

Palmer Square Income Plus Fund

June 3, 2019

Summary Prospectus

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's Statutory Prospectus and Statement of Additional Information and other information about the Fund online at <http://www.palmersquarefunds.com/income-plus-fund>. You may also obtain this information at no cost by calling 1-866-933-9033 or by sending an e-mail request to investorrelations@palmersquarecap.com. The Fund's Prospectus and Statement of Additional Information, both dated June 1, 2019, as each may be amended or supplemented, are incorporated by reference into this Summary Prospectus.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from the Fund, if you hold your shares directly with the Fund, or from your financial intermediary, such as a broker-dealer or bank, if you hold your shares through a financial intermediary. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. If you hold your shares directly with the Fund, you may elect to receive shareholder reports and other communications from the Fund electronically by contacting the Fund at 1-866-933-9033 or, if you hold your shares through a financial intermediary, by contacting your financial intermediary.

You may elect to receive all future reports in paper free of charge. If you hold your shares directly with the Fund, you can inform the Fund that you wish to continue receiving paper copies of your shareholder reports by contacting the Fund at 1-866-933-9033 or, if you hold your shares through a financial intermediary, by contacting your financial intermediary. Your election to receive reports in paper will apply to all of the series of Investment Managers Series Trust managed by Palmer Square Capital Management LLC you hold directly or through your financial intermediary, as applicable.

Investment Objectives

The investment objective of the Palmer Square Income Plus Fund (the "Fund") is income. A secondary objective of the Fund is capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees		
<i>(fees paid directly from your investment)</i>		
Wire fee		\$20
Overnight check delivery fee		\$25
Retirement account fees (annual maintenance fee)		\$15
Annual Fund Operating Expenses		
<i>(expenses that you pay each year as a percentage of the value of your investment)</i>		
Management fees		0.55%
Distribution (Rule 12b-1) fees		None
Other expenses ¹		0.25%
Shareholder servicing fee	0.07%	
Dividend and interest expense on short sales	0.02%	
All other expenses	0.16%	
Acquired fund fees and expenses		0.01%
Total annual fund operating expenses ¹		0.81%
Fees waived and/or expenses reimbursed		(0.03%)
Total annual fund operating expenses after waiving fees and/or reimbursing expenses ^{1, 2}		0.78%

- 1 The total annual fund operating expenses and net operating expenses do not correlate to the ratio of expenses to average net assets appearing in the financial highlights table, which reflects only the operating expenses of the Fund and does not include acquired fund fees and expenses.
- 2 The Fund's advisor has contractually agreed to waive its fees and/or pay for operating expenses of the Fund to ensure that total annual fund operating expenses (excluding any taxes, leverage interest, brokerage commissions, dividend and interest expenses on short sales, acquired fund fees and expenses (as determined in accordance with Form N-1A), expenses incurred in connection with any merger or reorganization, and extraordinary expenses such as litigation expenses) do not exceed 0.75% of the average daily net assets of the Fund. This agreement is in effect until May 31, 2020, and it may be terminated before that date only by the Trust's Board of Trustees. The Fund's advisor is permitted to seek reimbursement from the Fund, subject to certain limitations, of fees waived or payments made to the Fund for a period ending three full fiscal years after the date of the waiver or payment. This reimbursement may be requested from the Fund if the reimbursement will not cause the Fund's annual expense ratio to exceed the lesser of (a) the expense limitation in effect at the time such fees were waived or payments made, or (b) the expense limitation in effect at the time of the reimbursement.

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The example reflects the Fund's contractual fee waiver and/or expense reimbursement only for the term of the contractual fee waiver and/or expense reimbursement.

Although your actual costs may be higher or lower, based on these assumptions your costs would be:

One Year	Three Years	Five Years	Ten Years
\$80	\$256	\$447	\$999

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 214% of the average value of its portfolio.

Principal Investment Strategies

Under normal market conditions, the Fund invests at least 80% of its net assets (plus any borrowings for investment purposes) in debt securities. The types of debt securities in which the Fund may invest include, but are not limited to, (i) asset backed securities including collateralized loan obligations ("CLOs") and mortgage-backed securities, (ii) corporate bonds, notes and debentures, (iii) securities issued or guaranteed by the U.S. Government, its agencies, instrumentalities or sponsored entities, (iv) senior secured floating rate and fixed rate loans or debt, and (v) second lien or other subordinated or unsecured floating rate and fixed rate loans or debt. The Fund's investment strategy involves active and frequent trading.

