144A securities without regard to the limitation on investments in illiquid securities described above in the "Illiquid Securities" section, provided that a determination is made that such securities have a readily available trading market. The Fund may also purchase certain commercial paper issued in reliance on the exemption from regulations in Section 4(2) of the Securities Act ("4(2) Paper"). The Advisor or Sub-Advisor will determine the liquidity of Rule 144A securities and 4(2) Paper under the supervision of the Board of Trustees. The liquidity of Rule 144A securities and 4(2) Paper will be monitored by the Advisor or Sub-Advisor, and if as a result of changed conditions it is determined that a Rule 144A security or 4(2) Paper is no longer

liquid, the Fund's holdings of illiquid securities will be reviewed to determine what, if any, action is required to assure that the Fund does not exceed its percentage limitation for investments in illiquid securities.

TEMPORARY INVESTMENTS

The Fund may take temporary defensive measures that are inconsistent with the Fund's normal fundamental or non-fundamental investment policies and strategies in response to adverse market, economic, political, or other conditions as determined by the Advisor or Sub-Advisor. Such measures could include, but are not limited to, investments in investment grade corporate debt securities and high-quality, short-term debt securities and money market instruments. Short-term debt securities and money market instruments include cash, shares of other mutual funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. government securities and repurchase agreements. There is no limit on the extent to which the Fund may take temporary defensive measures. In taking such measures, the Fund may fail to achieve its investment objectives.

Short-Term Investments

The Fund may invest in any of the following securities and instruments:

Money Market Mutual Funds. Generally, money market mutual funds seek to earn income consistent with the preservation of capital and maintenance of liquidity. They primarily invest in high quality money market obligations, including U.S. government obligations, bank obligations and high-grade corporate instruments. These investments generally mature within 397 days from the date of purchase. An investment in a money market mutual fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any government agency.

To the extent that the Fund invests in money market funds, your cost of investing in the Fund will generally be higher since you will indirectly bear fees and expenses charged by the underlying money market mutual funds in addition to the Fund's direct fees and expenses. Furthermore, investing in money market funds could affect the timing, amount and character of distributions to you and therefore may increase the amount of taxes payable by you.

Bank Certificates of Deposit, Bankers' Acceptances and Time Deposits. The Fund may acquire certificates of deposit, bankers' acceptances and time deposits in U.S. Dollar or foreign currencies. Certificates of deposit are negotiable certificates issued against monies deposited in a commercial bank for a definite period of time and earning a specified return. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning in effect that the bank unconditionally agrees to pay the face value of the instrument on maturity. The commercial banks issuing these short-term instruments which the Fund may acquire must, at the time of purchase, have capital, surplus and undivided profits in excess of \$100 million (including assets of both domestic and foreign branches), based on latest published reports, or less than \$100 million if the principal amount of such bank obligations are fully insured by the U.S. government. If the Fund holds instruments of foreign banks or financial institutions, it may be subject to additional investment risks that are different in some respects from those incurred if the Fund invests only in debt obligations of U.S. domestic issuers. See "Foreign Investments" above. Such risks include future political and economic developments, the possible imposition of withholding taxes by the particular country in which the issuer is located, the possible confiscation or nationalization of foreign deposits, the possible establishment of exchange controls, or the adoption of other foreign governmental restrictions which may adversely affect the payment of principal and interest on these securities.

Domestic banks and foreign banks are subject to different governmental regulations with respect to the amount and types of loans that may be made and interest rates that may be charged. In addition, the profitability of the banking industry depends largely upon the availability and cost of funds and the interest income generated from lending operations. General economic conditions, government policy (including emergency reasons) and the quality of loan portfolios affect the banking industry.

As a result of federal and state laws and regulations, domestic banks are required to maintain specified levels of reserves, limited in the amount that they can loan to a single borrower, and are subject to regulations designed to

promote financial soundness. However, such laws and regulations may not necessarily apply to foreign banks, thereby affecting the risk involved in bank obligations that the Fund may acquire.

In addition to purchasing certificates of deposit and bankers' acceptances, to the extent permitted under its investment strategies and policies stated above and in the Prospectus, the Fund may invest in interest-bearing time deposits or other interest-bearing deposits in commercial or savings banks. Time deposits are non-negotiable deposits maintained at a banking institution for a specified period of time at a specified interest rate.

Savings Association Obligations. The Fund may invest in certificates of deposit (interest-bearing time deposits) issued by savings banks or savings and loan associations that have capital, surplus and undivided profits in excess of \$100 million, based on latest published reports, or less than \$100 million if the principal amount of such obligations is fully insured by the U.S. government.

Commercial Paper, Short-Term Notes and Other Corporate Obligations. The Fund may invest a portion of its assets in commercial paper and short-term notes. Commercial paper consists of unsecured promissory notes issued by corporations. Issues of commercial paper and short-term notes will normally have maturities of less than nine months and fixed rates of return, although such instruments may have maturities of up to one year.

The Fund's investment in commercial paper and short-term notes will consist of issues rated at the time of purchase "A-2" or higher by S&P, "Prime-1" or "Prime-2" by Moody's, or similarly rated by another NRSRO or, if unrated, will be determined by the Advisor or the Sub-Advisor to be of comparable quality. These rating symbols are described in Appendix A.

Corporate debt obligations are subject to the risk of an issuer's inability to meet principal and interest payments on the obligations, i.e., credit risk. The Advisor or the Sub-Advisor may actively expose the Fund to credit risk. However, there can be no guarantee that the Advisor or the Sub-Advisor will be successful in making the right selections and thus fully mitigate the impact of credit risk changes on the Fund.

REPURCHASE AGREEMENTS

The Fund may enter into repurchase agreements with respect to its portfolio securities. Pursuant to such agreements, the Fund acquires securities from financial institutions such as banks and broker-dealers deemed to be creditworthy by the Advisor or Sub-Advisor, subject to the seller's agreement to repurchase and the Fund's agreement to resell such securities at a mutually agreed upon date and price. The repurchase price generally equals the price paid by the Fund plus interest negotiated on the basis of current short-term rates (which may be more or less than the rate on the underlying portfolio security). Securities subject to repurchase agreements will be held by the custodian or in the Federal Reserve/Treasury Book-Entry System or an equivalent foreign system. The seller under a repurchase agreement will be required to maintain the value of the underlying securities at not less than 102% of the repurchase price under the agreement. If the seller defaults on its repurchase obligation, the Fund will suffer a loss to the extent that the proceeds from a sale of the underlying securities are less than the repurchase price under the agreement. Bankruptcy or insolvency of such a defaulting seller may cause the Fund's rights with respect to such securities to be delayed or limited. Repurchase agreements are considered to be loans under the 1940 Act.

REVERSE REPURCHASE AGREEMENTS

The Fund may enter into "reverse" repurchase agreements to avoid selling securities during unfavorable market conditions to meet redemptions. The Fund may invest a maximum of 10% of total assets in reverse repurchase agreements. Pursuant to a reverse repurchase agreement, the Fund will sell portfolio securities and agree to repurchase them from the buyer at a particular date and price. Whenever the Fund enters into a reverse repurchase agreement, it will establish a segregated account in which it will maintain liquid assets in an amount at least equal to the repurchase price marked to market daily (including accrued interest), and will subsequently monitor the account to ensure that such equivalent value is maintained. The Fund pays interest on amounts obtained pursuant to reverse repurchase agreements. Reverse repurchase agreements are considered to be borrowings by the Fund.

BORROWING

The Fund may engage in limited borrowing activities. Borrowing creates an opportunity for increased return, but, at the same time, creates special risks. Furthermore, if the Fund were to engage in borrowing, an increase in interest rates could reduce the value of the Fund's shares by increasing the Fund's interest expense. Subject to the limitations described under "Investment Limitations" below, the Fund may be permitted to borrow for temporary purposes and/or for investment purposes. Such a practice will result in leveraging of the Fund's assets and may cause the Fund to liquidate portfolio positions when it would not be advantageous to do so. This borrowing may be secured or unsecured. Provisions of the 1940 Act require the Fund to maintain continuous asset coverage (that is, total assets including borrowings, less liabilities exclusive of borrowings) of 300% of the amount borrowed, with an exception for borrowings not in excess of 5% of the Fund's total assets made for temporary administrative purposes. Any borrowings for temporary administrative purposes in excess of 5% of the Fund's total assets will count against this asset coverage requirement. If the 300% asset coverage should decline as a result of market fluctuations or other reasons, the Fund may be required to sell some of its portfolio holdings within three days to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint if the Fund sells securities at that time. Borrowing will tend to exaggerate the effect on net asset value of any increase or decrease in the market value of the Fund's portfolio. Money borrowed will be subject to interest charges which may or may not be recovered by appreciation of the securities purchased, if any. The Fund also may be required to maintain minimum average balances in connection with such borrowings or to pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

ILLIQUID AND RESTRICTED SECURITIES

The Fund may invest up to 15% of its net assets in illiquid securities, including (i) securities for which there is no readily available market; (ii) securities in which the disposition would be subject to legal restrictions (so called "restricted securities"); and (iii) repurchase agreements having more than seven days to maturity. However, the Fund will not acquire illiquid securities if, as a result, such securities would comprise more than 15% of the value of the Fund's net assets. The Trust's Board of Trustees (the "Board") or its delegate has the ultimate authority to determine, to the extent permissible under the federal securities laws, which securities are liquid or illiquid for purposes of this 15% limitation. The Board has delegated to the Advisor the day-to-day determination of the illiquidity of any security held by the Fund, although it has retained oversight and ultimate responsibility for such determinations. Although no definitive liquidity criteria are used, the Board has directed the Advisor to consider to such factors as (a) frequency of trading and availability of quotations; (b) the number of dealers willing to purchase or sell the security and the availability of buyers; (c) the willingness of dealers to be market makers in the security; and (d) the nature of trading activity including (i) the time needed to dispose of a position or part of a position and (ii) offer and solicitation methods. A considerable period of time may elapse between the Fund's decision to sell such securities and the time when the Fund is able to sell them, during which time the value of the securities could decline. Illiquid securities will usually be priced at fair value as determined in good faith by the Board or its delegate. If, through the appreciation of illiquid securities or the depreciation of liquid securities, more than 15% of the value of the Fund's net assets is invested in illiquid securities, including restricted securities which are not readily marketable, the Fund will take such steps as are deemed advisable, if any, to protect liquidity.

LENDING PORTFOLIO SECURITIES

The Fund may lend portfolio securities in an amount not exceeding one-third of its total assets to financial institutions such as banks and brokers if the loan is collateralized in accordance with applicable regulations. Under the present regulatory requirements which govern loans of portfolio securities, the loan collateral must, on each business day, at least equal the value of the loaned securities and must consist of cash, letters of credit of domestic banks or domestic branches of foreign banks, or securities of the U.S. government or its agencies. To be acceptable as collateral, letters of credit must obligate a bank to pay amounts demanded by the Fund if the demand meets the terms of the letter. Such terms and the issuing bank would have to be satisfactory to the Fund. Any loan may be secured by any one or more of the three types of collateral. The terms of the Fund's loans must permit the Fund to reacquire loaned securities on five days' notice or in time to vote on any serious matter and must meet certain tests under the Code.

MARKET CONDITIONS

The equity and debt capital markets in the United States and internationally experienced unprecedented volatility from 2008 through 2012. These conditions caused a significant decline in the value and liquidity of many securities and other instruments. It is impossible to predict whether such conditions will recur. Because such situations may be widespread, it may be difficult to identify both risks and opportunities using past models of the interplay of market forces, or to predict the duration of such events.

DEVELOPMENTS IN THE CHINA REGION

After nearly 30 years of unprecedented growth, the People's Republic of China now faces a slowing economy. The real estate market, which many observers believed to be inflated, has begun to decline. Local governments, which had borrowed heavily to bolster growth, face high debt burdens and limited revenue sources. As a result, demand for Chinese exports by the United States and countries in Europe, and demands for Chinese imports from such countries, may weaken due to the effects of more limited economic growth. Additionally, Chinese actions to lay claim to disputed islands have caused relations with China's regional trading partners to suffer, and could cause further disruption to regional and international trade. In the long run, China's ability to develop and sustain a credible legal, regulatory, monetary, and socioeconomic system could influence the course of outside investment.

EUROPE—RECENT EVENTS

A number of countries in Europe have experienced severe economic and financial difficulties. Many non-governmental issuers, and even certain governments, have defaulted on, or been forced to restructure, their debts; many other issuers have faced difficulties obtaining credit or refinancing existing obligations; financial institutions have in many cases required government or central bank support, have needed to raise capital, and/or have been impaired in their ability to extend credit; and financial markets in Europe and elsewhere have experienced extreme volatility and declines in asset values, currencies and liquidity. These difficulties may continue, worsen or spread within and outside of Europe. Responses to the financial problems by European governments, central banks and others, including austerity measures and reforms, may not work, may result in social unrest and may limit future growth and economic recovery or have other unintended consequences. Further defaults or restructurings by governments and others of their debt could have additional adverse effects on economies, financial markets and asset valuations around the world.

The European Union (the “EU”) currently faces major issues involving its membership, structure, procedures and policies, including the successful political, economic and social integration of new member states, the EU’s resettlement and distribution of refugees, and resolution of the EU’s problematic fiscal and democratic accountability. In addition, one or more countries may abandon the Euro, the common currency of the EU, and/or withdraw from the EU. The impact of these actions, especially if they occur in a disorderly fashion, is not clear but could be significant and far-reaching.

In June 2016, the United Kingdom (the “UK”) voted in a referendum to leave the EU. On March 29, 2017, UK Prime Minister Theresa May delivered a letter invoking Article 50 of the Lisbon Treaty and notifying the European Council of the UK’s decision to withdraw from the EU. The letter triggered the two year withdrawal negotiation process, and thus it is anticipated that the UK will leave the EU on or before March 29, 2019. It is unclear how withdrawal negotiations will be conducted and what the potential consequences may be. In addition, it is possible that measures could be taken to revote on the issue of Brexit, or that portions of the UK could seek to separate and remain a part of the EU. As a result of the political divisions within the UK and between the UK and the EU that the referendum vote has highlighted and the uncertain consequences of a Brexit, the UK and European economies and the broader global economy could be significantly impacted, which may result in increased volatility and illiquidity, and potentially lower economic growth on markets in the UK, Europe and globally that could potentially have an adverse effect on the value of the Fund’s investments.

Whether or not the Fund invests in securities of issuers located in Europe or with significant exposure to European issuers or countries, these events could negatively affect the value and liquidity of the Fund’s investments due to the interconnected nature of the global economy and capital markets. The Fund may also be susceptible to

these events to the extent that the Fund invests in municipal obligations with credit support by non-U.S. financial institutions.

CYBER SECURITY RISK

Investment companies, such as the Fund, and its service providers may be subject to operational and information security risks resulting from cyber attacks. Cyber attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber security breaches. Cyber attacks affecting the Fund or the Advisor, the Sub-Advisor, the Fund's custodian or transfer agent, or intermediaries or other third-party service providers may adversely impact the Fund. For instance, cyber attacks may interfere with the processing of shareholder transactions, impact the Fund's ability to calculate its net asset value, cause the release of private shareholder information or confidential company information, impede trading, subject the Fund to regulatory fines or financial losses, and cause reputational damage. The Fund may also incur additional costs for cyber security risk management purposes. While the Fund and its service providers have established business continuity plans and risk management systems designed to prevent or reduce the impact of cyber security attacks, such plans and systems have inherent limitations due in part to the ever-changing nature of technology and cyber security attack tactics, and there is a possibility that certain risks have not been adequately identified or prepared for. Furthermore, the Fund cannot control any cyber security plans or systems implemented by its service providers.

Similar types of cyber security risks are also present for issuers of securities in which the Fund invests, which could result in material adverse consequences for such issuers, and may cause the Fund's investment in such portfolio companies to lose value.

INVESTMENT RESTRICTIONS

The Fund has adopted the following restrictions as fundamental policies, which may not be changed without the favorable "vote of the holders of a majority of the outstanding voting securities" of the Fund, as defined in the 1940 Act. Under the 1940 Act, the "vote of the holders of a majority of the outstanding voting securities" of the Fund means the vote of the holders of the lesser of (i) 67% of the shares of the Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented or (ii) more than 50% of the outstanding shares of the Fund. The Fund's investment objectives are non-fundamental policies and may be changed without shareholder approval.