The Fund's investments in asset-backed securities may be comprised of loans or leases secured by motor vehicles or other equipment, consumer receivables from sources such as credit cards or student loans, or cash flows from operating assets such as royalties and leases.

Mortgage-backed securities in which the Fund may invest include those issued or guaranteed by federal agencies and/or U.S. Government sponsored instrumentalities, such as the Government National Mortgage Administration ("Ginnie Mae"), the Federal Housing Administration ("FHA"), the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac"). The Fund may also invest in commercial mortgage-backed securities ("CMBS") and collateralized mortgage-backed securities ("CMOs") issued or guaranteed by private entities.

The Fund may invest in debt securities of any maturity and credit quality. Under normal market conditions, the Advisor expects that the Fund will invest primarily in securities rated investment grade at time of purchase. Investment grade securities are those rated in the Baa3 or higher categories by Moody's Investors Service, Inc.

(“Moody’s”), or in the BBB- or higher categories by Standard & Poor’s, a division of McGraw Hill Companies Inc. (“S&P”), or Fitch Ratings Ltd. (“Fitch”) or, if unrated by Moody’s, S&P, or Fitch, or another Nationally Recognized Statistical Rating Organization (“NRSRO”), determined by Palmer Square Capital Management LLC (the “Advisor”), the Fund’s advisor, to be of comparable credit quality. However, the Fund may invest up to 30% of its net assets in high yield securities – securities rated below investment grade that generally have higher yields and higher risks than investment grade securities. High yield securities, commonly referred to as “junk bonds”, are rated below investment grade by at least one of Moody’s, S&P or Fitch (or if unrated, determined by the Advisor to be of comparable credit quality high yield securities).

In pursuing the Fund’s investment objectives, the Advisor uses a blend of top-down analysis which includes macro analysis, cross-asset relative value analysis, and sector monitoring, and bottom-up analysis which involves individual issuer and management analysis and security/transaction evaluation that seeks to identify debt securities that it believes can provide highly competitive rate yields and total return over the long term with relatively mitigated credit risk. The Advisor anticipates the Fund’s average portfolio duration under normal market conditions to be less than one year. Duration is a measure of the underlying portfolio’s price sensitivity to changes in prevailing interest rates. The longer a security’s duration, the more sensitive its price will be to changes in interest rates. For example, a 1.00% increase in interest rates would result in a minimal change to the price of a security with a duration less than one year. Calculations of duration may be based on estimates and may not reliably predict a security’s sensitivity to changes in interest rates.

For the purposes of achieving the Fund’s investment objectives, hedging risks, and enhancing liquidity, the Fund may also employ derivatives, such as: puts and calls on U.S. Treasury futures; options, swaps and other interest rate derivatives; and credit default swaps on selected entities or indexes (where the Fund may act as either buyer or seller). As it pertains to the Advisor’s use of derivatives for hedging, risks that can be quantitatively measured and managed include interest rate risk (duration and convexity, which is the change to duration as interest rates change), prepayment risk, spread risk and volatility risk. The Advisor’s goal is not to eliminate all risk, but to assume only those risks the Advisor views as offering a strong risk/return profile. Additionally, the Fund may employ the types of derivatives referenced above in order to achieve its investment objectives by, among other practices, replicating a certain type of credit exposure, obtaining short or long exposures to credit and/or interest rates, or taking a position in light of a potential appreciation or depreciation in value of a company’s securities. The Fund will include the market value of its derivative positions based on debt securities or interest rates for purposes of determining whether it holds at least 80% of its net assets in debt securities.

The Fund is classified as “non-diversified” under the Investment Company Act of 1940 (the “1940 Act”), which means that it may invest more of its assets in a smaller number of issuers than “diversified” funds.

Principal Risks of Investing

Risk is inherent in all investing and you could lose money by investing in the Fund. A summary description of certain principal risks of investing in the Fund is set forth below in alphabetical order. Before you decide whether to invest in the Fund, carefully consider these risk factors associated with investing in the Fund, which may cause investors to lose money. There can be no assurance that the Fund will achieve its investment objectives.