The Fund may not:

1. Issue senior securities, borrow money or pledge its assets, except that (i) the Fund may borrow from banks in amounts not exceeding one-third of its net assets (including the amount borrowed); and (ii) this restriction shall not prohibit the Fund from engaging in options transactions or short sales or investing in financial futures, swaps, when-issued or delayed delivery securities, or reverse repurchase agreements;
2. Act as underwriter, except to the extent the Fund may be deemed to be an underwriter in connection with the sale of securities in its investment portfolio;
3. Invest 25% or more of its total assets, calculated at the time of purchase, in any one industry or group of related industries (other than securities issued by the U.S. government);
4. Purchase or sell real estate or interests in real estate or real estate limited partnerships (although the Fund may purchase and sell securities which are secured by real estate and securities of companies which invest or deal in real estate such as real estate investment trusts (REITs));
5. Make loans of money, except (a) for purchases of debt securities consistent with the investment policies of the Fund, (b) by engaging in repurchase agreements or, (c) through the loan of portfolio securities in an amount up to 33 1/3% of the Fund's net assets; or

6. Purchase or sell commodities, except that the Fund may purchase and sell futures contracts and options; may enter into foreign exchange contracts; may enter into swap agreements and other financial transactions not requiring the delivery of physical commodities; may purchase or sell precious metals directly, and may purchase or sell precious metal commodity contracts or options on such contracts in compliance with applicable commodities laws.

The Fund observes the following restriction as a matter of operating but not fundamental policy, pursuant to positions taken by federal regulatory authorities:

The Fund may not invest, in the aggregate, more than 15% of its net assets in securities with legal or contractual restrictions on resale, securities that are not readily marketable and repurchase agreements with more than seven days to maturity.

Except with respect to borrowing, if a percentage or rating restriction on investment or use of assets set forth herein or in the Prospectus is adhered to at the time a transaction is effected, later changes in percentage resulting from any cause other than actions by the Fund will not be considered a violation.

MANAGEMENT OF THE FUND

Trustees and Officers

The overall management of the business and affairs of the Trust is vested with its Board of Trustees. The Board approves all significant agreements between the Trust and persons or companies furnishing services to it, including the agreements with the Advisor, Sub-Advisor, co-administrators, distributor, custodian and transfer agent. The day-to-day operations of the Trust are delegated to its officers, except that the Advisor and Sub-Advisor are responsible for making day-to-day investment decisions in accordance with the Fund’s investment objectives, strategies, and policies, all of which are subject to general supervision by the Board.

The Trustees and officers of the Trust, their years of birth and positions with the Trust, term of office with the Trust and length of time served, their business addresses and principal occupations during the past five years and other directorships held during the past five years are listed in the table below. Unless noted otherwise, each person has held the position listed for a minimum of five years. Charles H. Miller, Ashley Toomey Rabun, William H. Young and John P. Zader are all of the Trustees who are not “interested persons” of the Trust, as that term is defined in the 1940 Act (collectively, the “Independent Trustees”).

Name, Address, Year of Birth and Position(s) held with Trust	Term of Office ^c and Length of Time Served	Principal Occupation During the Past Five Years and Other Affiliations	Number of Portfolios in the Fund Complex Overseen by Trustee ^(d)	Other Directorships Held by Trustee During the Past Five Years
“Independent” Trustees:				
Charles H. Miller ^a (born 1947) Trustee	Since November 2007	Retired (2013 – present). Executive Vice President, Client Management and Development, Access Data, a Broadridge company, a provider of technology and services to asset management firms (1997 – 2012).	4	None.

Vice President – Compliance, Morgan Stanley Investment Management (2000 – 2009).	N/A	N/A

a Address for certain Trustees and certain officers: 235 West Galena Street, Milwaukee, Wisconsin 53212.

b Address for Mr. Banhazl, Ms. Ausili, Ms. Dam and Ms. Drake: 2220 E. Route 66, Suite 226, Glendora, California 91740.

Address for Mr. Dziura: 39 Stafford Square, Boyertown, Pennsylvania 19512.

c Trustees and officers serve until their successors have been duly elected.

d The Trust is comprised of numerous series managed by unaffiliated investment advisors. The term “Fund Complex” applies only to the series managed by the same investment advisor. The Advisor also serves as investment advisor to the Palmer Square Absolute Return Fund, Palmer Square Income Plus Fund, and Palmer Square Ultra-Short Duration Investment Grade Fund which are offered in separate prospectuses. The Fund does not hold itself out as related to any other series within the Trust, for purposes of investment and investor service.

† Mr. Banhazl is an “interested person” of the Trust by virtue of his position with Mutual Fund Administration, LLC.

Compensation

Each Independent Trustee receives from the Trust a quarterly retainer of \$30,000. Each Independent Trustee receives \$4,000 for each special in-person meeting attended and \$1,000 for each telephonic meeting attended. In addition, Ms. Rabun receives an additional annual retainer of \$25,000 for serving as Chairperson of the Board, and each of Mr. Young, Mr. Miller and Mr. Zader receives an additional annual retainer of \$10,000 for serving as Audit

Committee Chair, Valuation Committee Chair and Nominating, Governance and Regulatory Review Committee Chair, respectively. The Trust has no pension or retirement plan. No other entity affiliated with the Trust pays any compensation to the Trustees.

Name of Person/Position	Aggregate Compensation From the Fund(\$)¹	Pension or Retirement Benefits Accrued as Part of Fund's Expenses (\$)	Estimated Annual Benefits Upon Retirement (\$)	Total Compensation from Fund and Fund Complex Paid to Trustees (\$)^{1,2}
Charles H. Miller, Independent Trustee and Nominating Committee Chair	\$1,921	None	None	\$7,963
Ashley Toomey Rabun, Independent Trustee and Chairperson	\$2,115	None	None	\$8,662
William H. Young, Independent Trustee and Audit Committee Chair	\$1,892	None	None	\$7,852
John P. Zader, Independent Trustee and Nominating Governance and Regulatory Review Committee Chair	\$1,887	None	None	\$7,854

1 For the fiscal year ended March 31, 2017.

2 There are currently numerous portfolios comprising the Trust. The term "Fund Complex" applies only to the series managed by the same investment advisor. For the Fund's fiscal year ended March 31, 2017, the aggregate Independent Trustees' fees for the Trust were \$567,250.

Mr. Banhazl is not compensated for his service as Trustee because of his affiliation with the Trust. Officers of the Trust are not compensated by the Fund for their services.

Additional Information Concerning the Board and the Trustees

The current Trustees were selected in November 2007 (January 2008 for Mr. Banhazl) with a view towards establishing a Board that would have the broad experience needed to oversee a registered investment company comprised of multiple series employing a variety of different investment strategies. As a group, the Board has extensive experience in many different aspects of the financial services and asset management industries.

The Trustees were selected to join the Board based upon the following factors, among others: character and integrity; willingness to serve and willingness and ability to commit the time necessary to perform the duties of a Trustee; as to each Trustee other than Mr. Banhazl and Mr. Zader (at that time), satisfying the criteria for not being classified as an "interested person" of the Trust as defined in the 1940 Act; and, as to Mr. Banhazl his position with Mutual Fund Administration, LLC, one of the Trust's co-administrators. In addition, the Trustees have the following specific experience, qualifications, attributes and/or skills relevant to the operations of the Trust:

- Ms. Rabun has substantial senior executive experience in mutual fund marketing and distribution and serving in senior executive and board positions with mutual funds, including multiple series trusts similar to the Trust.
- Mr. Miller has significant senior executive experience with respect to marketing and distribution of mutual funds, including multiple series trusts similar to the Trust.

- Mr. Young has broad senior executive experience with respect to the operations and management of mutual funds and administrative service providers, including multiple series trusts similar to the Trust.
- Mr. Banhazl has significant experience serving in senior executive and board positions for mutual funds and with respect to the organization and operation of mutual funds and multiple series trusts similar to the Trust.
- Mr. Zader has substantial experience serving in senior executive positions at mutual fund administrative service providers.

In its periodic self-assessment of the effectiveness of the Board, the Board considers the complementary individual skills and experience of the individual Trustees primarily in the broader context of the Board's overall composition so that the Board, as a body, possesses the appropriate (and appropriately diverse) skills and experience to oversee the business of the Fund. The summaries set forth above as to the qualifications, attributes and skills of the Trustees are required by the registration form adopted by the SEC, do not constitute holding out the Board or any Trustee as having any special expertise or experience, and do not impose any greater responsibility or liability on any such person or on the Board as a whole than would otherwise be the case.

The Board of Trustees has three standing committees: the Audit Committee, the Nominating, Governance and Regulatory Review Committee (the "Nominating Committee"), and the Valuation Committee.

- The function of the Audit Committee, with respect to each series of the Trust, is to review the scope and results of the series' annual audit and any matters bearing on the audit or the series' financial statements and to assist the Board's oversight of the integrity of the series' pricing and financial reporting. The Audit Committee is comprised of all of the Independent Trustees and is chaired by Mr. Young. It does not include any Interested Trustees. The Audit Committee is expected to meet at least twice a year with respect to each series of the Trust. The Audit Committee met twice during the fiscal year ended March 31, 2017 with respect to the Fund.

The Audit Committee also serves as the Qualified Legal Compliance Committee for the Trust for the purpose of compliance with Rules 205.2(k) and 205.3(c) of the Code of Federal Regulations regarding alternative reporting procedures for attorneys retained or employed by an issuer who appear and practice before the SEC on behalf of the issuer.

- The Nominating Committee is responsible for reviewing matters pertaining to composition, committees, and operations of the Board, as well as assisting the Board in overseeing matters related to certain regulatory issues. The Nominating Committee meets from time to time as needed. The Nominating Committee will consider trustee nominees properly recommended by the Trust's shareholders. Shareholders who wish to recommend a nominee should send nominations that include, among other things, biographical data and the qualifications of the proposed nominee to the Trust's Secretary. The Independent Trustees comprise the Nominating Committee, and the Committee is chaired by Mr. Zader. The Nominating Committee met three times during the fiscal year ended March 31, 2017.
- The function of the Valuation Committee is to value securities held by any series of the Trust for which current and reliable market quotations are not readily available. Such securities are valued at their respective fair values as determined in good faith by the Valuation Committee and the actions of the Valuation Committee are subsequently reviewed by the Board. The Valuation Committee is comprised of all the Trustees and is chaired by Mr. Miller, but action may be taken by any one of the Trustees. The Valuation Committee meets as needed. The Valuation Committee met four times during the fiscal year ended March 31, 2017 with respect to the Fund.

Independent Trustees comprise 80% of the Board and Ashley Toomey Rabun, an Independent Trustee, serves as Chairperson of the Board. The Chairperson serves as a key point person for dealings between the Trust's management and the other Independent Trustees. As noted above, through the committees of the Board the Independent Trustees consider and address important matters involving each series of the Trust, including those presenting conflicts or potential conflicts of interest. The Independent Trustees also regularly meet outside the

presence of management and are advised by independent legal counsel. The Board has determined that its organization and leadership structure are appropriate in light of its fiduciary and oversight obligations, the special obligations of the Independent Trustees, and the relationship between the Interested Trustees and the Trust's co-administrators. The Board also believes that its structure facilitates the orderly and efficient flow of information to the Independent Trustees from management.

Consistent with its responsibility for oversight of the Fund in the interests of shareholders, the Board among other things oversees risk management of the Fund's investment programs and business affairs directly and through the Audit Committee. The Board has emphasized to the Advisor the importance of maintaining vigorous risk management programs and procedures.

The Fund faces a number of risks, such as investment risk, valuation risk, reputational risk, risk of operational failure or lack of business continuity, and legal, compliance and regulatory risk. Risk management seeks to identify and address risks, i.e., events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Fund. Under the overall supervision of the Board, the Advisor, Sub-Advisor, and other service providers to the Fund employ a variety of processes, procedures and controls to identify various of those possible events or circumstances, to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Different processes, procedures and controls are employed with respect to different types of risks. Various personnel, including the Trust's Chief Compliance Officer (the "CCO"), the Advisor's management, and other service providers (such as the Fund's independent registered public accounting firm) make periodic reports to the Board or to the Audit Committee with respect to various aspects of risk management. The Board recognizes that not all risks that may affect the Fund can be identified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the Fund's investment objectives, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees as to risk management matters are typically summaries of the relevant information. As a result of the foregoing and other factors, the Board's risk management oversight is subject to substantial limitations.

Fund Shares Beneficially Owned by Trustees. Certain information regarding ownership by the Trustees of the Fund and other series of the Trust, as of December 31, 2016, is set forth in the following table.

Name of Trustee	Dollar Range of Equity Securities in the Fund (None, \$1-\$10,000, \$10,001-\$50,000, \$50,001-\$100,000, Over \$100,000)	Aggregate Dollar Range of Equity Securities in all Registered Investment Companies Overseen by Trustee in Family of Investment Companies
Charles H. Miller, Independent Trustee	None	\$1 - \$10,000
Ashley Toomey Rabun, Independent Trustee	None	None
William H. Young, Independent Trustee	None	Above \$100,000
John P. Zader, Independent Trustee	None	None
Eric M. Banhazl, Interested Trustee	None	Above \$100,000

Control Persons, Principal Shareholders, and Management Ownership

The following table lists the control persons of the Fund as of July 3, 2017. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of the Fund or acknowledges the existence of control. Shareholders with a controlling interest could affect the outcome of voting or the direction of management of the Fund.

Control Persons	Jurisdiction	Percentage of Total Outstanding Shares of the Fund as of July 3, 2017
Charles Schwab & Co., Inc. Attn. Mutual Funds San Francisco, CA 94105	CA	40.36%

The following table lists the principal shareholders of the Fund as of July 3, 2017. The principal shareholders are holders of record of more than 5% of the outstanding shares of the indicated class of the Fund, including the listed shareholders that are financial intermediaries.¹

Principal Shareholder	Percentage of Total Outstanding Shares of Class as of July 3, 2017
Class A	
Charles Schwab & Co., Inc. Attn. Mutual Funds San Francisco, CA 94105	60.83%
TD Ameritrade Inc. FEBO Omaha, NE 68103	13.02%
Class I	
Charles Schwab & Co Inc. Attn. Mutual Funds San Francisco, CA 94105	40.06%
National Financial Services LLC FEBO Jersey City, NJ 07310	12.94%
UBS Wealth Management USA Weehawken, NJ 07086	9.71%
Wells Fargo Bank NA FBO Minneapolis, MN 55480	8.50%
Bank of New York Mellon King of Prussia, PA 19406	8.20%

As of July 3, 2017 the Trustees and officers of the Trust as a group did not own more than 1% of the outstanding shares of the Fund. Furthermore, neither the Independent Trustees, nor members of their immediate families, own securities beneficially or of record in the Advisor, the Sub-Advisor, the Fund's distributor, IMST Distributors, LLC (the "Distributor"), or any of their respective affiliates. Accordingly, neither the Independent Trustees nor members of their immediate families, have direct or indirect interest, the value of which exceeds \$120,000, in the Advisor, the Sub-Advisor, the Distributor or any of their respective affiliates.

The Advisor

Palmer Square Capital Management LLC, located at 2000 Shawnee Mission Parkway, Suite 300, Mission Woods, KS 66205, acts as investment advisor to the Fund pursuant to an Investment Advisory Agreement (the "Advisory Agreement").

¹ The Fund has no information regarding the beneficial owners of Fund shares owned through accounts with financial intermediaries.