- *Bank Loan Risk.* The Fund’s investments in secured and unsecured participations in bank loans and assignments of such loans may create substantial risk. In making investments in such loans, which are made by banks or other financial intermediaries to borrowers, the Fund will depend primarily upon the creditworthiness of the borrower for payment of principal and interest which will expose the Fund to the credit risk of both the financial institution and the underlying borrower. The market for bank loans may not be highly liquid and the Fund may have difficulty selling them.
- *Collateralized Loan Obligations Risk.* The Fund is subject to asset manager, legal and regulatory, limited recourse, liquidity, redemption, and reinvestment risks as a result of the structure of CLOs in which the Fund may invest. A CLO’s performance is linked to the expertise of the CLO manager and its ability to manage the CLO portfolio. Changes in the regulation of CLOs may adversely affect the value of the CLO investments held by the Fund and the ability of the Fund to execute its investment strategy. CLO debt is payable solely from the proceeds of the CLO’s underlying assets and, therefore, if the income from the underlying loans is insufficient to make payments on the CLO debt, no other assets will be available for payment. CLO debt securities may be subject to redemption and the timing of redemptions may adversely affect the returns on

CLO debt. The CLO manager may not find suitable assets in which to invest and the CLO manager's opportunities to invest may be limited.

- *Credit Risk.* If an issuer or guarantor of a debt security held by the Fund or a counterparty to a financial contract with the Fund defaults or is downgraded or is perceived to be less creditworthy, or if the value of the assets underlying a security declines, the value of the Fund's portfolio will typically decline. Subordinated securities are more likely to suffer a credit loss than non-subordinated securities of the same issuer and will be disproportionately affected by a default, downgrade or perceived decline in creditworthiness.
- *Cybersecurity Risk.* Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, customer data (including private shareholder information), or proprietary information, or cause the Fund, the Advisor, and/or other service providers (including custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or loss of operational functionality. In an extreme case, a shareholder's ability to exchange or redeem Fund shares may be affected.
- *Derivatives Risk.* Derivatives include instruments and contracts that are based on and valued in relation to one or more underlying securities, financial benchmarks, indices, or other reference obligations or measures of value. Major types of derivatives include futures, options, swaps and forward contracts. Using derivatives can have a leveraging effect and increase fund volatility. Derivatives transactions can be highly illiquid and difficult to unwind or value, and changes in the value of a derivative held by the Fund may not correlate with the value of the underlying instrument or the Fund's other investments. Many of the risks applicable to trading the instruments underlying derivatives are also applicable to derivatives trading. However, additional risks are associated with derivatives trading that are possibly greater than the risks associated with investing directly in the underlying instruments. These additional risks include, but are not limited to, illiquidity risk and counterparty credit risk. For derivatives that are required to be cleared by a regulated clearinghouse, other risks may arise from the Fund's relationship with a brokerage firm through which it submits derivatives trades for clearing, including in some cases from other clearing customers of the brokerage firm.
- *Extension Risk.* If interest rates rise, repayments of fixed income securities may occur more slowly than anticipated by the market. This may drive the prices of these securities down because their interest rates are lower than the current interest rate and they remain outstanding longer.
- *Fixed Income Securities Risk.* The prices of fixed income securities respond to economic developments, particularly interest rate changes, as well as to changes in an issuer's credit rating or market perceptions about the creditworthiness of an issuer. Generally fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, and longer-term and lower rated securities are more volatile than shorter-term and higher rated securities.
- *Government-Sponsored Entities Risk.* The Fund's investment in U.S. Government obligations may include securities issued or guaranteed as to principal and interest by the U.S. Government, or its agencies or instrumentalities. Payment of principal and interest on U.S. Government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. There can be no assurance that the U.S. Government would provide financial support to its agencies or instrumentalities (including Government-sponsored enterprises) where it is not obligated to do so.
- *High Yield ("Junk") Bond Risk.* High yield bonds are debt securities rated below investment grade (often called "junk bonds"). Junk bonds are speculative, involve greater risks of default, downgrade, or price declines and are more volatile and tend to be less liquid than investment-grade securities. Companies issuing high yield bonds are less financially strong, are more likely to encounter financial difficulties, and are more vulnerable to adverse market events and negative sentiments than companies with higher credit ratings.
- *Interest Rate Risk.* Generally fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, with longer-term securities being more sensitive than shorter-term securities. For example, the price of a security with a three-year duration would be expected to drop by approximately 3% in response to a 1% increase in interest rates. Generally, the longer the maturity and duration of a bond or fixed