Pursuant to the terms of the Advisory Agreement and subject to the general supervision of the Board of Trustees, the Advisor provides certain management services to the Fund, including (i) monitoring the activities of the Sub-Advisor and reporting thereon to the Trust's Board of Trustees; (ii) requesting information from, and reviewing reports and other information provided by the Sub-Advisor regarding the Fund's investment program; (iii) reporting the Trust's Board of Trustees on the Fund's investment portfolio and the Sub-Advisor's management of the Fund's assets, including the consistency of the Sub-Advisor's management of the portfolio with the Fund's stated investment objective and policies; (iv) reviewing the Fund's daily net asset value calculation and consulting with the Fund's Valuation Committee with respect to the appropriate valuation of portfolio securities; (v) consulting with the Board of Trustees from time to time regarding the investment objectives, policies, strategies, and restrictions of the Fund; (vi) monitoring the Fund and the Sub-Advisor for compliance with applicable legal and regulatory requirements and advising the Board of Trustees regarding the impacts of securities and regulatory matters on investment companies with portfolios similar to that of the Fund; (vii) advising the Board of Trustees regarding non-investment related management of the Fund's operations; (viii) performing risk management in respect of the Fund; (ix) monitoring the liquidity of the convertible securities market; (x) related administrative matters; and (xi) any other such matters as may be requested from time to time by the Trust's Board of Trustees. The Advisory Agreement also provides that the day-to-day management of the Fund's investment portfolio will be conducted by the Sub-Advisor.

The Advisory Agreement will continue in effect from year to year only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund's outstanding voting securities and by a majority of the Trustees who are not parties to the Advisory Agreement or interested persons of any such party, at a meeting called for the purpose of voting on the Advisory Agreement. The Advisory Agreement is terminable without penalty by the Trust on behalf of the Fund, upon giving the Advisor 60 days' notice when authorized either by a majority vote of the Fund's shareholders or by a vote of a majority of the Board, or by the Advisor on 60 days' written notice, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act). The Advisory Agreement provides that the Advisor shall not be liable for any error of judgment or for any loss suffered by the Trust in connection with the Advisory Agreement, except for a loss resulting from a breach of fiduciary duty, or for a loss resulting from willful misfeasance, bad faith or gross negligence in the performance of its duties, or from reckless disregard by the Advisor of its duties under the Advisory Agreement.

In consideration of the services to be provided by the Advisor pursuant to the Advisory Agreement, the Advisor is entitled to receive from the Fund an investment advisory fee computed daily and paid monthly based on an annual rate equal to a percentage of the Fund's average daily net assets specified in the Prospectus.

The Fund paid the following advisory fees to the Advisor for the periods indicated:

	Advisory Fees Accrued	Advisory Fees (Waived)/Recouped	Advisory Fee Retained
For the fiscal year ended March 31, 2017	\$981,275	\$5,024	\$986,299
For the fiscal year ended March 31, 2016	\$1,143,381	\$(28,491)	\$1,114,890
For the fiscal year ended March 31, 2015	\$1,833,691	\$137,872	\$1,971,563

The Sub-Advisor

SSI Investment Management, Inc. acts as the sole investment sub-advisor to the Fund pursuant to an investment sub-advisory agreement directly with the Trust (the "Sub-Advisory Agreement").

Pursuant to the terms of the Sub-Advisory Agreement, the Sub-Advisor makes all of the investment decisions for the Fund, subject to overall monitoring by the Advisor. The Sub-Advisor is responsible on a day-to-day basis for compliance with the Fund's investment objectives, policies, strategies and restrictions. The Advisor also monitors the Sub-Advisor's adherence to its investment style. The Board of Trustees supervises the Sub-Advisor and establishes policies that it must follow in its management activities.

The Sub-Advisory Agreement will continue in effect from year to year only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund’s outstanding voting securities and by a majority of the Trustees who are not parties to the Sub-Advisory Agreement or interested persons of any such party, at a meeting called for the purpose of voting on the Sub-Advisory Agreement. The Sub-Advisory Agreement is terminable without penalty by the Trust on behalf of the Fund, upon giving the Sub-Advisor 60 days’ notice when authorized either by a majority vote of the Fund’s shareholders or by a vote of a majority of the Board, or by the Sub-Advisor on 60 days’ written notice to the Fund, and will automatically terminate in the event of its “assignment” (as defined in the 1940 Act). The Advisor cannot terminate the Sub-Advisory Agreement. The Sub-Advisory Agreement provides that the Sub-Advisor shall not be liable to the Trust, the Advisor, the Fund, or the Fund’s shareholders for any action or inaction of the Sub-Advisor relating to any event whatsoever in the absence of bad faith, willful misfeasance or gross negligence in the performance of or the reckless disregard of the Sub-Advisor’s duties or obligations thereunder.

In consideration of the services to be provided by the Sub-Advisor to the Fund pursuant to the Sub-Advisory Agreement, the Sub-Advisor is entitled to receive from the Fund an investment advisory fee computed daily and paid monthly based on an annual rate equal to a percentage of the Fund’s average daily net assets specified in the Prospectus.

The Fund paid the following sub-advisory fees to the Sub-Advisor for the periods indicated:

	Sub-Advisory Fees Accrued	Sub-Advisory Fees (Waived)/Recouped	Sub-Advisory Fee Retained
For the fiscal year ended March 31, 2017	\$2,663,815	\$0	\$2,663,815
For the fiscal year ended March 31, 2016	\$3,103,463	\$0	\$3,103,463
For the fiscal year ended March 31, 2015	\$4,975,325	\$0	\$4,975,325

Fund Expenses

The Fund is responsible for its own operating expenses (all of which will be borne directly or indirectly by the Fund’s shareholders), including among others, legal fees and expenses of counsel to the Fund and the Fund’s independent trustees; insurance (including trustees’ and officers’ errors and omissions insurance); auditing and accounting expenses; taxes and governmental fees; listing fees; dues and expenses incurred in connection with membership in investment company organizations; fees and expenses of the Fund’s custodians, administrators, transfer agents, registrars and other service providers; expenses for portfolio pricing services by a pricing agent, if any; expenses in connection with the issuance and offering of shares; expenses relating to investor and public relations; expenses of registering or qualifying securities of the Fund for public sale; brokerage commissions and other costs of acquiring or disposing of any portfolio holding of the Fund; expenses of preparation and distribution of reports, notices and dividends to shareholders; expenses of the dividend reinvestment plan; compensation and expenses of trustees; any litigation expenses; and costs of shareholders’ and other meetings.

The Advisor and Sub-Advisor have contractually agreed to waive their fees and/or pay for operating expenses of the Fund to ensure that the total annual fund operating expenses (excluding, as applicable, any shareholder servicing plan fees, leverage interest, brokerage commissions, dividend and interest expenses on short sales, acquired fund fees and expenses as determined in accordance with Form N-1A, expenses incurred in connection with any merger or reorganization, and extraordinary expenses such as litigation expenses) do not exceed 1.74% and 1.49% of the average daily net assets of the Fund’s Class A shares and Class I shares, respectively. The expense limitation agreement has been structured so that the Advisor will first be required to waive an amount up to its entire management fee (0.35%) before the Sub-Advisor will be required to waive its fee or pay for Fund operating expenses that exceed the amount of the Advisor’s fee. This agreement is effective until July 31, 2018 and is subject thereafter to annual re-approval of the agreement by the Advisor, the Sub-Advisor, and the Trust’s Board of Trustees. This agreement may be terminated before that date only with the consent of the Trust’s Board of Trustees.

Any reduction in advisory fees or payment of the Fund's expenses made by the Advisor or the Sub-Advisor in a fiscal year may be reimbursed by the Fund for a period ending three full fiscal years after the date of reduction or payment if the Advisor or Sub-Advisor so requests. This reimbursement may be requested from the Fund if the reimbursement will not cause the Fund's annual expense ratio to exceed the lesser of (a) the limitation on Fund expenses in effect at the time of the relevant reduction in advisory fees or payment of the Fund's expenses, or (b) the limitation on Fund expenses at the time of the reimbursement. However, the reimbursement amount may not exceed the total amount of fees waived and/or Fund expenses paid by the Advisor or Sub-Advisor and will not include any amounts previously reimbursed to the Advisor or Sub-Advisor by the Fund. Any such reimbursement is contingent upon the Board's subsequent review of the reimbursed amounts. The Fund must pay current ordinary operating expenses before the Advisor or Sub-Advisor is entitled to any reimbursement of fees and/or Fund expenses.

Portfolio Managers

The Portfolio Managers of the Fund are George M. Douglas, Alexander W. Volz and Dagney M. Hollander of the Sub-Advisor.

Other Accounts Managed by Portfolio Managers.

(information as of March 31, 2017)

Portfolio Managers	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts

Compensation of Portfolio Managers. Investment professionals of the Sub-Advisor are compensated through a combination of base salary, an annual performance-based bonus, and stock options. The performance-based bonus is based on the investment professional's individual contribution to the product's performance and success of the firm.

Material Conflicts of Interest. It is possible that conflicts of interest may arise in connection with the portfolio managers' management of the Fund's investments on the one hand and the investments of other accounts or vehicles for which the portfolio managers are responsible on the other. For example, a portfolio manager may have conflicts

of interest in allocating management time, resources and investment opportunities among the Fund and the other accounts or vehicles he advises. In addition, due to differences in the investment strategies or restrictions among the Fund and the other accounts, a portfolio manager may take action with respect to another account that differs from the action taken with respect to the Fund. In some cases, another account managed by a portfolio manager may provide more revenue to the Advisor or Sub-Advisor. While this may appear to create additional conflicts of interest for the portfolio manager in the allocation of management time, resources and investment opportunities, the Advisor strives to ensure that portfolio managers endeavor to exercise their discretion in a manner that is equitable to all interested persons. In this regard, in the absence of specific account-related impediments, it is the policy of the Advisor and Sub-Advisor to allocate investment ideas pro rata to all accounts with the same primary investment objective.

The goal of the Sub-Advisor is to provide high quality investment services to all of its clients, while meeting its fiduciary obligations to treat all clients fairly. The Sub-Advisor has adopted and implemented policies and procedures, including brokerage and trade allocation policies and procedures that it believes address the conflicts associated with managing multiple accounts for multiple clients.

Ownership of the Fund by the Portfolio Managers. The following chart sets forth the dollar range of Fund shares owned by each portfolio manager in the Fund as of March 31, 2017.

Name of Portfolio Manager	Dollar Range of Securities in the Fund (None, \$1-\$10,000, \$10,001-\$50,000, \$50,001-\$100,000, \$100,001 - \$500,000, \$500,001 - \$1,000,000, Over \$1,000,000)
George M. Douglas	\$100,001 - \$500,000
Alexander W. Voltz	\$10,001 - \$50,000
Dagney M. Hollander	\$10,001 - \$50,000

Service Providers

Pursuant to a Co-Administration Agreement (the “Co-Administration Agreement”), UMB Fund Services, Inc. (“UMBFS”), 235 West Galena Street, Milwaukee, Wisconsin 53212, and Mutual Fund Administration, LLC (“MFAC”), 2220 E. Route 66, Suite 226, Glendora, California 91740 (collectively the “Co-Administrators”), act as co-administrators for the Fund. The Co-Administrators provide certain administrative services to the Fund, including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Fund’s independent contractors and agents; preparing for signature by an officer of the Trust of all documents required to be filed for compliance with applicable laws and regulations including those of the securities laws of various states; arranging for the computation of performance data, including net asset value and yield; arranging for the maintenance of books and records of the Fund; and providing, at their own expense, office facilities, equipment and personnel necessary to carry out their duties. In this capacity, the Co-Administrators do not have any responsibility or authority for the management of the Fund, the determination of investment policy, or for any matter pertaining to the distribution of Fund shares. The Co-Administration Agreement provides that neither Co-Administrator shall be liable for any error of judgment or mistake of law or for any loss suffered by the Trust or its series, except for losses resulting from a Co-Administrator’s willful misfeasance, bad faith or negligence in the performance of its duties or from reckless disregard by it of its obligations and duties under the Agreement.

As compensation for their services, the Fund pays the Co-Administrators an administration fee payable monthly at the annual rate set forth below as a percentage of the Fund’s average daily net assets:

Net Assets	Rate
First \$150 million	0.08%
Next \$100 million	0.07%
Thereafter	0.05%

The Fund paid the following co-administration fees for the periods indicated:

	Co-administrator Fees
For the fiscal year ended March 31, 2017	\$212,941
For the fiscal year ended March 31, 2016	\$240,277
For the fiscal year ended March 31, 2015	\$338,090

UMBFS also acts as the Trust’s fund accountant, transfer agent and dividend disbursing agent pursuant to separate agreements.

UMB Bank, n.a. (the “Custodian”), an affiliate of UMBFS, is the custodian of the assets of the Fund pursuant to a custody agreement between the Custodian and the Trust, whereby the Custodian provides services for fees on a transactional basis plus out-of-pocket expenses. The Custodian’s address is 928 Grand Boulevard, 5th Floor, Kansas City, Missouri 64106. The Custodian does not participate in decisions pertaining to the purchase and sale of securities by the Fund.

Tait, Weller & Baker LLP (“Tait Weller”), 1818 Market Street, Suite 2400, Philadelphia, Pennsylvania 19103, is the independent registered public accounting firm for the Fund. Its services include auditing the Fund’s financial statements and the performance of related tax services.

Morgan, Lewis & Bockius LLP (“Morgan Lewis”), 300 South Grand Avenue, 22nd Floor, Los Angeles, California 90071, serves as counsel to the Trust.

Paul Hastings LLP (“Paul Hastings”), 101 California Street, 48th Floor, San Francisco, California 94111, serves as legal counsel to the Independent Trustees.

Distributor and the Distribution Agreement

IMST Distributors, LLC is the distributor (also known as the principal underwriter) of the shares of the Fund and is located at Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor is a registered broker-dealer and is a member of FINRA. The Distributor is not affiliated with the Trust, the Advisor, the Sub-Advisor or any other service provider for the Fund.

Under a Distribution Agreement with the Trust dated January 1, 2013 (the “Distribution Agreement”), the Distributor acts as the agent of the Trust in connection with the continuous offering of shares of the Fund. The Distributor continually distributes shares of the Fund on a best efforts basis. The Distributor has no obligation to sell any specific quantity of Fund shares. The Distributor and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Trust.

The Distributor may enter into agreements with selected broker-dealers, banks or other financial intermediaries for distribution of shares of the Fund. With respect to certain financial intermediaries and related fund “supermarket” platform arrangements, the Fund and/or the Advisor, rather than the Distributor, typically enter into such agreements. These financial intermediaries may charge a fee for their services and may receive shareholder service or other fees from parties other than the Distributor. These financial intermediaries may otherwise act as processing agents and are responsible for promptly transmitting purchase, redemption and other requests to the Fund.

Investors who purchase shares through financial intermediaries will be subject to the procedures of those intermediaries through which they purchase shares, which may include charges, investment minimums, cutoff times and other restrictions in addition to, or different from, those listed herein. Information concerning any charges or services will be provided to customers by the financial intermediary through which they purchase shares. Investors purchasing shares of the Fund through financial intermediaries should acquaint themselves with their financial intermediary's procedures and should read the Prospectus in conjunction with any materials and information provided by their financial intermediary. The financial intermediary, and not its customers, will be the shareholder of record, although customers may have the right to vote shares depending upon their arrangement with the financial intermediary. The Distributor does not receive compensation from the Fund for its distribution services except the distribution/service fees with respect to the shares of those classes for which a Rule 12b-1 distribution plan is effective. The Advisor pays the Distributor a fee for certain distribution-related services.

The Distribution Agreement will continue in effect only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund's outstanding voting securities in accordance with the 1940 Act. The Distribution Agreement is terminable without penalty by the Trust on behalf of the Fund on no less than 60 days' written notice when authorized either by a vote of a majority of the outstanding voting securities of the Fund or by vote of a majority of the members of the Board who are not "interested persons" (as defined in the 1940 Act) of the Trust and have no direct or indirect financial interest in the operation of the Distributor Agreement, or by the Distributor, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act). The Distribution Agreement provides that the Distributor shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Trust in connection with the performance of the Distributor's obligations and duties under the Distribution Agreement, except a loss resulting from the Distributor's willful misfeasance, bad faith or gross negligence in the performance of such duties and obligations, or by reason of its reckless disregard thereof.

The following table shows the aggregate amount of brokerage commissions paid and amounts received by the Distributor:

Period	Amount of Commissions	Amount Received
For the fiscal year ended March 31, 2017	\$0	\$0
For the fiscal year ended March 31, 2016	\$0	\$0
For the fiscal year ended March 31, 2015	\$3,861	\$836

Pursuant to the Distribution Agreement, amounts received by the Distributor are not held for profit by the Distributor, but instead are used to pay for and/or reimburse the Advisor for distribution-related expenditures.

Rule 12b-1 Plan

The Trust, on behalf of the Fund, has adopted a plan pursuant to Rule 12b-1 under the 1940 Act (the "12b-1 Plan") that provides for Fund assets to be used for the payment for distribution services for Class A shares. The 12b-1 Plan provides alternative methods for paying sales charges and may help the Fund grow or maintain asset levels to provide operational efficiencies and economies of scale. The 12b-1 Plan also provides for the payment of service fees in connection with the provision of post-sales shareholder liaison services to holders of Class A shares, as defined in FINRA regulations, including personal services such as responding to customer inquiries, and services related to the maintenance of shareholder accounts. Because 12b-1 fees are paid out of Fund assets attributable to Class A shares on an ongoing basis, they will, over time, increase the cost of an investment and may cost more than other types of sales charges.

The 12b-1 Plan provides that the distribution fees paid by Class A shares of the Fund may be used to pay for any expenses primarily intended to result in the sale of shares of such Class, including, but not limited to: (a) costs of payments, including incentive compensation, made to agents for and consultants to the Distributor or the Trust, including pension administration firms that provide distribution services and broker-dealers that engage in the distribution of the shares of such Class of the Fund; (b) payments made to, and expenses of, persons who provide

support services in connection with the distribution of shares of such Class of the Fund; (c) payments made pursuant to any dealer agreements between the Distributor and certain broker-dealers, financial institutions and other service providers with respect to such Class of the Fund; (d) costs relating to the formulation and implementation of marketing and promotional activities; (e) costs of printing and distributing prospectuses, statements of additional information and reports of the Fund to prospective shareholders of such Class of the Fund; (f) costs involved in preparing, printing and distributing sales literature pertaining to such Class of the Fund; (g) costs involved in obtaining such information, analyses and reports with respect to marketing and promotional activities that the Trust may deem advisable with respect to such Class of the Fund; and (h) reimbursement to the Advisor for expenses advanced on behalf of the Fund or Class with respect to such activities. The 12b-1 Plan is a compensation plan, which means that the Distributor is compensated regardless of its expenses, as opposed to a reimbursement plan which reimburses only for expenses incurred. The Distributor does not retain any 12b-1 fees for profit. All 12b-1 fees are held in a retention account by the Distributor to pay for and/or reimburse the Advisor for distribution related expenditures.

The 12b-1 Plan may not be amended to materially increase the amount to be paid by the Fund's Class A shares for distribution services without the vote of a majority of the outstanding voting securities of such shares. The 12b-1 Plan shall continue in effect indefinitely, provided that such continuance is approved at least annually by a vote of a majority of the Trustees, including the Independent Trustees, cast in person at a meeting called for such purpose or by vote of at least a majority of the outstanding voting securities of the Fund. The 12b-1 Plan may be terminated at any time without penalty by vote of a majority of the Independent Trustees or by vote of the majority of the outstanding voting securities of the Fund's Class A shares.

If the 12b-1 Plan is terminated for the Fund's Class A shares in accordance with its terms, the obligation of the Fund to make payments to the 12b-1 Plan will cease and the Fund will not be required to make any payments past the termination date. Thus, there will be no legal obligation for the Fund to make any payments other than fees already payable under the 12b-1 Plan, if the 12b-1 Plan is terminated in accordance with its terms for any reason.

The following table shows the 12b-1 fees paid pursuant to the 12b-1 Plan for the period indicated:

	12-1 Fees
Class A	
For the fiscal year ended March 31, 2017	\$14,636

Shareholder Service Plan

The Board has adopted, on behalf of the Fund, a Shareholder Service Plan (the "Service Plan") under which the Advisor will provide, or arrange for others to provide, certain specified non-distribution shareholder services. As compensation for the provision of shareholder services, the Fund will pay the Advisor a monthly fee at an annual rate of up to 0.25% of the Fund's average daily net assets. The Advisor will pay certain banks, trust companies, broker-dealers and other financial intermediaries (each, a "Service Organization") out of the fees the Advisor receives from the Fund under the Service Plan to the extent that the Service Organization performs shareholder servicing functions for Fund shares owned by its customers, including but not limited to (a) establishing and maintaining accounts and records relating to customers who invest in the Fund; (b) aggregating and processing orders involving Fund shares; (c) processing dividend and other distribution payments from the Fund on behalf of customers; (d) preparing tax reports or forms on behalf of customers; (e) forwarding communications from the Fund; (f) providing sub-accounting with respect to Fund shares; (g) providing customers with a service that invests the assets of their accounts in Fund shares pursuant to specific or pre-authorized instructions; and (h) providing such other similar services as the Advisor may reasonably request to the extent it or a Service Organization is permitted to do so under applicable statutes, rules or regulations. These payments may be in addition to any amounts the Service Organization may receive as compensation for distribution or shareholder servicing of Class A shares pursuant to the Rule 12b-1 Plan. For the fiscal year ended March 31, 2017, the Fund paid \$187,469 in shareholder servicing fees.

PORTFOLIO TRANSACTIONS AND BROKERAGE

Pursuant to the Sub-Advisory Agreement, the Sub-Advisor determines which securities are to be purchased and sold by the Fund and which broker-dealers are eligible to execute the Fund's portfolio transactions. The purchases and sales of securities in the OTC market will generally be executed by using a broker for the transaction.

Purchases of portfolio securities for the Fund also may be made directly from issuers or from underwriters. Where possible, purchase and sale transactions will be effected through dealers (including banks) that specialize in the types of securities which the Fund will be holding unless better executions are available elsewhere. Dealers and underwriters usually act as principals for their own accounts. Purchases from underwriters will include a concession paid by the issuer to the underwriter and purchases from dealers will include the spread between the bid and the asked price. If the execution and price offered by more than one dealer or underwriter are comparable, the order may be allocated to a dealer or underwriter that has provided research or other services as discussed below.

In placing portfolio transactions, the Sub-Advisor will use reasonable efforts to choose broker-dealers capable of providing the services necessary to obtain the most favorable price and execution available. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the broker-dealer involved, the risk in positioning the block of securities, and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers which furnish or supply research and statistical information to the Sub-Advisor that it may lawfully and appropriately use in its investment advisory capacities, as well as provide other services in addition to execution services. The Sub-Advisor considers such information, which is in addition to and not in lieu of the services required to be performed by it under its Sub-Advisory Agreement with or in respect of the Fund, to be useful in varying degrees, but of indeterminable value.

While it is the Fund's general policy to seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for the Fund, weight is also given to the ability of a broker-dealer to furnish brokerage and research services as defined in Section 28(e) of the Securities Exchange Act of 1934, as amended, to the Fund or to the Sub-Advisor, even if the specific services are not directly useful to the Fund and may be useful to the Sub-Advisor in advising other clients. In negotiating commissions with a broker or evaluating the spread to be paid to a dealer, the Fund may therefore pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Sub-Advisor to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer. The standard of reasonableness is to be measured in light of the Sub-Advisor's overall responsibilities to the Fund.

Investment decisions for the Fund are made independently from those of other client accounts that may be managed or advised by the Sub-Advisor. Nevertheless, it is possible that at times, identical securities will be acceptable for both the Fund and one or more of such client accounts. In such event, the position of the Fund and such client accounts in the same issuer may vary and the holding period may likewise vary. However, to the extent any of these client accounts seek to acquire the same security as the Fund at the same time, the Fund may not be able to acquire as large a position in such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, the Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time as the Sub-Advisor's other client accounts. If one or more of such client accounts simultaneously purchases or sells the same security that the Fund is purchasing or selling, each day's transactions in such security will be allocated between the Fund and all such client accounts in a manner deemed equitable by the Sub-Advisor, taking into account the respective sizes of the accounts, the amount being purchased or sold in relation to Sub-Advisor's target position in that particular security for the Fund and the client accounts, and cash position. It is recognized that in some cases this system could have a detrimental effect on the price or value of the security insofar as the Fund is concerned. In other cases, however, it is believed that the ability of the Fund to participate in volume transactions may produce better executions for the Fund.

The Fund does not effect securities transactions through brokers in accordance with any formula, nor does it effect securities transactions through brokers for selling shares of the Fund. However, broker-dealers who execute brokerage transactions may effect purchase of shares of the Fund for their customers.

The Fund paid the following brokerage commissions for the periods indicated:

	Total Broker Commissions	Soft Dollar*
For the fiscal year ended March 31, 2017	\$123,635	\$120,683
For the fiscal year ended March 31, 2016	\$235,543	\$170,861
For the fiscal year ended March 31, 2015	\$405,911	\$192,108

* These amounts were commissions paid to broker-dealers that provided brokerage and/or research services to the Sub-Advisor. The brokerage commissions dropped due to the reduction in turnover and the NAV of the Fund materially reduced.

Due to a material reduction in assets in comparison to the previous year, the Fund had less turnover and therefore less commissions for the fiscal year ended March 31, 2017.

Holdings of Securities of the Fund's Regular Brokers and Dealers

From time to time, the Fund may acquire and hold securities issued by its “regular brokers or dealers” or the parents of those brokers or dealers. “Regular brokers or dealers” (as such term is defined in the 1940 Act) of the Fund are the ten brokers or dealers that, during the most recent fiscal year, (i) received the greatest dollar amounts of brokerage commissions from the Fund’s portfolio transactions, (ii) engaged as principal in the largest dollar amounts of the portfolio transactions of the Fund, or (iii) sold the largest dollar amounts of the Fund’s shares. The Fund did not hold any securities of any “regular brokers or dealers” during the fiscal year ended March 31, 2017.

PORTFOLIO TURNOVER

Although the Fund generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Sub-Advisor, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (1) the lesser of purchases or sales of portfolio securities for the fiscal year by (2) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in the Fund’s portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year. A high rate of portfolio turnover (100% or more) generally leads to higher transaction costs and may result in a greater number of taxable transactions. To the extent net short-term capital gains are realized, any distributions resulting from such gains will generally be taxed at ordinary income tax rates for federal income tax purposes. The Fund’s portfolio turnover rates for the fiscal years ended March 31, 2017, and March 31, 2016, were 54% and 66%, respectively. The reduction in the portfolio turnover was due to fewer new issues and less sector rotation.

PROXY VOTING POLICY

The Board has adopted Proxy Voting Policies and Procedures (“Trust Policies”) on behalf of the Trust, which delegates the responsibility for voting the Fund’s proxies to the Sub-Advisor, subject to the Board’s continuing oversight. The Trust Policies require that the Sub-Advisor vote proxies received in a manner consistent with the best interests of the Fund. The Trust Policies also require the Sub-Advisor to present to the Board, at least annually, the Sub-Advisor’s Proxy Voting Policies and Procedures (“Sub-Advisor’s Policies”) and a record of each proxy voted by the Sub-Advisor on behalf of the Fund, including a report on the resolution of all proxies identified by the Sub-Advisor as involving a conflict of interest. See Appendix B for the Sub-Advisor’s Policies and the Trust Policies. The Trust Policies and Sub-Advisor’s Policies are intended to serve as a guideline and to further the economic value of

each security held by the Fund. The Trust's CCO will review the Trust Policies and Sub-Advisor Policies annually. Each proxy will be considered individually, taking into account the relevant circumstances at the time of each vote.

If a proxy proposal raises a material conflict between the Sub-Advisor's interests and the Fund's interests, the Sub-Advisor will resolve the conflict by following the Sub-Advisor's policy guidelines or the recommendation of an independent third party.

The Fund is required to annually file Form N-PX, which lists the Fund's complete proxy voting record for the 12-month period ending June 30th each year. Once filed, the Fund's proxy voting record will be available without charge, upon request, by calling toll-free 1-866-933-9033 and on the SEC's web site at www.sec.gov.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). In order to ensure compliance with this law, the Program provides for the development and implementation of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program.

Procedures to implement the Program include, but are not limited to, determining that the Distributor and the Fund's Transfer Agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity, checking shareholder names against designated government lists, including Office of Foreign Assets Control ("OFAC"), and a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

PORTFOLIO HOLDINGS INFORMATION

The Trust has adopted policies and procedures regarding disclosure of portfolio holdings information (the "Disclosure Policy"). The Board of Trustees determined that the adoption of the Disclosure Policy, including the disclosure permitted therein, was in the best interests of the Trust. The Disclosure Policy applies to the Fund, Advisor, Sub-Advisor, and other internal parties involved in the administration, operation or custody of the Fund, including, but not limited to UMBFS, MFAC, the Board of Trustees, counsel to the Trust, Morgan Lewis, counsel to the Independent Trustees, Paul Hastings, and the Fund's independent registered public accounting firm, Tait Weller (collectively, the "Service Providers"). Pursuant to the Disclosure Policy, non-public information concerning the Fund's portfolio holdings may be disclosed to its Service Providers only if such disclosure is consistent with the antifraud provisions of the federal securities laws and the fiduciary duties owed by the Fund and the Advisor to the Fund's shareholders. The Fund and its Service Providers may not receive compensation or any other consideration (which includes any agreement to maintain assets in the Fund or in other investment companies or accounts managed by the Advisor, Sub-Advisor or any affiliated person of the Advisor or Sub-Advisor) in connection with the disclosure of portfolio holdings information of the Fund. The Fund's Disclosure Policy is implemented and overseen by the CCO of the Trust, subject to the oversight of the Board of Trustees. Periodic reports regarding these procedures will be provided to the Trust's Board.

Portfolio holdings information will be deemed public when it has been (1) posted to the Fund's public website at www.palmersquarefunds.com or (2) disclosed in periodic regulatory filings on the SEC's website (www.sec.gov). Management of the Fund may make publicly available its portfolio holdings by making such information available to any person who calls the Fund's toll-free number at 1-888-933-9033 no earlier than five days after the date of such information, (e.g., information as of January 31 may be made available no earlier than February 5). Once available in this manner, such portfolio holdings information will also be deemed to be public.

Non-Public Portfolio Holdings Information Policy. All portfolio holdings information that has not been disseminated in a manner making it available to investors generally as described above is considered non-public portfolio holdings information for the purposes of the Disclosure Policy. Pursuant to the Disclosure Policy, the Fund

or its Service Providers may disclose non-public portfolio holdings information to certain third parties who fall within pre-authorized categories on a daily basis, with no lag time unless otherwise specified below. These third parties include: (i) the Fund's Service Providers and others who need access to such information in the performance of their contractual or other duties and responsibilities to the Fund (e.g., custodians, accountants, the Advisor, Sub-Advisor, administrators, attorneys, officers and Trustees) and who are subject to duties of confidentiality imposed by law or contract, (ii) brokers who execute trades for the Fund, (iii) evaluation service providers (as described below) and (iv) shareholders receiving in-kind redemptions (as described below).

Evaluation Service Providers. These third parties include mutual fund evaluation services, such as Morningstar, Inc. and Lipper, Inc., if the Fund has a legitimate business purpose for disclosing the information, provided that the third party expressly agrees to maintain the non-public portfolio holdings information in confidence and not to trade portfolio securities based on the non-public portfolio holdings information. Subject to the terms and conditions of any agreement between the Fund or its authorized service providers and the third party, if these conditions for disclosure are satisfied, there shall be no restriction on the frequency with which the Fund's non-public portfolio holdings information is released, and no lag period shall apply. In addition, persons who owe a duty of trust or confidence to the Fund or its Service Providers (such as legal counsel) may receive non-public portfolio holdings information without entering into a non-disclosure agreement.

Shareholder In-Kind Distributions. The Fund may, in certain circumstances, pay redemption proceeds to a shareholder by an in-kind distribution of portfolio securities (instead of cash). In such circumstances, pursuant to the Disclosure Policy, Fund shareholders may receive a complete listing of the portfolio holdings of the Fund up to seven calendar days prior to making the redemption request provided that they represent orally or in writing that they agree to maintain the confidentiality of the portfolio holdings information and not to trade portfolio securities based on the non-public holdings information.

Other Entities. Pursuant to the Disclosure Policy, the Fund or the Advisor may disclose non-public portfolio holdings information to a third party who does not fall within the pre-approved categories, and who are not executing broker-dealers; however, prior to the receipt of any non-public portfolio holdings information by such third party, the recipient must have entered into a non-disclosure agreement and the disclosure arrangement must have been approved by the CCO of the Trust. The CCO will report to the Board of Trustees on a quarterly basis regarding any recipients of non-public portfolio holdings information approved pursuant to this paragraph. There are no other ongoing arrangements as of the date of this SAI.