rate loan, the more sensitive it is to this risk. Falling interest rates also create the potential for a decline in the Fund's income. Changes in governmental policy, rising inflation rates, and general economic developments, among other factors, could cause interest rates to increase and could have a substantial and immediate effect on the values of the Fund's investments. These risks are greater during periods of rising inflation. In addition, a potential rise in interest rates may result in periods of volatility and increased redemptions that might require the Fund to liquidate portfolio securities at disadvantageous prices and times.

- *Liquidity Risk.* The Fund may not be able to sell some or all of the investments that it holds due to a lack of demand in the marketplace or other factors such as market turmoil, or if the Fund is forced to sell an illiquid asset to meet redemption requests or other cash needs it may only be able to sell those investments at a loss. In addition, the reduction in dealer market-making capacity in the fixed income markets that has occurred in recent years has the potential to decrease the liquidity of the Fund's investments. Illiquid assets may also be difficult to value.
- *Management and Strategy Risk.* The value of your investment depends on the judgment of the Advisor about the quality, relative yield, value or market trends affecting a particular security, industry, sector or region, which may prove to be incorrect.
- *Market Risk.* The market price of a security or instrument may decline, sometimes rapidly or unpredictably, due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic or political conditions throughout the world, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. The market value of a security or instrument also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Mortgage-Backed and Asset-Backed Securities Risk.* Mortgage-backed and asset-backed securities represent interests in "pools" of mortgages or other assets, including consumer loans or receivables held in trust. Mortgage-backed securities are subject to "prepayment risk" (the risk that borrowers will repay a loan more quickly in periods of falling interest rates) and "extension risk" (the risk that borrowers will repay a loan more slowly in periods of rising interest rates). If the Fund invests in mortgage-backed or asset-backed securities that are subordinated to other interests in the same pool, the Fund may only receive payments after the pool's obligations to other investors have been satisfied. An unexpectedly high rate of defaults on the assets held by a pool may limit substantially the pool's ability to make payments of principal or interest to the Fund, reducing the values of those securities or in some cases rendering them worthless. The risk of such defaults is generally higher in the case of mortgage pools that include so-called "subprime" mortgages. The Fund's investments in other asset-backed securities are subject to risks similar to those associated with mortgage-backed securities, as well as additional risks associated with the nature of the assets and the servicing of those assets.
- *Non-Diversification Risk.* The Fund is classified as "non-diversified," which means the Fund may invest a larger percentage of its assets in the securities of a smaller number of issuers than a diversified fund. Investment in securities of a limited number of issuers exposes the Fund to greater market risk and potential losses than if its assets were diversified among the securities of a greater number of issuers.
- *Portfolio Turnover Risk.* Active and frequent trading of the Fund's portfolio securities may lead to higher transaction costs and may result in a greater number of taxable transactions than would otherwise be the case, which could negatively affect the Fund's performance. A high rate of portfolio turnover is 100% or more.
- *Prepayment or Call Risk.* Many issuers have a right to prepay their securities. If interest rates fall, an issuer may exercise this right. If this happens, the Fund will not benefit from the rise in market price that normally accompanies a decline in interest rates, and will be forced to reinvest prepayment proceeds at a time when yields on securities available in the market are lower than the yield on the prepaid security. The Fund may also lose any premium it paid on the security.