The Advisor, the Sub-Advisor, or their affiliates may provide investment advice to clients other than the Fund that have investment objectives that may be substantially similar to those of the Fund. These clients also may have portfolios consisting of holdings substantially similar to those of the Fund and generally have access to current portfolio holdings information for their accounts. These clients do not owe the Advisor, Sub-Advisor, or the Fund a duty of confidentiality with respect to disclosure of their portfolio holdings.

Current Arrangements Regarding Disclosure of Portfolio Holdings As of the date of this SAI, the Trust or the Fund has ongoing business arrangements with the following entities which involve making portfolio holdings information available to such entities as an incidental part of the services they provide to the Trust: (i) Palmer Square Capital Management LLC (the Advisor), MFAC and UMB (the Co-Administrators) and UMB Bank, N.A. (the Custodian) pursuant to investment management, administration and custody agreements, respectively, under which the Fund's portfolio holdings information is provided daily on a real-time basis (i.e. with no lag time); (ii) Tait Weller (independent registered public accounting firm), Morgan Lewis and Paul Hastings (attorneys) and other professionals engaged by the Trust to whom the Trust provides portfolio holdings information on a regular basis with varying lag times after the date of the information; (iii) RiskMetrics and Broadridge (ProxyEdge) pursuant to proxy voting agreements under which the Fund's portfolio holdings information is provided daily or as needed to vote proxies; and (iv) Morningstar, Inc., Lipper Inc., Thomson Financial, Vickers Stock Research Corporation, and Bloomberg L.P., to which the Fund's portfolio holdings information is provided quarterly after the end of the previous fiscal quarter, with a 60-day time lag and no earlier than the date such information is filed on the SEC's EDGAR system on Form N-Q (for the first and third fiscal quarters) or the Annual or Semi-Annual Report is mailed to shareholders (for the second and fourth fiscal quarters), as applicable.

DETERMINATION OF NET ASSET VALUE

The net asset values per share (the “NAVs”) of the Fund’s shares will fluctuate and are determined as of 4:00 p.m. Eastern Time, the normal close of regular trading on the New York Stock Exchange (the “NYSE”) on each day the NYSE is open for trading. The NAVs may be calculated earlier if trading on the NYSE is restricted or if permitted by the SEC. The NYSE annually announces the days on which it will not be open for trading. The most recent announcement indicates that the NYSE will not be open for the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. However, the NYSE may close on days not included in that announcement.

The NAV of each class is computed by dividing the value of the securities held by the Fund plus any cash or other assets (including interest and dividends accrued but not yet received) attributable to the class minus all liabilities (including accrued expenses) by the total number of shares in the class outstanding at such time.

$$\frac{\text{Net Assets}}{\text{Shares Outstanding}} = \text{NAV}$$

An example of how the Fund calculated its NAVs as of March 31, 2017 is as follows:

Class A

$$\frac{\$4,639,463}{468,639} = \$9.90$$

Class I

$$\frac{\$295,950,357}{29,890,728} = \$9.90$$

Generally, the Fund’s investments are valued at market value or, in the absence of a market value, at fair value as determined in good faith by the Sub-Advisor and the Trust’s Valuation Committee pursuant to procedures approved by or under the direction of the Board. Pursuant to those procedures, the Board considers, among other things: 1) the last sale price on the securities exchange, if any, on which a security is primarily traded; 2) the mean between the bid and ask prices; 3) price quotations from an approved pricing service (which use information provided by market makers or estimates of market value based on similar securities), and 4) other factors as necessary to determine a fair value under certain circumstances.

The Fund’s securities which are traded on securities exchanges are valued at the last sale price on the exchange on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any reported sales, at the mean between the last available bid and ask prices.

Securities that are traded on more than one exchange are valued on the exchange determined by the Sub-Advisor to be the primary market. Securities primarily traded in the National Association of Securities Dealers Automated Quotation (“NASDAQ”), National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price (“NOCP”). If the NOCP is not available, such securities shall be valued at the last sale price on the day of valuation, or if there has not been any sale on such day, at the mean between the bid and ask prices. OTC securities which are not traded in the NASDAQ National Market System are valued at the most recent trade price.

Stocks that are “thinly traded” or events occurring when a foreign market is closed but the NYSE is open (for example, the value of a security held by the Fund has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded) may create a situation where a market quote would not be readily available. When a market quote is not readily available, the security’s value is based on “fair value” as determined by procedures adopted by the Board. The Board will periodically review the reliability of the Fund’s fair

value methodology. The Fund may hold portfolio securities, such as those traded on foreign securities exchanges that trade on weekends or other days when the Fund's shares are not priced. Therefore, the value of the Fund's shares may change on days when shareholders will not be able to purchase or redeem shares.

Short-term debt obligations with remaining maturities in excess of 60 days are valued at current market prices, as discussed above. Short-term securities with 60 days or less remaining to maturity are, unless conditions indicate otherwise, amortized to maturity based on their cost to the Fund if acquired within 60 days of maturity or, if already held by the Fund on the 60th day, based on the value determined on the 61st day.

All other assets of the Fund are valued in such manner as the Board in good faith deems appropriate to reflect as their fair value.

PURCHASE AND REDEMPTION OF FUND SHARES

Detailed information on the purchase and redemption of shares is included in the Fund's Prospectus. Shares of the Fund are sold at the next offering price calculated after receipt of an order for purchase. In order to purchase shares of the Fund, you must invest the initial minimum investment for the relevant class of shares. However, the Fund reserves the right, in its sole discretion, to waive the minimum initial investment amount for certain investors, or to waive or reduce the minimum initial investment for 401(k) plans or other tax-deferred retirement plans. You may purchase shares on any day that the NYSE is open for business by placing orders with the Fund.

The Fund reserves the right to refuse any purchase requests, particularly those that would not be in the best interests of the Fund or its shareholders and could adversely affect the Fund or its operations. This includes those from any individual or group who, in the Fund's view, is likely to engage in or has a history of excessive trading (usually defined as more than four round-trip transactions out of the Fund within a calendar year). Furthermore, the Fund may suspend the right to redeem its shares or postpone the date of payment upon redemption for more than seven calendar days (i) for any period during which the NYSE is closed (other than customary weekend or holiday closings) or trading on the NYSE is restricted; (ii) for any period during which an emergency exists affecting the sale of the Fund's securities or making such sale or the fair determination of the value of the Fund's net assets not reasonably practicable; or (iii) for such other periods as the SEC may permit for the protection of the Fund's shareholders. In addition, if shares are purchased using a check and a redemption is requested before the check has cleared, the Fund may postpone payment of the redemption proceeds up to 15 days while the Fund waits for the check to clear.

Redemptions In Kind

The Trust has filed an election under SEC Rule 18f-1 committing to pay in cash all redemptions by a shareholder of record up to amounts specified by the rule (the lesser of (i) \$250,000 or (ii) 1% of the Fund's assets). The Fund has reserved the right to pay the redemption price of its shares in excess of the amounts specified by the rule, either totally or partially, by an in-kind distribution of portfolio securities (instead of cash). The securities so distributed would be valued at the same amounts as those assigned to them in calculating the NAV for the Fund shares being redeemed. If a shareholder receives an in-kind distribution, the shareholder could incur brokerage or other charges in converting the securities to cash.

The Fund does not intend to hold any significant percentage of its portfolio in illiquid securities, although the Fund, like virtually all mutual funds, may from time to time hold a small percentage of securities that are illiquid. In the unlikely event the Fund were to elect to make an in-kind redemption, the Fund expects that it would follow the normal protocol of making such distribution by way of a pro rata distribution based on its entire portfolio. If the Fund held illiquid securities, such distribution may contain a pro rata portion of such illiquid securities or the Fund may determine, based on a materiality assessment, not to include illiquid securities in the in-kind redemption. The Fund does not anticipate that it would ever selectively distribute a greater than pro rata portion of any illiquid securities to satisfy a redemption request. If such securities are included in the distribution, shareholders may not be able to liquidate such securities and may be required to hold such securities indefinitely. Shareholders' ability to liquidate such securities distributed in-kind may be restricted by resale limitations or substantial restrictions on transfer imposed by the issuers of the securities or by law. Shareholders may only be able to liquidate such securities

distributed in-kind at a substantial discount from their value, and there may be higher brokerage costs associated with any subsequent disposition of these securities by the recipient.

FEDERAL INCOME TAX MATTERS

The following is a summary of certain material U.S. federal (and, where noted, state and local) income tax considerations affecting the Fund and its shareholders. The discussion is very general. Current and prospective shareholders are therefore urged to consult their own tax advisors with respect to the specific federal, state, local and foreign tax consequences of investing in the Fund. The summary is based on the laws in effect on the date of this SAI and existing judicial and administrative interpretations thereof, all of which are subject to change, possibly with retroactive effect.

The Fund is treated as a separate entity from other series of the Trust for federal income tax purposes. The Fund has elected to be and intends to qualify each year for treatment as a “regulated investment company” under Subchapter M of the Code by complying with all applicable requirements of the Code, including, among other things, requirements as to the sources of the Fund’s income, diversification of the Fund’s assets and timing of Fund distributions. To so qualify, the Fund must, among other things: (a) derive at least 90% of its gross income in each taxable year from dividends, interest, payments with respect to certain securities loans, and gains from the sale or other disposition of stock or securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities or currencies, and net income derived from interests in “qualified publicly traded partnerships” (i.e., partnerships that are traded on an established securities market or tradable on a secondary market, other than partnerships that derive 90% of their income from interest, dividends, capital gains, and other traditionally permitted mutual fund income); (b) diversify its holdings so that, at the end of each quarter of the Fund’s taxable year, (i) at least 50% of the market value of the Fund’s assets is represented by cash, securities of other regulated investment companies, U.S. government securities and other securities, with such other securities limited, in respect of any one issuer, to an amount not greater than 5% of the Fund’s assets and not greater than 10% of the outstanding voting securities of such issuer and (ii) not more than 25% of the value of its assets is invested in the securities (other than U.S. government securities or securities of other regulated investment companies) of any one issuer, in the securities (other than the securities of other regulated investment companies) of any two or more issuers that the Fund controls and that are determined to be engaged in the same or similar trades or businesses or related trades or businesses, or in the securities of one or more “qualified publicly traded partnerships,” and (c) distribute an amount equal to the sum of at least 90% of its investment company taxable income (computed without regard to the dividends-paid deduction) and 90% of its net tax-exempt income, if any, for the tax year (including, for purposes of satisfying this distribution requirement, certain distributions made by the Fund after the close of its taxable year that are treated as made during such taxable year).

As a regulated investment company, the Fund will not be subject to U.S. federal income tax on the portion of its taxable investment income and capital gains that it distributes to its shareholders provided that it satisfies a minimum distribution requirement. The Fund’s policy is to distribute to its shareholders all investment company taxable income (determined without regard to the deduction for dividends paid) and any net capital gains for each fiscal year in a manner that complies with the distribution requirements of the Code, so that the Fund will not be subject to any federal income or excise taxes. In order to also avoid liability for a non-deductible federal excise tax, the Fund must distribute (or be deemed to have distributed) by December 31 of each calendar year at least the sum of (i) 98% of its ordinary income for such year, (ii) 98.2% of the excess of its realized capital gains over its realized capital losses for the 12-month period generally ending on October 31 during such year and (iii) any amounts from the prior calendar year that were not distributed and on which the Fund paid no federal income tax. The Fund will be subject to income tax at regular corporate tax rates on any taxable income or gains that it does not distribute to its shareholders. The Fund's policy is to distribute to its shareholders all investment company taxable income (determined without regard to the deduction for dividends paid) and any net capital gain (the excess of net long-term capital gain over net short-term capital loss) for each fiscal year in a manner that complies with the distribution requirements of the Code, so that the Fund will not be subject to any federal income or excise taxes.

If, for any taxable year, the Fund were to fail to qualify as a regulated investment company or were to fail to meet certain minimum distribution requirements under the Code, it would be taxed in the same manner as an ordinary corporation and distributions to its shareholders would not be deductible by the Fund in computing its taxable

income. In addition, in the event of a failure to qualify, the Fund's distributions, to the extent derived from the Fund's current or accumulated earnings and profits, including any distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss), would be taxable to shareholders as ordinary dividend income for federal income tax purposes. However, such dividends would be eligible, subject to any generally applicable limitations, (i) to be treated as qualified dividend income in the case of shareholders taxed as individuals and (ii) for the dividends received deduction in the case of corporate shareholders. Moreover, if the Fund were to fail to qualify as a regulated investment company in any year, it would be required to pay out its earnings and profits accumulated in that year in order to qualify again as a regulated investment company. Under certain circumstances, the Fund may be able to cure a failure to qualify as a regulated investment company, but in order to do so the Fund might incur significant Fund-level taxes and might be forced to dispose of certain assets. If the Fund failed to qualify as a regulated investment company for a period greater than two taxable years, the Fund would generally be required to recognize any net built-in gains with respect to certain of its assets upon a disposition of such assets within ten years of qualifying as a regulated investment company in a subsequent year.

Shareholders generally will be subject to federal income taxes on distributions made by the Fund whether paid in cash or additional shares. Distributions of net investment income (including interest, dividend income and net short-term capital gain in excess of any net long-term capital loss, less certain expenses), other than qualified dividend income, will be taxable to shareholders as ordinary income. Distributions of qualified dividend income generally will be taxed to non-corporate shareholders at the federal income tax rates applicable to net capital gain, provided the Fund reports the amount distributed as qualified dividend income.

In general, dividends may be reported by the Fund as qualified dividend income if they are attributable to qualified dividend income received by the Fund. Qualified dividend income generally means dividend income received from the Fund's investments in common and preferred stock of U.S. companies and stock of certain qualified foreign corporations, provided that certain holding period and other requirements are met by both the Fund and its shareholders. If 95% or more of the Fund's gross income (calculated without taking into account net capital gain derived from sales or other dispositions of stock or securities) consists of qualified dividend income, the Fund may report all distributions of such income as qualified dividend income.

A foreign corporation is treated as a qualified foreign corporation for this purpose if it is incorporated in a possession of the United States or it is eligible for the benefits of certain income tax treaties with the United States and meets certain additional requirements. Certain foreign corporations that are not otherwise qualified foreign corporations will be treated as qualified foreign corporations with respect to dividends paid by them if the stock with respect to which the dividends are paid is readily tradable on an established securities market in the United States. Passive foreign investment companies are not qualified foreign corporations for this purpose.

Dividends paid by the Fund may qualify in part for the dividends received deduction available to corporate shareholders, provided the Fund reports the amount distributed as a qualifying dividend and certain holding period and other requirements under the Code are satisfied. The reported amount, however, cannot exceed the aggregate amount of qualifying dividends received by the Fund for its taxable year. Eligibility for qualified dividend income treatment and the dividends received deduction may be reduced or eliminated if, among other things, (i) the shareholder is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property or (ii) certain holding period requirements are not satisfied at both the Fund and shareholder levels. In addition, qualified dividend income treatment is not available if a shareholder elects to have the dividend income treated as investment income for purposes of the limitation on deductibility of investment interest.

Distributions of net capital gain, if any, that the Fund reports as capital gain dividends will be taxable to non-corporate shareholders as long-term capital gain without regard to how long a shareholder has held shares of the Fund. The Fund may retain certain amounts of capital gains and designate them as undistributed net capital gain in a notice to its shareholders, who (i) will be required to include in income for U.S. federal income tax purposes, as long-term capital gain, their proportionate shares of the undistributed amounts so designated, (ii) will be entitled to credit their proportionate shares of the income tax paid by the Fund on those undistributed amounts against their federal income tax liabilities and to claim refunds to the extent such credits exceed their liabilities and (iii) will be entitled to

increase their federal income tax basis in their shares by an amount equal to the excess of the amounts of undistributed net capital gain included in their respective income over their respective income tax credits.

Distributions in excess of earnings and profits will, as to each shareholder, be treated as a tax-free return of capital to the extent of the shareholder's basis in his or her Fund shares. A distribution treated as a return of capital will reduce the shareholder's basis in his or her shares, which will result in an increase in the amount of gain (or a decrease in the amount of loss) that will be recognized by the shareholder for tax purposes on a later sale of such shares. After the shareholder's basis is reduced to zero, any distributions in excess of earnings and profits will be treated as a capital gain, assuming the shareholder holds his or her shares as capital assets.

A 3.8% Medicare contribution tax generally applies to all or a portion of the net investment income of a shareholder who is an individual and not a nonresident alien for federal income tax purposes and who has adjusted gross income (subject to certain adjustments) that exceeds a threshold amount (\$250,000 if married filing jointly or if considered a "surviving spouse" for federal income tax purposes, \$125,000 if married filing separately, and \$200,000 in other cases). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts. For these purposes, interest, dividends and certain capital gains (among other categories of income) are generally taken into account in computing a shareholder's net investment income.

Distributions are generally taxable when received. However, distributions declared in October, November or December to shareholders of record on a date in such a month and paid the following January are taxable for federal income tax purposes as if received on December 31 of the calendar year in which declared. Distributions are includable in alternative minimum taxable income in computing a shareholder's liability for the federal alternative minimum tax. In addition, certain distributions made after the close of a taxable year of the Fund may be "spilled back" and treated for certain purposes as paid by the Fund during such taxable year. In such case, shareholders generally will be treated as having received such dividends in the taxable year in which the distributions were actually made. For purposes of calculating the amount of a regulated investment company's undistributed income and gain subject to the 4% excise tax described above, such "spilled back" dividends are treated as paid by the regulated investment company when they are actually paid.

A redemption of Fund shares may result in recognition of a taxable gain or loss. The gain or loss will generally be treated as a long-term capital gain or loss if the shares are held for more than one year and as a short-term capital gain or loss if the shares are held for one year or less. Any loss realized upon redemption or exchange of shares held for six months or less will be treated as a long-term capital loss to the extent of any amounts treated as distributions of long-term capital gains during such six-month period. Any loss realized upon a redemption may be disallowed under certain wash sale rules to the extent shares of the Fund or substantially identical stock or securities are purchased (through reinvestment of distributions or otherwise) within 30 days before or after the redemption.

If a shareholder recognizes a loss with respect to the Fund's shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder (or certain greater amounts over a combination of years), the shareholder must file with the Internal Revenue Service (the "IRS") a disclosure statement on IRS Form 8886. Direct shareholders of portfolio securities are in many cases exempted from this reporting requirement, but under current guidance, shareholders of a regulated investment company are not exempted. The fact that a loss is so reportable does not affect the legal determination of whether the taxpayer's treatment of the loss is proper.

The Fund's transactions in options and other similar transactions, such as futures, may be subject to special provisions of the Code that, among other things, affect the character of any income realized by the Fund from such investments, accelerate recognition of income to the Fund, defer Fund losses, affect the holding period of the Fund's securities, affect whether distributions will be eligible for the dividends received deduction or be treated as qualified dividend income and affect the determination of whether capital gain and loss is characterized as long-term or short-term capital gain or loss. These rules could therefore affect the character, amount and timing of distributions to shareholders. These provisions may also require the Fund to "mark-to-market" certain types of the positions in its portfolio (i.e., treat them as if they were closed out), which may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the distribution requirements for avoiding U.S. federal income and excise taxes. The Fund will monitor these transactions and will make the appropriate entries in its books and records, and if the Fund deems it advisable, will make appropriate elections if available in order to mitigate

the effect of these rules, prevent disqualification of the Fund as a regulated investment company and minimize the imposition of U.S. federal income and excise taxes.

The Fund's transactions in broad based equity index futures contracts, exchange-traded options on such indices and certain other futures contracts are generally considered "Section 1256 contracts" for federal income tax purposes. Any unrealized gains or losses on such Section 1256 contracts are treated as though they were realized at the end of each taxable year. The resulting gain or loss is treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss. Gain or loss recognized on actual sales of Section 1256 contracts is treated in the same manner. As noted above, distributions of net short-term capital gain are taxable to shareholders as ordinary income while distributions of net long-term capital gain are taxable to shareholders as long-term capital gain, regardless of how long the shareholder has held shares of the Fund.

The Fund's entry into a short sale transaction, an option or certain other contracts, such as futures, could be treated as the constructive sale of an appreciated financial position, causing the Fund to realize gain, but not loss, on the position.

If the Fund invests in certain pay-in-kind securities, zero coupon securities, deferred interest securities or, in general, any other securities with original issue discount (or with market discount if the Fund elects to include market discount in income currently), the Fund must accrue income on such investments for each taxable year, which generally will be prior to the receipt of the corresponding cash payments. However, the Fund must distribute, at least annually, all or substantially all of its investment company taxable income (determined without regard to the deduction for dividends paid), including such accrued income to shareholders to avoid federal income and excise taxes. Therefore, the Fund may have to sell portfolio securities (potentially under disadvantageous circumstances) to generate cash, or may have to undertake leverage by borrowing cash, to satisfy these distribution requirements. Dispositions of portfolio securities may result in additional gains and additional distribution requirements.

If the Fund invests in a market discount bond, it will be required to treat any gain recognized on the disposition of such market discount bond as ordinary income (instead of capital gain) to the extent of the accrued market discount, unless the Fund elects to include the market discount in income as it accrues as discussed above. A market discount bond is a security acquired in the secondary market at a price below its redemption value (or its adjusted issue price if it is also an original issue discount bond).

The Fund may be subject to withholding and other taxes imposed by foreign countries, including taxes on interest, dividends and capital gains with respect to its investments in those countries, which would, if imposed, reduce the yield on or return from those investments. Tax treaties between certain countries and the United States may reduce or eliminate such taxes in some cases. So long as the Fund qualifies for treatment as a regulated investment company and incurs "qualified foreign taxes," if more than 50% of its net assets at the close of its taxable year consist of stock or securities of foreign corporations, the Fund may elect to "pass through" to its shareholders the amount of such foreign taxes paid. If this election is made, information with respect to the amount of the foreign income taxes that are allocated to the Fund's shareholders will be provided to them and any shareholder subject to tax on dividends will be required (i) to include in ordinary gross income (in addition to the amount of the taxable dividends actually received) his/her proportionate share of the foreign taxes paid that are attributable to such dividends; and (ii) either to deduct his/her proportionate share of such foreign taxes in computing his/her taxable income or to claim that amount as a foreign tax credit (subject to applicable limitations) against U.S. income taxes.

Shareholders who do not itemize deductions for U.S. federal income tax purposes will not be able to deduct their pro rata portion of qualified foreign taxes paid by the Fund, although such shareholders will be required to include their shares of such taxes in gross income if the Fund makes the election described above. Qualified foreign taxes generally include taxes that would be treated as income taxes under U.S. tax regulations but do not include most other taxes, such as stamp taxes, securities transaction taxes, and similar taxes. No deduction for such taxes will be permitted to individuals in computing their alternative minimum tax liability.

If the Fund makes the election to pass through qualified foreign taxes and a shareholder chooses to take a credit for the foreign taxes deemed paid by such shareholder, the amount of the credit that may be claimed in any year may not exceed the same proportion of the U.S. tax against which such credit is taken that the shareholder's taxable

income from foreign sources (but not in excess of the shareholder's entire taxable income) bears to his entire taxable income. For this purpose, long-term and short-term capital gains the Fund realizes and distributes to shareholders will generally not be treated as income from foreign sources in their hands, nor will distributions of certain foreign currency gains subject to Section 988 of the Code or of any other income realized by the Fund that is deemed, under the Code, to be U.S.-source income in the hands of the Fund. This foreign tax credit limitation may also be applied separately to certain specific categories of foreign-source income and the related foreign taxes. As a result of these rules, which may have different effects depending upon each shareholder's particular tax situation, certain shareholders may not be able to claim a credit for the full amount of their proportionate share of the foreign taxes paid by the Fund. Shareholders who are not liable for U.S. federal income taxes, including tax-exempt shareholders, will ordinarily not benefit from this election. If the Fund does make the election, it will provide required tax information to shareholders. The Fund generally may deduct any foreign taxes that are not passed through to its shareholders in computing its income available for distribution to shareholders to satisfy applicable tax distribution requirements.

Foreign exchange gains or losses realized by the Fund in connection with certain transactions involving foreign currency-denominated debt securities, certain options and futures contracts relating to foreign currency, foreign currency forward contracts, foreign currencies, or payables or receivables denominated in a foreign currency are subject to Section 988 of the Code, which generally causes such gains or losses to be treated as ordinary gain or loss and may affect the amount, timing and character of distributions to shareholders.

The Fund may purchase the securities of certain foreign companies called passive foreign investment companies ("PFICs"). PFICs may be the only or primary means by which the Fund may invest in some countries. If the Fund invests in PFICs, it may be subject to U.S. federal income tax on a portion of any "excess distribution" or gain from the disposition of such shares even if such income is distributed as a taxable dividend to shareholders. In addition to bearing their proportionate share of the Fund's expenses, shareholders will also indirectly bear similar expenses of PFICs in which the Fund has invested. Additional charges in the nature of interest may be imposed on either the Fund or shareholders with respect to deferred taxes arising from such distributions or gains. Capital gains on the sale of such holdings will be deemed to be ordinary income regardless of how long such PFICs are held. A "qualified electing fund" election or a "mark to market" election may generally be available that would ameliorate these adverse tax consequences, but such elections could require the Fund to recognize taxable income or gain (subject to the distribution requirements applicable to regulated investment companies, as described above) without the concurrent receipt of cash. In order to satisfy the distribution requirements and avoid a tax on the Fund, the Fund may be required to liquidate portfolio securities that it might otherwise have continued to hold, potentially resulting in additional taxable gain or loss to the Fund. In order for the Fund to make a qualified electing fund election with respect to a PFIC, the PFIC would have to agree to provide certain tax information to the Fund on an annual basis, which it might not agree to do. The Fund may limit and/or manage its holdings in PFICs to limit its tax liability or maximize its return from these investments.

The Fund is required to withhold (as "backup withholding") a portion of reportable payments, including dividends, capital gain distributions and the proceeds of redemptions and exchanges or repurchases of Fund shares, paid to shareholders who have not complied with certain IRS regulations. The backup withholding rate is 28%. In order to avoid this withholding requirement, shareholders, other than certain exempt entities, must certify on IRS Forms W-9 or on certain other documents, that the Social Security Numbers or other Taxpayer Identification Numbers they provide are their correct numbers and that they are not currently subject to backup withholding, or that they are exempt from backup withholding. The Fund may nevertheless be required to backup withhold if it receives notice from the IRS or a broker that a number provided is incorrect or that backup withholding is applicable as a result of previous underreporting of interest or dividend income.

Ordinary dividends and certain other payments made by the Fund to non-U.S. shareholders are generally subject to withholding tax at a 30% rate (or a lower rate as may be determined in accordance with any applicable treaty). In order to obtain a reduced rate of withholding, a non-U.S. shareholder will be required to provide an IRS Form W-8BEN or similar form certifying its entitlement to benefits under a treaty. The withholding tax does not apply to regular dividends paid to a non-U.S. shareholder who provides an IRS Form W-8ECI, certifying that the dividends are effectively connected with the non-U.S. shareholder's conduct of a trade or business within the United States. Instead, the effectively connected dividends will be subject to regular U.S. income tax as if the non-U.S.

shareholder were a U.S. shareholder. A non-U.S. corporation receiving effectively connected dividends may also be subject to additional “branch profits tax” imposed at a rate of 30% (or a lower treaty rate).

The 30% withholding tax described in the preceding paragraph generally will not apply to distributions of net capital gain, to redemption proceeds, or to dividends that the Fund reports as (a) interest-related dividends, to the extent such dividends are derived from the Fund’s “qualified net interest income,” or (b) short-term capital gain dividends, to the extent such dividends are derived from the Fund’s “qualified short-term gain.” “Qualified net interest income” is the Fund’s net income derived from U.S.-source interest and original issue discount, subject to certain exceptions and limitations. “Qualified short-term gain” generally means the excess of the net short-term capital gain of the Fund for the taxable year over its net long-term capital loss, if any. In order to qualify for an exemption from withholding, a non-U.S. shareholder will need to comply with applicable certification requirements relating to its non-U.S. status (including, in general, furnishing an IRS Form W-8BEN or other applicable form). Backup withholding will not be applied to payments that are subject to this 30% withholding tax.

Unless certain non-U.S. entities that hold Fund shares comply with IRS requirements that will generally require them to report information regarding U.S. persons investing in, or holding accounts with, such entities, a 30% withholding tax may apply to the Fund’s distributions and, after December 31, 2018, to redemptions and certain capital gain dividends payable to such entities. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the United States and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of such agreement.

This discussion and the related discussion in the Prospectus have been prepared by management of the Fund, and counsel to the Trust has expressed no opinion in respect thereof.

Shareholders and prospective shareholders of the Fund should consult their own tax advisors concerning the effect of owning shares of the Fund in light of their particular tax situations.

DIVIDENDS AND DISTRIBUTIONS

The Fund will receive income in the form of dividends and interest earned on its investments in securities. This income, less the expenses incurred in its operations, is the Fund’s net investment income, substantially all of which will be declared as dividends to the Fund’s shareholders.

The amount of income dividend payments by the Fund is dependent upon the amount of net investment income received by the Fund from its portfolio holdings, is not guaranteed and is subject to the discretion of the Board. The Fund does not pay “interest” or guarantee any fixed rate of return on an investment in its shares.

The Fund also may derive capital gains or losses in connection with sales or other dispositions of its portfolio securities. Any net gain the Fund may realize from transactions involving investments held for less than the period required for long-term capital gain or loss recognition or otherwise producing short-term capital gains and losses (taking into account any available carryover of capital losses), although a distribution from capital gains, will be distributed to shareholders with and as a part of the income dividends paid by the Fund and will be taxable to shareholders as ordinary income for federal income tax purposes. If during any year the Fund realizes a net gain on transactions involving investments held for more than the period required for long-term capital gain or loss recognition or otherwise producing long-term capital gains and losses, the Fund will have a net long-term capital gain. After deduction of the amount of any net short-term capital loss, the balance (to the extent not offset by any capital losses available to be carried over) generally will be distributed and treated as long-term capital gains in the hands of the shareholders regardless of the length of time the Fund’s shares may have been held by the shareholders. For more information concerning applicable capital gains tax rates, see your tax advisor.

Any dividend or distribution paid by the Fund reduces the Fund’s NAV on the date paid by the amount of the dividend or distribution per share. Accordingly, a dividend or distribution paid shortly after a purchase of shares by a shareholder will generally be taxable, even if it effectively represents a partial return of the shareholder’s capital.

Dividends and other distributions will be made in the form of additional shares of the Fund unless the shareholder has otherwise indicated. Investors have the right to change their elections with respect to the reinvestment of dividends and distributions by notifying the Transfer Agent in writing, but any such change will be effective only as to dividends and other distributions for which the record date is seven or more business days after the Transfer Agent has received the written request.

The Fund's investments in partnerships, if any, including in qualified publicly traded partnerships, may result in that Fund being subject to state, local or foreign income, franchise or withholding tax liabilities.

GENERAL INFORMATION

Investment Managers Series Trust is an open-end management investment company organized as a Delaware statutory trust under the laws of the State of Delaware on February 15, 2005. The Trust has a number of outstanding series of shares of beneficial interest, each of which represents interests in a separate portfolio of securities.

The Trust's Declaration of Trust permits the Trustees to create additional series of shares to issue an unlimited number of full and fractional shares of beneficial interest of each series, including the Fund, and to divide or combine the shares of any series into a greater or lesser number of shares without thereby changing the proportionate beneficial interest in the series. The assets belonging to a series is charged with the liabilities in respect of that series and all expenses, costs, charges and reserves attributable to that series only. Therefore, any creditor of any series may look only to the assets belonging to that series to satisfy the creditor's debt. Any general liabilities, expenses, costs, charges or reserves of the Trust which are not readily identifiable as pertaining to any particular series are allocated and charged by the Trustees to and among the existing series in the sole discretion of the Trustees. Each share of the Fund represents an interest in the Fund proportionately equal to the interest of each other share. Upon the Fund's liquidation, all shareholders would share pro rata in the net assets of the Fund available for distribution to shareholders.