- *Private Placements and Restricted Securities Risk.* Private placement securities are securities that have been privately placed and are not registered under the Securities Act of 1933, as amended (the “Securities Act”). They are eligible for sale only to certain eligible investors. Private placements often may offer attractive opportunities for investment not otherwise available on the open market. Private placement and other “restricted” securities often cannot be sold to the public without registration under the Securities Act or an exemption from registration (such as Rules 144 or 144A). Private placements and other restricted securities may be considered illiquid securities.
- *Senior Loan Risk.* The Fund may invest in floating or adjustable rate senior loans. These investments are subject to increased credit and liquidity risks. Senior loan prices also may be adversely affected by supply-demand imbalances caused by conditions in the senior loan market or related markets. Below investment grade senior loans, like high-yield debt securities or junk bonds, usually are more credit than interest rate sensitive, although the value of these instruments may be affected by interest rate swings in the overall fixed income market. Senior loans may be subject to structural subordination and, although the loans may be senior to equity and other debt securities in the borrower’s capital structure, the loans may be subordinated to other obligations of the borrower or its subsidiaries.
- *Short Sales Risk.* In connection with a short sale of a security or other instrument, the Fund is subject to the risk that instead of declining, the price of the security or other instrument sold short will rise. If the price of the security or other instrument sold short increases between the date of the short sale and the date on which the Fund replaces the security or other instrument borrowed to make the short sale, the Fund will experience a loss, which is theoretically unlimited since there is a theoretically unlimited potential for the market price of a security or other instrument sold short to increase. Shorting options or futures may have an imperfect correlation to the assets held by the Fund and may not adequately protect against losses in or may result in greater losses for the Fund’s portfolio.
- *Subordinated Securities Risk.* The Fund may invest in securities that are subordinated in right of payment to more senior securities of the issuer. The Fund is more likely to suffer a credit loss on subordinated securities of an issuer than on non-subordinated securities of the same issuer.
- *Valuation Risk.* The sales price the Fund could receive for any particular portfolio investment may differ from the Fund’s valuation of the investment, particularly for securities that trade in thin or volatile markets or that are valued by the Fund using a fair value methodology. Investors who purchase or redeem Fund shares on days when the Fund is holding fair-valued securities may receive fewer or more shares or lower or higher redemption proceeds than they would have received if the Fund had not fair-valued the security or had used a different valuation methodology.

Performance

The bar chart and table below provide some indication of the risks of investing in the Fund by showing changes in the Fund’s performance from year to year and by showing how the average annual total returns of the Fund compare with the average annual total returns of a broad-based market index. Updated performance information is available at the Fund’s website, www.palmersquarefunds.com. The Fund’s past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future.

Calendar-Year Total Return (before taxes)
For each calendar year at NAV

The year-to-date return for the Fund as of March 31, 2019 was 2.15%.

Highest Calendar Quarter Return at NAV (not-annualized):	4.72%	Quarter Ended 09/30/2016
Lowest Calendar Quarter Return at NAV (not-annualized):	-4.70%	Quarter Ended 03/31/2016

Average Annual Total Returns for the periods ended December 31, 2018	1 Year	Since Inception February 28, 2014
Return Before Taxes	1.17%	2.59%
Return After Taxes on Distributions*	0.02%	1.20%
Return After Taxes on Distributions and Sale of Fund Shares*	0.69%	1.34%
Bloomberg Barclays U.S. Aggregate Bond Index (reflects no deduction for fees, expenses or taxes)	0.01%	2.18%

* After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

Investment Advisor

Palmer Square Capital Management LLC

Portfolio Managers

Angie K. Long, CFA, Chief Investment Officer, and Christopher D. Long, President, have been jointly and primarily responsible for the day-to-day management of the Fund's portfolio since its inception on February 28, 2014.

Purchase and Sale of Fund Shares

Shares of the Fund are available for investment only by clients of financial intermediaries, institutional investors, and a limited number of other investors approved by the Advisor.

To purchase shares of the Fund, you must invest at least the following minimum amount.

Minimum Investments	To Open Your Account	To Add to Your Account
All Accounts	\$250,000	None

Shares of the Fund are redeemable through your broker-dealer or other financial intermediary, by mail, or by telephone on any business day the New York Stock Exchange (the "NYSE") is open for business. If you are purchasing or redeeming Fund shares through an intermediary such as a broker-dealer or bank, contact your intermediary directly.

Tax Information

The Fund's distributions are generally taxable, and will ordinarily be taxed as ordinary income, qualified dividend income or capital gains, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. Shareholders investing through such tax-advantaged arrangements may be taxed later upon withdrawal of monies from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