The Trust may offer more than one class of shares of any series. Each share of a series or class represents an equal proportionate interest in that series or class with each other share of that series or class. With respect to the Fund, the Trust may offer more than one class of shares. The Trust has reserved the right to create and issue additional series or classes. Each share of a series or class represents an equal proportionate interest in that series or class with each other share of that series or class.

The shares of each series or class participate equally in the earnings, dividends and assets of the particular series or class. Expenses of the Trust, which are not attributable to a specific series or class, are allocated among all the series in a manner believed by management of the Trust to be fair and equitable. Shares issued do not have preemptive or conversion rights. Shares when issued are fully paid and non-assessable, except as set forth below. Shareholders are entitled to one vote for each share held. Shares of each series or class generally vote together, except when required under federal securities laws to vote separately on matters that only affect a particular series or class, such as the approval of distribution plans for a particular class.

The Trust is not required to hold annual meetings of shareholders but will hold special meetings of shareholders of a series or class when, in the judgment of the Board, it is necessary or desirable to submit matters for a shareholder vote. Shareholders have, under certain circumstances, the right to communicate with other shareholders in connection with requesting a meeting of shareholders for the purpose of removing one or more Trustees. Shareholders also have, in certain circumstances, the right to remove one or more Trustees without a meeting. No material amendment may be made to the Trust's Declaration of Trust without the affirmative vote of the holders of a majority of the outstanding shares of each portfolio affected by the amendment.

The Trust's Declaration of Trust provides that, at any meeting of shareholders of the Trust or of any series or class, a shareholder servicing agent may vote any shares as to which such shareholder servicing agent is the agent of record for shareholders who are not represented in person or by proxy at the meeting, proportionately in accordance with the votes cast by holders of all shares of that portfolio otherwise represented at the meeting in person or by proxy as to which such shareholder servicing agent is the agent of record. Any shares so voted by a shareholder servicing agent will be deemed represented at the meeting for purposes of quorum requirements. Any series or class

may be terminated (i) upon the merger or consolidation with, or the sale or disposition of all or substantially all of its assets to, another entity, if approved by the vote of the holders of two-thirds of its outstanding shares, except that if the Board recommends such merger, consolidation or sale or disposition of assets, the approval by vote of the holders of a majority of the series' or class' outstanding shares will be sufficient, or (ii) by the vote of the holders of a majority of its outstanding shares, or (iii) by the Board by written notice to the series' or class' shareholders. Unless each series and class is so terminated, the Trust will continue indefinitely.

Shareholders may send communications to the Board of Trustees. Shareholders should send communications intended for the Board by addressing the communications to the Board, in care of the Secretary of the Trust and sending the communication to 2220 E. Route 66, Suite 226, Glendora, California 91740. A shareholder communication must (i) be in writing and be signed by the shareholder, (ii) provide contact information for the shareholder, (iii) identify the Fund to which it relates, and (iv) identify the class and number of shares held by the shareholder. The Secretary of the Trust may, in good faith, determine that a shareholder communication should not be provided to the Board because it does not reasonably relate to the Trust or its operations, management, activities, policies, service providers, Board, officers, shareholders or other matters relating to an investment in the Fund or is otherwise immaterial in nature. Other shareholder communications received by the Fund not directly addressed and sent to the Board will be reviewed and generally responded to by management, and will be forwarded to the Board only at management's discretion based on the matters contained therein.

The Declaration of Trust provides that no Trustee or officer of the Trust shall be subject to any personal liability in connection with the assets or affairs of the Trust or any of its series except for losses in connection with his or her willful misfeasance, bad faith, gross negligence or reckless disregard of his or her duties. The Trust has also entered into an indemnification agreement with each Trustee which provides that the Trust shall advance expenses and indemnify and hold harmless the Trustee in certain circumstances against any expenses incurred by the Trustee in any proceeding arising out of or in connection with the Trustee's service to the Trust, to the maximum extent permitted by the Delaware Statutory Trust Act, the Securities Act and the 1940 Act, and which provides for certain procedures in connection with such advancement of expenses and indemnification.

The Trust's Declaration of Trust also provides that the Trust shall maintain appropriate insurance (for example, fidelity bonding and errors and omissions insurance) for the protection of the Trust, its shareholders, Trustees, officers, employees and agents covering possible tort and other liabilities.

The Declaration of Trust does not require the issuance of stock certificates. If stock certificates are issued, they must be returned by the registered owners prior to the transfer or redemption of shares represented by such certificates.

Rule 18f-2 under the 1940 Act provides that as to any investment company which has two or more series outstanding and as to any matter required to be submitted to shareholder vote, such matter is not deemed to have been effectively acted upon unless approved by the holders of a "majority" (as defined in the rule) of the voting securities of each series affected by the matter. Such separate voting requirements do not apply to the election of Trustees or the ratification of the selection of accountants. The Rule contains special provisions for cases in which an advisory contract is approved by one or more, but not all, series. A change in investment policy may go into effect as to one or more series whose holders so approve the change even though the required vote is not obtained as to the holders of other affected series.

The Trust, the Advisor, and the Sub-Advisor have adopted Codes of Ethics under Rule 17j-1 of the 1940 Act. These codes of ethics permit, subject to certain conditions, personnel of each of those entities to invest in securities that may be purchased or held by the Fund.

FINANCIAL STATEMENTS

Incorporated by reference herein is the Fund's Annual Report to shareholders for the fiscal year ended March 31, 2017, which includes the "Report of Independent Registered Public Accounting Firm", "Schedule of Investments", Statement of Assets and Liabilities", "Statement of Operations", "Statements of Changes in Net

Assets”, “Financial Highlights” and “Notes to Financial Statements”. A copy of the Fund’s Annual Report can be obtained at no charge by calling 1-866-933-9033 or writing the Fund.

APPENDIX “A” DESCRIPTION OF CREDIT RATINGS

Standard & Poor’s Corporation

A brief description of the applicable Standard & Poor’s Corporation (“S&P”) rating symbols and their meanings (as published by S&P) follows:

Long-Term Debt

An S&P corporate or municipal debt rating is a current assessment of the creditworthiness of an obligor with respect to a specific obligation. This assessment may take into consideration obligors such as guarantors, insurers or lessees. The debt rating is not a recommendation to purchase, sell or hold a security, inasmuch as it does not comment as to market price or suitability for a particular investor. The ratings are based on current information furnished by the issuer or obtained by S&P from other sources it considers reliable. S&P does not perform an audit in connection with any rating and may, on occasion, rely on unaudited financial information. The ratings may be changed, suspended or withdrawn as a result of changes in, or unavailability of, such information, or based on other circumstances. The ratings are based, in varying degrees, on the following considerations:

1. Likelihood of default-capacity and willingness of the obligor as to the timely payment of interest and repayment of principal in accordance with the terms of the obligation;
2. Nature of and provisions of the obligation; and
3. Protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors’ rights.

Investment Grade

AAA	Debt rated “AAA” has the highest rating assigned by S&P. Capacity to pay interest and repay principal is extremely strong.
AA	Debt rated “AA” has a very strong capacity to pay interest and repay principal and differs from the highest rated issues only in small degree.
A	Debt rated “A” has a strong capacity to pay interest and repay principal although it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in higher rated categories.
BBB	Debt rated “BBB” is regarded as having an adequate capacity to pay interest and repay principal. Whereas it normally exhibits adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for debt in this category than in higher rated categories.

Speculative Grade Rating

Debt rated “BB”, “B”, “CCC”, “CC” and “C” is regarded as having predominantly speculative characteristics with respect to capacity to pay interest and repay principal. “BB” indicates the least degree of speculation and “C” the highest. While such debt will likely have some quality and protective characteristics these are outweighed by major uncertainties or major exposures to adverse conditions.

BB	Debt rated “BB” has less near-term vulnerability to default than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to inadequate capacity to meet timely interest and principal payments. The “BB”
----	--

rating category is also used for debt subordinated to senior debt that is assigned an actual or implied “BBB” rating.

- B Debt rated “B” has a greater vulnerability to default but currently has the capacity to meet interest payments and principal repayments. Adverse business, financial, or economic conditions will likely impair capacity or willingness to pay interest and repay principal. The “B” rating category is also used for debt subordinated to senior debt that is assigned an actual or implied “BB” or “BB” rating.
- CCC Debt rated “CCC” has a currently identifiable vulnerability to default, and is dependent upon favorable business, financial, and economic conditions to meet timely payment of interest and repayment of principal. In the event of adverse business, financial, or economic conditions, it is not likely to have the capacity to pay interest and repay principal. The “CCC” rating category is also used for debt subordinated to senior debt that is assigned an actual or implied “B” or “B” rating.
- CC The rating “CC” typically is applied to debt subordinated to senior debt that is assigned an actual or implied “CCC” debt rating.
- C The rating “C” typically is applied to debt subordinated to senior debt which is assigned an actual or implied “CCC” debt rating. The “C” rating may be used to cover a situation where a bankruptcy petition has been filed, but debt service payments are continued.
- CI The rating “CI” is reserved for income bonds on which no interest is being paid.
- D Debt rated “D” is in payment default. The “D” rating category is used when interest payments or principal payments are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The “D” rating also will be used upon the filing of a bankruptcy petition if debt service payments are jeopardized.

Plus (+) or Minus (-): The ratings from “AA” to “CCC” may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

Provisional Ratings: The letter “p” indicates that the rating is provisional. A provisional rating assumes the successful completion of the project financed by the debt being rated and indicates that payment of debt service requirements is largely or entirely dependent upon the successful and timely completion of the project. This rating, however, while addressing credit quality subsequent to completion of the project, makes no comment on the likelihood of, or the risk of default upon failure of, such completion. The investor should exercise judgment with respect to such likelihood and risk.

- r The letter “r” is attached to highlight derivative, hybrid, and certain other obligations that S&P believes may experience high volatility or high variability in expected returns due to non-credit risks. Examples of such obligations are: securities whose principal or interest return is indexed to equities, commodities, or currencies; certain swaps and options; and interest only and principal only mortgage securities. The absence of an “r” symbol should not be taken as an indication that an obligation will exhibit no volatility or variability in total return.
- L The letter “L” indicates that the rating pertains to the principal amount of those bonds to the extent that the underlying deposit collateral is Federally insured by the Federal Savings & Loan Insurance Corporation or the Federal Deposit Insurance Corporation* In the case of certificates of deposit the letter “L” indicates that the deposit, combined with other deposits being held in the same right and capacity will be honored for principal and accrued pre-default interest up to the Federal insurance limits within 30 days after closing of the insured institution or, in the event that the deposit is assumed by a successor insured institution, upon maturity.
- NR Indicates no rating has been requested, that there is insufficient information on which to base a rating, or that S&P does not rate a particular type of obligation as a matter of policy.

Commercial Paper

An S&P commercial paper rating is a current assessment of the likelihood of timely payment of debt having an original maturity of no more than 365 days. Ratings are graded into several categories, ranging from “A-1” for the highest quality obligations to “D” for the lowest. These categories are as follows:

- A-1 This highest category indicates that the degree of safety regarding timely payment is strong. Those issues determined to possess extremely strong safety characteristics are denoted with a plus sign (+) designation.
- A-2 Capacity for timely payment on issues with this designation is satisfactory. However, the relative degree of safety is not as high as for issues designated “A-1.”
- * Continuance of the rating is contingent upon S&P’s receipt of an executed copy of the escrow agreement or closing documentation confirming investments and cash flow.
- A-3 Issues carrying this designation have adequate capacity for timely payment. They are, however, somewhat more vulnerable to the adverse effects of changes in circumstances than obligations carrying the higher designations.
- B Issues rated “B” are regarded as having only speculative capacity for timely payment.
- C This rating is assigned to short-term debt obligations with a doubtful capacity for payment.
- D Debt rated “D” is in payment default. The “D” rating category is used when interest payments or principal Payments are not made on the date due, even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period.

A commercial rating is not a recommendation to purchase, sell or hold a security inasmuch as it does not comment as to market price or suitability for a particular investor. The ratings are based on current information furnished to S&P by the issuer or obtained by S&P from other sources it considers reliable.

S&P does not perform an audit in connection with any rating and may, on occasion, rely on unaudited financial information. The ratings may be changed, suspended or withdrawn as a result of changes in or unavailability of such information or based on other circumstances.

Preferred Securities

- AAA This is the highest rating that may be assigned to a preferred stock issue and indicates an extremely strong capacity to pay the preferred stock obligations.
- AA A preferred stock issue rated AA also qualifies as a high quality fixed income security. The capacity to pay preferred stock obligations is very strong, although not as overwhelming as for issues rated AAA.
- A An issue rated A is backed by a sound capacity to pay the preferred stock obligations, although it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions.
- BBB An issue rated BBB is regarded as backed by an adequate capacity to pay preferred stock obligations. Although it normally exhibits adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to make payments for preferred stock in this category for issues in the A category.

BB As issue rated BB is regarded, on balance, as predominantly speculative with respect to the issuer's capacity to pay the preferred stock obligation. While such issues will likely have some quality and protective characteristics, they are outweighed by large uncertainties or major risk exposures to adverse conditions.

Moody's Investors Service, Inc.

A brief description of the applicable Moody's Investors Service, Inc. ("Moody's") rating symbols and their meanings (as published by Moody's) follows:

Long-Term Debt

The following summarizes the ratings used by Moody's for corporate and municipal long-term debt:

Aaa Bonds are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edged." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the Fundamentally strong position of such issuer.

Aa Bonds are judged to be of high quality by all standards. Together with the "Aaa" group they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in "Aaa" securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risks appear somewhat larger than in "Aaa" securities.

A Bonds possess many favorable investment attributes and are to be considered as upper medium-grade obligations. Factors giving security to principal and interest are considered adequate but elements may be present which suggest a susceptibility to impairment sometime in the future.

Baa Bonds considered medium-grade obligations, i.e., they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba, B, Caa, Ca, and C Bonds that possess one of these ratings provide questionable protection of interest and principal ("Ba" indicates some speculative elements; "B" indicates a general lack of characteristics of desirable investment; "Caa" represents a poor standing; "Ca" represents obligations which are speculative in a high degree; and "C" represents the lowest rated class of bonds). "Caa," "Ca" and "C" bonds may be in default.

Con. Bonds for which the security depends upon the completion of some act or the fulfillment of some condition are rated conditionally. These are bonds secured by (a) earnings of projects under construction, (b) earnings of projects unseasoned in operation experience, (c) rentals which begin when facilities are completed, or (d) payments to which some other limiting condition attaches. Parenthetical rating denotes probable credit stature upon completion of construction or elimination of basis of condition.

(P) When applied to forward delivery bonds, indicates that the rating is provisional pending delivery of the bonds. The rating may be revised prior to delivery if changes occur in the legal documents or the underlying credit quality of the bonds.

Note: Those bonds in the Aa, A, Baa, Ba and B groups which Moody's believes possess the strongest investment attributes are designated by the symbols, Aa1, A1, Ba1 and B1.

Short-Term Loans

MIG 1/VMIG 1	This designation denotes best quality. There is present strong protection by established cash flows, superior liquidity support or demonstrated broad based access to the market for refinancing.
MIG 2/VMIG 2	This designation denotes high quality. Margins of protection are ample although not so large as in the preceding group.
MIG 3/VMIG 3	This designation denotes favorable quality. All security elements are accounted for but there is lacking the undeniable strength of the preceding grades. Liquidity and cash flow protection may be narrow and market access for refinancing is likely to be less well-established.
MIG 4/VMIG 4	This designation denotes adequate quality. Protection commonly regarded as required of an investment security is present and although not distinctly or predominantly speculative, there is specific risk.
S.G.	This designation denotes speculative quality. Debt instruments in this category lack margins of protection.

Commercial Paper

Issuers rated Prime-1 (or related supporting institutions) have a superior capacity for repayment of short-term promissory obligations. Prime-1 repayment capacity will normally be evidenced by the following characteristics:

- Leading market positions in well-established industries.
- High rates of return on funds employed.
- Conservative capitalization structures with moderate reliance on debt and ample asset protection.
- Broad margins in earnings coverage of fixed financial charges and high internal cash generation.
- Well-established access to a range of financial markets and assured sources of alternate liquidity.

Issuers rated Prime-2 (or related supporting institutions) have a strong capacity for repayment of short-term promissory obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, will be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained. Issuers rated Prime-3 (or related supporting institutions) have an acceptable capacity for repayment of short-term promissory obligations. The effect of industry characteristics and market composition may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and the requirement for relatively high financial leverage. Adequate alternate liquidity is maintained.

Issuers rated Not Prime do not fall within any of the Prime rating categories.

Preferred Securities Ratings

aaa	Preferred stocks which are rated “aaa” are considered to be top quality. This rating indicates good asset protection and the least risk of dividend impairment within the universe of preferred stocks.
aa	Preferred stocks which are rated “aa” are considered to be high grade. This rating indicates that there is reasonable assurance that earnings and asset protection will remain relatively well maintained in the foreseeable future.

- a Preferred stocks which are rated “a” are considered to be upper-medium grade. While risks are judged to be somewhat greater than in the “aaa” and “aa” classifications, earnings and asset protection are, nevertheless, expected to be maintained at adequate levels.
- baa Preferred stocks which are rated “baa” are judged lower-medium grade, neither highly protected nor poorly secured. Earnings and asset protection appear adequate at present but may be questionable over any great length of time.
- ba Preferred stocks which are rated “ba” are considered to have speculative elements and their future cannot be considered well assured. Earnings and asset protection may be very moderate and not well safeguarded during adverse periods. Uncertainty of position characterizes preferred stocks in this class.

APPENDIX “B”
PROXY VOTING POLICIES AND GUIDELINES

Advisor
Palmer Square Capital Management LLC

In accordance with Rules 30b1-4 (new) & 206(4)-6 (new) & 204-2 (amended) of the Investment Advisers Act of 1940, Palmer Square Capital Management LLC (“Palmer Square”) is providing all clients with a summary of its proxy voting procedures.

- Upon opening an account with Palmer Square, clients are given the option to delegate proxy-voting discretion to Palmer Square by completing the appropriate documents. Palmer Square will only exercise proxy-voting discretion over client shares in the instances where clients give Palmer Square discretionary authority to vote on their behalf.
- It is Palmer Square’s policy to vote client shares primarily in conformity with Glass Lewis & Co. recommendations, in order to limit conflict of interest issues between Palmer Square and its clients. Glass Lewis & Co. and Palmer Square retain a record of all recommendations.
- Glass Lewis & Co. is a neutral third party that issues recommendations based upon its own internal guidelines.
- Palmer Square may vote client shares inconsistent with Glass Lewis & Co. recommendations if Palmer Square believes it is in the best interest of its clients. In such a case, Palmer Square will have on file a written disclosure detailing why they believe Glass Lewis & Co.’s recommendation was not in the client’s best interest.
- In situations where there is a conflict of interest in the voting of proxies due to business or personal relationships that Palmer Square maintains with persons having an interest in the outcome of certain votes, Palmer Square will take appropriate steps to ensure that its proxy voting decisions are made in the best interest of its clients.
- Palmer Square votes client shares via ProxyEdge, an electronic voting platform provided by Broadridge Financial Solutions, Inc. Additionally, ProxyEdge retains a record of proxy votes for each client.
- Annually, Palmer Square will file Form N-PX with the SEC, which will contain each fund’s complete proxy voting record.
- Palmer Square’s Compliance Department will periodically review all proxy votes to ensure consistency with its procedures.
- Upon request, clients can receive a copy of Palmer Square’s proxy voting procedures and Glass Lewis & Co.’s proxy voting guidelines.
- These procedures are currently in effect.

If you have any questions or would like a copy of Palmer Square’s proxy voting procedures, Glass Lewis & Co.’s proxy voting guidelines and/or a record of how your shares were voted, please contact Palmer Square’s Chief Compliance Officer at 913-647-9700.

APPENDIX “B” PROXY VOTING POLICIES AND GUIDELINES

Sub-Advisor SSI Investment Management, Inc.

This Statement of Policies and Procedures (this “Statement”) sets forth the policies and procedures of SSI Investment Management Inc. (the “Firm”) with respect to proxy voting. This Statement does not attempt to describe every regulatory and compliance requirement applicable to proxy voting, but rather summarizes some of the issues involved and establishes general rules and procedures. Although this Statement expressly addresses proxy voting, the policies and procedures set forth herein apply to any solicitation of votes with respect to securities held in a Discretionary Account (as defined below), such as, for example, the solicitation of votes with respect to securities held in a Discretionary Account (as defined below), such as, for example, the solicitation of the consent of the holders of fixed income securities to a proposed restructuring.

A. Certain Definitions

“Client” means any person (including any Investment Fund) to which or for whom the Firm provides investment advisory services.

“Discretionary Account” means the investment portfolio of any Client with respect to which that Client has granted the Firm (a) discretionary proxy voting authority, or (b) discretionary investment authority without expressly retaining proxy voting authority. All Investment Funds are Discretionary Accounts.

“Investment Fund” means any United States or non-United States investment fund or pool of which the Firm serves as general partner, managing member or investment adviser or in a similar capacity.

“Non-Discretionary Account” means the investment portfolio of any Client with respect to which that Client (a) has granted the Firm discretionary investment authority but has expressly retained proxy voting authority, or (b) has not granted the Firm discretionary investment authority or discretionary proxy voting authority.

“Proxy Control Associate” means the person responsible for overseeing the adherence to the policies and procedures related to proxy voting.

B. Use of Proxy Voting Service

The Firm has retained the services of Risk Metrics Group (“Risk Metrics,” formerly Institutional Shareholder Services, Inc.), which provides research and recommendations on proxy voting issues. Risk Metrics has authority to vote the proxies for each Discretionary Account, in accordance with the Proxy Voting Policies set forth below.

From time to time, SSI reviews the policies and procedures that Risk Metrics has adopted and implemented to insulate Risk Metrics’s voting recommendations from incentives to vote the proxies to further their relationships with issuers.

C. Discretionary Accounts

For all accounts SSI has voting authority, the Firm will instruct each custodian for a Discretionary Account to deliver to Risk Metrics all proxy solicitation materials received with respect to that Discretionary Account. Risk Metrics will review the securities held in its Discretionary Accounts on a regular basis to confirm that Risk Metrics receives copies of all proxy solicitation materials concerning such securities.

The Firm, through Risk Metrics, will vote all proxies on behalf of Discretionary Accounts after carefully considering all proxy solicitation materials and other available facts. The Firm has instructed Risk Metrics to make all voting decisions on behalf of a Discretionary Account based solely on the determination of the best interests of that Discretionary Account. The Firm will use reasonable efforts to respond to each proxy solicitation by the deadline for

such response. The Proxy Control Associate may designate an appropriate employee of the Firm to be responsible for insuring that all proxy statements are received and that the Firm responds to them in a timely manner.

1. Company Information. The Firm, through Risk Metrics, will review all proxy solicitation materials it receives concerning securities held in a Discretionary Account. Risk Metrics evaluates all such information and may seek additional information from the party soliciting the proxy and independent corroboration of such information when Risk Metrics considers it appropriate and when it is reasonably available. 1.

2. Proxy Voting Policies

a) The Firm will vote **FOR** a proposal when it believes that the proposal serves the best interests of the Discretionary Account whose proxy is solicited because, on balance, the following factors predominate:

(i) the proposal has a positive economic effect on shareholder value;

(ii) the proposal poses no threat to existing rights of shareholders;

(iii) the dilution, if any, of existing shares that would result from approval of the proposal is warranted by the benefits of the proposal; and

(iv) the proposal does not limit or impair accountability to shareholders on the part of management and the board of directors.

b) The Firm will vote **AGAINST** a proposal if it believes that, on balance, the following factors predominate:

(i) the proposal has an adverse economic effect on shareholder value;

(ii) the proposal limits the rights of shareholders in a manner or to an extent that is not warranted by the benefits of the proposal;

(iii) the proposal causes significant dilution of shares that is not warranted by the benefits of the proposal;

(iv) the proposal limits or impairs accountability to the shareholders on the part of management or the board of directors; or

(v) the proposal is a shareholder initiative that the Firm believes wastes time and resources of the company or reflects the grievance of one individual.

c) The Firm will **ABSTAIN** from voting proxies when the Firm believes that it is appropriate. Usually, this occurs when the Firm believes that a proposal holds negative but nonquantifiable implications for shareholder value but may express a legitimate concern.

d) From time to time, Risk Metrics provides to the Firm more detailed proxy voting guidelines, in accordance with this section C(2), the most recent version of which SSI maintains and will be followed by Risk Metrics when voting proxies.

3. Conflicts of Interest. Due to the size and nature of the Firms' operations and the Firm's limited affiliations in the securities industry, the Firm does not expect that material conflicts of interest will arise between the Firm and a Discretionary Account over proxy voting. The Firm recognizes, however, that such conflicts may arise from time to time, such as, for example, when the Firm or one of its affiliates has a business arrangement that could be affected by the outcome of a proxy vote or has a personal or business relationship with a person seeking appointment or re appointment as a director of a company. If a material conflict of interest arises, the Firm will vote all proxies in accordance with section C(2). The Firm will not place its own interests ahead of the interests of its Discretionary Accounts in voting proxies. When voting proxies, the Firm does not consider any conflicts of interest that any other affiliate of a client (such as another service provider to an investment company client) may have.

If the Firm determines that the proxy voting policies in section C(2) do not adequately address a material conflict of interest related to a proxy, the Firm will provide the affected Client with copies of all proxy solicitation materials received by the Firm with respect to that proxy, notify that Client of the actual or potential conflict of interest and of the Firm's intended response to the proxy request (which response will be in accordance with the policies set forth in section C(2)), and request that the Client consent to the Firm's intended response. With respect to any Investment Fund of which the Firm serves as manager or general partner or in a similar capacity, the Firm will provide the foregoing notices to all investors in the Investment Fund and request the consent of a majority in interest of such investors. If the Client (or a majority in interest of the investors in an Investment Fund) consents to the Firm's intended response or fails to respond to the notice within a reasonable period of time specified in the notice, the Firm will vote the proxy as described in the notice. If the Client (or a majority in interest of the investors in an Investment Fund) objects to the Firm's intended response, the Firm will vote the proxy as directed by the Client (or a majority in interest of the investors in an Investment Fund).

4. Shareholder Proposals by the Firm. The Firm will submit a shareholder proposal on behalf of an Investment Fund only if the Firm believes that the proposal would provide a substantial overall benefit to the Investment Fund. The Firm will submit a shareholder proposal on behalf of any other Discretionary Account only at the request of the Discretionary Account Client or with that Client's prior written consent. The Firm will vote any shares in a Discretionary Account on behalf of a proposal submitted by the Firm Client.

5. Proxy Vote Summaries. At the request of a Discretionary Account Client or an investor in an Investment Fund (other than an Investment Fund that is registered as an investment company with the Securities and Exchange Commission ("SEC") under the Investment Company Act of 1940, as amended (the "ICA") (such Investment Fund a "Registered Fund")), the Firm will provide that person with a report summarizing all proxy solicitations the Firm received with respect to that Discretionary Account during the period requested by that person and the action taken by the Firm on each such proxy. Regarding the proxy votes in respect of the portfolio securities in a Registered Fund, the Firm will provide that Registered Fund with the information required to be disclosed by that Registered Fund pursuant to Rule 30b1-4 of the ICA and SEC Form N-PX promulgated thereunder, including:

- a) The name of the issuer of the portfolio security;
- b) The exchange ticker symbol of the portfolio security;
- c) The Council on Uniform Securities Identification Procedures number for the portfolio security (unless not available through reasonably practical means, e.g., in the case of certain foreign issuers);
- d) The shareholder meeting date;
- e) A brief identification of the matter voted on;
- f) Whether the matter was proposed by the issuer or by a security holder;
- g) Whether the registrant cast its vote on the matter;
- h) How the registrant cast its vote (e.g., for or against proposal, or abstain; for or withhold regarding election of directors); and
- (i) Whether the registrant cast its vote for or against management.

D. Non-Discretionary Accounts.

The Firm promptly will forward any proxy solicitation materials concerning securities held in a Non-Discretionary Account that the Firm receives at least five business days before the applicable proxy voting deadline to the appropriate Client. The Firm will vote any such proxy as directed by that Client. At a Client's request, the Firm may,

but is not obligated to, advise that Client with respect to the voting of any proxy. No advice concerning the voting of any proxy may be provided to any Client unless such advice has been approved by the Proxy Control Associate.

E. Records

The Firm will keep a copy of (a) each proxy statement it receives regarding securities held in Discretionary Accounts, (b) a record of each vote cast by the Firm with respect to securities in each Discretionary Account, (c) any document created by the Firm that is material to the Firm's decision on voting a proxy or that describes the basis for that decision, (d) each written request from a Discretionary Account Client or an investor in an Investment Fund (other than a Registered Fund) for information about how the Firm votes proxies of that Discretionary Account or Investment Fund, (e) each written response by the Firm to any oral or written request from a Discretionary Account Client or an investor in an Investment Fund other than a Registered Fund for such information and (f) with respect to a registered Fund the information required by section 4(e) hereof. The Firm may delegate to a third party the duty to keep the records identified in sections 5(a) and (b) if that third party agrees to furnish such records to the Firm and, with respect to any records pertaining to the Registered Fund proxy voting are the property of the Firm and that Registered Fund. Each such record will be maintained by the Firm or such third party for at least six years from the end of the fiscal year during which the last entry is made in that record, and for the first two years in the Firm's office (or such third party's office, as the case may be). The Firm or such third party may elect not to keep a copy of a proxy statement if it can obtain such statement electronically via the SEC's EDGAR system.

INVESTMENT MANAGERS SERIES TRUST PROXY VOTING POLICIES AND PROCEDURES

Investment Managers Series Trust (the “Trust”) is registered as an open-end investment company under the Investment Company Act of 1940, as amended (“1940 Act”). The Trust offers multiple series (each a “Fund” and, collectively, the “Funds”). Consistent with its fiduciary duties and pursuant to Rule 30b1-4 under the 1940 Act (the “Proxy Rule”), the Board of Trustees of the Trust (the “Board”) has adopted this proxy voting policy on behalf of the Trust (the “Policy”) to reflect its commitment to ensure that proxies are voted in a manner consistent with the best interests of the Funds’ shareholders.

Delegation of Proxy Voting Authority to Fund Advisors

The Board believes that the investment advisor of each Fund (each an “Advisor” and, collectively, the “Advisors”), as the entity that selects the individual securities that comprise its Fund’s portfolio, is the most knowledgeable and best-suited to make decisions on how to vote proxies of portfolio companies held by that Fund. The Trust shall therefore defer to, and rely on, the Advisor of each Fund to make decisions on how to cast proxy votes on behalf of such Fund.

The Trust hereby designates the Advisor of each Fund as the entity responsible for exercising proxy voting authority with regard to securities held in the Fund’s investment portfolio. Consistent with its duties under this Policy, each Advisor shall monitor and review corporate transactions of corporations in which the Fund has invested, obtain all information sufficient to allow an informed vote on all proxy solicitations, ensure that all proxy votes are cast in a timely fashion, and maintain all records required to be maintained by the Fund under the Proxy Rule and the 1940 Act. Each Advisor shall perform these duties in accordance with the Advisor’s proxy voting policy, a copy of which shall be presented to this Board for its review. Each Advisor shall promptly provide to the Board updates to its proxy voting policy as they are adopted and implemented.

Availability of Proxy Voting Policy and Records Available to Fund Shareholders

If a Fund or an Advisor has a web site, a copy of the Advisor’s proxy voting policy and this Policy may be posted on such website. A copy of such policies and of each Fund’s proxy voting record shall also be made available, without charge, upon request of any shareholder of the Fund, by calling the applicable Fund’s toll-free telephone number as printed in the Fund’s prospectus. The Trust’s administrator shall reply to any Fund shareholder request within three business days of receipt of the request, by first-class mail or other means designed to ensure equally prompt delivery.

Each Advisor shall provide a complete voting record, as required by the Proxy Rule, for each series of the Trust for which it acts as advisor, to the Trust’s co-administrator within 30 days after June 30 of each year. The Trust’s co-administrator, MFAC, will file a report based on such record on Form N-PX on an annual basis with the Securities and Exchange Commission no later than August 31st of each year.
